01. KITCHEN SYSTEM & PLANNING

OBJETIVO

Este sistema organiza la compra, preparación, almacenamiento y planificación de comida para dos personas.

Su propósito es reducir la carga mental diaria sin convertir la alimentación en un sistema rígido.

La cocina funciona bajo cuatro principios:

Preparar ingredientes por adelantado.
Cocinar comida fresca durante la semana.
Utilizar un inventario definido en lugar de decidir desde cero todos los días.
Mantener suficiente flexibilidad para comidas especiales, días cansados y cambios de planes.

El sistema general es:

INVENTORY → PLAN → SHOP → PREP → THAW → COOK → PACK → RESET

---

1. SISTEMA OFICIAL DE CANTIDADES

PLATO

1 plato = comida para 1 persona.

PORCIÓN

1 porción = 2 platos.

Es decir:

- 1 plato para Tita.
- 1 plato para Alonso.

UNIDAD

1 unidad = 2 porciones = 4 platos.

Una unidad normalmente cubre:

Comida principal

2 platos.

Comida del día siguiente

2 platos.

Por lo tanto:

1 UNIDAD = 4 PLATOS = 2 PORCIONES

Este será el sistema oficial utilizado en todo el Kitchen Manual.

Cuando una receta indique:

> **Rendimiento: 1 unidad**

significa que produce suficiente comida para cuatro platos individuales.

---

2. STOCK OBJETIVO DE PROTEÍNAS

La meta no es consumir obligatoriamente 25 unidades cada mes.

La meta es mantener un:

STOCK OBJETIVO = 25 UNIDADES

Antes de realizar la compra mensual se cuentan todas las unidades de proteína que todavía existen en el freezer.

Después se compra y prepara únicamente lo necesario para regresar aproximadamente a 25 unidades.

Ejemplo

Si quedan:

4 unidades

se necesitan aproximadamente:

21 unidades nuevas

para volver al stock objetivo de:

25 unidades.

Esto evita:

- sobrecomprar;
- acumular comida innecesariamente;
- desperdiciar proteína;
- consumir alimentos solamente porque “hay que terminar el mes”.

---

3. DISTRIBUCIÓN OBJETIVO DE LAS 25 UNIDADES

La distribución base será:

Proteína	Unidades
Pollo	10
Cerdo	6
Res	5
Seafood	4
TOTAL	**25**

Esta distribución está diseñada alrededor del patrón real de consumo.

Pollo

Es la proteína principal del sistema debido a su versatilidad.

Objetivo: 10 unidades.

Incluye:

- filetes de pechuga;
- trocitos de pechuga;
- pollo con hueso;
- preparaciones marinadas.

Cerdo

Objetivo: 6 unidades.

Incluye:

- chuletas;
- trocitos de pork shoulder;
- cerdo molido;
- preparaciones marinadas.

Res

Objetivo: 5 unidades.

Incluye:

- bistec;
- carne en cubitos;
- carne molida;
- hamburguesas;
- steaks.

Seafood

Objetivo: 4 unidades.

Una unidad de seafood por semana.

Rotación principal:

1. Salmón.
2. Tuna steak.
3. Tilapia.
4. Camarones.

El atún enlatado **no pertenece a esta categoría de cuatro unidades**.

El atún enlatado pertenece al pantry y se utiliza principalmente para comidas rápidas como arroz con atún.

---

4. RITMO REAL DE LA SEMANA

El sistema opera principalmente de domingo a viernes.

El sábado normalmente queda fuera de la planificación porque se come afuera.

DOMINGO

Almuerzo — SPECIAL MEAL

El domingo se prepara una comida especial.

Ejemplos:

- steak;
- seafood;
- hamburguesas;
- parrillada;
- alguna preparación que se quiera disfrutar con más calma.

Se cocina:

1 unidad = 4 platos.

Se sirven:

2 platos → almuerzo del domingo.

Se guardan:

2 platos → almuerzo del lunes.

Cena — FLEX DINNER

La cena del domingo no necesita producir almuerzo.

Debe ser sencilla.

Ejemplos:

- ramen;
- arroz con atún;
- quesadillas;
- sandwiches;
- dumplings;
- eggdrop soup;
- leftovers;
- sopa;
- una cena ligera.

---

5. ROTACIÓN DE LUNES A JUEVES

LUNES

Cena

Pollo.

Cocinar:

1 unidad.

Servir:

2 platos → cena del lunes.

Guardar:

2 platos → almuerzo del martes.

MARTES

Cena

Res.

Cocinar:

1 unidad.

Servir:

2 platos → cena del martes.

Guardar:

2 platos → almuerzo del miércoles.

MIÉRCOLES

Cena

Cerdo.

Cocinar:

1 unidad.

Servir:

2 platos → cena del miércoles.

Guardar:

2 platos → almuerzo del jueves.

JUEVES

Cena

Pollo.

Cocinar:

1 unidad.

Servir:

2 platos → cena del jueves.

Guardar:

2 platos → almuerzo del viernes.

6. VIERNES

El viernes funciona como día flexible.

FLEX FRIDAY

La cena puede utilizar:

- leftovers;
- ramen;
- dumplings;
- arroz con atún;
- sopa;
- quesadillas;
- sandwiches;
- bowls;
- ingredientes abiertos;
- comida que necesite utilizarse pronto.

No es obligatorio cocinar una unidad nueva.

---

7. SÁBADO

Normalmente:

EAT OUT DAY

No se programa una unidad de proteína.

No se requiere meal prep específico.

Esto crea un descanso real del sistema de cocina semanal.

---

8. CONSUMO SEMANAL BASE

Una semana normal utiliza aproximadamente:

Día	Unidad
Domingo almuerzo	1
Lunes cena	1
Martes cena	1
Miércoles cena	1
Jueves cena	1
TOTAL	**5 unidades**

Por lo tanto:

4 semanas normales

5 × 4 = **20 unidades**

Las unidades restantes del stock objetivo sirven como:

- buffer;
- semanas más largas;
- invitados;
- comidas familiares;
- cambios de planes;
- reemplazos;
- semanas en las que se cocina más;
- inicio del siguiente ciclo.

No existe obligación de vaciar el freezer antes de comenzar un nuevo mes.

---

9. DESAYUNO

El desayuno se planifica diariamente para:

2 personas.

Debe existir una rotación definida para evitar decidir desde cero cada mañana.

La base del desayuno busca combinar:

1. Proteína

Ejemplos:

- huevos;
- cottage cheese;
- Greek yogurt;
- kéfir;
- proteína en polvo;
- pavo;
- queso.

2. Fibra / fruta / vegetal

Ejemplos:

- berries;
- banano;
- aguacate;
- hongos;
- vegetales;
- frijoles;
- chía.

3. Carbohidrato

Ejemplos:

- gallo pinto;
- avena;

- pan;
- tortilla;
- papa;
- fruta.

4. Grasa o complemento

Ejemplos:

- aguacate;
- nueces;
- semillas;
- peanut butter;
- queso.

El carbohidrato no necesita eliminarse; se combina con los demás componentes del desayuno.

Cuando sea útil, la misma receta tendrá:

BASE PARA DOS

y una pequeña nota:

TITA — PCOS-FRIENDLY ADJUSTMENT

sin convertir el desayuno de Alonso en una comida completamente distinta.

---

10. MENU PLANNING

El menú semanal se completa:

CADA DOMINGO

Lugar:

Google Sheets

El menú contiene estructuras de comida.

Ejemplo:

Chicken Teriyaki + arroz + brócoli

No contiene la receta completa.

Las instrucciones detalladas pertenecen al:

Recipe Library.

---

11. ORDEN PARA CREAR EL MENÚ

PASO 1 — REVISAR REFRIGERATOR

Buscar primero:

- leftovers;
- vegetales próximos a deteriorarse;
- frutas maduras;
- lácteos abiertos;
- ingredientes descongelados;
- productos que deben consumirse pronto.

Estos reciben prioridad.

PASO 2 — REVISAR FREEZER

Contar:

- unidades de pollo;
- unidades de cerdo;
- unidades de res;
- seafood;
- vegetales;
- papas;
- frutas;
- flavor cubes;
- breakfast prep.

PASO 3 — REVISAR PANTRY

Confirmar:

- arroz;
- frijoles;
- lentejas;
- garbanzos;
- pasta;
- quinoa;
- tortillas;
- avena;
- atún enlatado;
- condimentos;
- ingredientes básicos.

PASO 4 — APLICAR ROTACIÓN

Utilizar como default:

Domingo → Special Meal
Lunes → Pollo
Martes → Res
Miércoles → Cerdo
Jueves → Pollo
Viernes → Flex
Sábado → Eat Out

La rotación organiza el sistema.

No es una regla que impida intercambiar días cuando sea necesario.

---

12. CONSTRUIR CADA COMIDA

Utilizar el siguiente orden:

1. PROTEÍNA

Parte principal.

2. VEGETAL / FIBRA

Agregar volumen, variedad y acompañamiento.

3. CARBOHIDRATO

Agregar una fuente apropiada para la preparación.

4. GRASA / COMPLEMENTO

Ejemplos:

- aguacate;
- aceite de oliva;
- queso;

- olivas;
- semillas;
- nuts;
- dressing.

La Meal Combination Library contiene combinaciones prediseñadas para acelerar este proceso.

---

13. LISTA DE COMPRAS

La lista se mantiene en:

APPLE REMINDERS

No se crea desde cero cada semana.

Funciona como una lista activa.

Cuando algo:

- se termina;
- está por terminarse;
- debe reponerse;
- o será necesario para una receta próxima;

se agrega inmediatamente.

El domingo, durante el meal planning, se revisa la lista y únicamente se agregan los faltantes del menú.

---

14. NIGHT-BEFORE SYSTEM

Cada noche:

1. Revisar el menú del día siguiente.
2. Identificar la proteína necesaria.
3. Pasarla del freezer al refrigerator.
4. Revisar acompañamientos.
5. Confirmar vegetales.
6. Confirmar carbohidrato.
7. Revisar cualquier ingrediente especial.
8. Agregar faltantes a Reminders.

La idea es que al día siguiente la decisión ya esté tomada.

---

15. COOK → SERVE → PACK

Cuando se cocina una unidad:

COOK

Preparar:

1 unidad = 4 platos.

SERVE

Separar:

2 platos → comida actual.

PACK

Separar inmediatamente:

2 platos → comida del día siguiente.

No esperar a terminar de comer para decidir si “sobró”.

El almuerzo del día siguiente forma parte de la unidad desde el principio.

---

16. DAILY RESET

Después de cocinar:

1. Guardar el almuerzo siguiente.
2. Guardar ingredientes abiertos.
3. Limpiar la cocina.
4. Revisar el menú siguiente.
5. Pasar la proteína necesaria al refrigerator.
6. Revisar si falta algún ingrediente.
7. Actualizar Reminders.

Esto completa el ciclo diario.

---

17. MONTHLY PLANNING WORKFLOW

Antes de la compra mensual:

1. Contar todas las unidades existentes.
2. Identificar proteína sobrante.
3. Identificar categorías bajas.
4. Calcular:

25 − unidades existentes = unidades nuevas necesarias.

5. Revisar las cuatro opciones de seafood.
6. Crear la distribución de proteína.
7. Elegir cortes.
8. Elegir marinadas.
9. Comprar.
10. Procesar.
11. Etiquetar.

12. Congelar.
13. Actualizar inventario.

---

18. PRODUCE PLANNING

El sistema de frutas y vegetales utiliza dos frecuencias.

MONTHLY

Una sesión para ingredientes destinados principalmente a congelación.

TWICE MONTHLY

Reposición y preparación de produce fresco.

Esto evita intentar conservar durante un mes ingredientes que naturalmente tienen una vida útil más corta.

---

19. RECIPE RULE

Antes de buscar una receta nueva:

1.

Revisar el Recipe Library.

2.

Revisar Meal Combination Library.

3.

Revisar inventario.

4.

Buscar una receta nueva únicamente cuando realmente se quiera introducir algo diferente.

Si funciona y se quiere repetir:

entra al Recipe Library.

Si fue complicada, poco práctica o no gustó:

no entra.

---

20. RECIPE YIELD RULE

La receta estándar del Kitchen Manual utiliza:

1 UNIDAD = 4 PLATOS

Las excepciones son preparaciones cuyo rendimiento natural es mayor.

Ejemplos:

- olla de carne;
- pozole;
- sopas;
- lentejas;
- garbanzos;
- stews;
- preparaciones familiares.

En esos casos se documentará el rendimiento real.

Ejemplo:

Rendimiento: 6 platos

o

Rendimiento: 2 unidades / 8 platos

No se deformará una receta únicamente para obligarla a rendir cuatro platos.

PRINCIPIO CENTRAL

El inventario determina qué tenemos.

La rotación determina qué tipo de proteína utilizar.

La Meal Combination Library determina con qué acompañarla.

La Marinade Library determina el perfil de sabor.

El Recipe Library determina cómo cocinarla.

El menú semanal conecta todo.

El sistema existe para reducir decisiones y trabajo repetitivo.

No existe para obligar a consumir comida solamente porque fue planificada.

02. MASTER KITCHEN INVENTORY

OBJETIVO

El Master Kitchen Inventory define los alimentos que forman parte habitual del sistema de cocina.

No significa que todos deban comprarse cada semana ni que todos deban estar presentes permanentemente.

Su función es distinguir entre:

CORE STAPLES
Ingredientes que se utilizan constantemente y normalmente deben mantenerse disponibles.

ROTATION ITEMS
Ingredientes que forman parte del repertorio, pero se compran según el menú.

FRESH PRODUCE
Productos que se reponen aproximadamente dos veces al mes o según consumo real.

MONTHLY FREEZER STOCK
Ingredientes preparados o almacenados para varias semanas.

FLEX / SPECIAL ITEMS
Productos utilizados para snacks, cenas rápidas, recetas específicas o variedad.

El plan alimenticio original utiliza justamente un sistema cerrado de alimentos base para disminuir decisiones y mantener una alimentación consistente.

---

1. INVENTORY RULE

Antes de agregar cualquier alimento a la lista de compras:

PREGUNTAR

1. ¿Ya existe en freezer?
2. ¿Ya existe en refrigerator?
3. ¿Ya existe en pantry?
4. ¿Está incluido en el menú próximo?
5. ¿Realmente necesita reposición?

La lista de compras se utiliza para **reponer faltantes**, no para volver a comprar automáticamente todo el Master Inventory.

---

2. REORDER SYSTEM

MONTHLY

Principalmente:

- proteínas;
- seafood congelado;
- vegetales congelados;
- berries;

- frutas para smoothie;
- papas destinadas a freezer prep;
- yuca;
- arroz;
- frijoles;
- lentejas;
- garbanzos;
- pasta;
- quinoa;
- avena;
- condimentos;
- freezer bags;
- ingredientes de pantry de larga duración.

TWICE MONTHLY

Principalmente:

- vegetales frescos;
- frutas frescas;
- hierbas;
- huevos;
- lácteos;
- pan;
- tortillas;
- productos de desayuno;
- snacks refrigerados.

CONTINUOUS / AS NEEDED

Se agrega a Apple Reminders inmediatamente cuando:

- se termina;
- queda cantidad insuficiente para otra preparación;
- está programado en el menú;
- o se detecta que no llegará hasta la siguiente compra.

No es necesario esperar al día oficial de compras para agregarlo a la lista.

---

3. FREEZER — PROTEIN CORE

El freezer debe mantener aproximadamente:

25 UNIDADES DE PROTEÍNA

La distribución objetivo está definida en la Sección 01.

Categoría	Stock objetivo
Pollo	10 unidades
Cerdo	6 unidades
Res	5 unidades

Categoría	Stock objetivo
Seafood	4 unidades
TOTAL	**25 unidades**

Las cantidades específicas por corte se documentan en:

03. Monthly Protein Prep

---

4. FREEZER — SEAFOOD CORE

Mantener disponibilidad para aproximadamente una preparación de seafood por semana.

ROTACIÓN PRINCIPAL

Salmón

Preferiblemente filetes o un filete grande dividido correctamente.

Tuna Steak

Atún fresco o congelado en steak.

No confundir con atún enlatado.

Tilapia

Filetes congelados.

Camarones

Pelados o según la presentación preferida.

El plan alimenticio incluye salmón, tilapia y camarones dentro de sus fuentes habituales de proteína.

---

5. FREEZER — VEGETABLE CORE

Mantener habitualmente:

- brócoli;
- coliflor;
- vainicas;
- maíz;
- arvejas / green peas;
- mezcla de peas + zanahoria para arroz.

Cuando se compren frescos para procesar en casa, pueden agregarse:

- brócoli blanqueado;
- coliflor blanqueada;
- zanahoria;
- espárragos;
- remolacha;
- chayote;
- hongos previamente salteados.

Estos ingredientes forman parte del repertorio habitual de vegetales del plan alimenticio.

---

6. FREEZER — COOKING BASES

Mantener según disponibilidad:

Onion Prep

- cubitos pequeños;
- cubos grandes;
- juliana.

Bell Pepper Prep

- cubitos;
- juliana.

Green Onion

Picado.

Garlic Cubes

Ajo procesado con pequeña cantidad de aceite.

Cilantro Base

Picado o licuado.

Celery Base

Licuado.

Pesto Cubes

Mixed Sofrito / Vegetable Base

Estas bases existen para eliminar trabajo repetitivo durante la semana.

---

7. FREEZER — POTATO & ROOT PREP

Mantener según preparación mensual:

Breakfast Potato Cubes

Para:

- breakfast bowls;
- burritos;
- acompañamientos.

Homemade Freezer Fries

Para:

- air fryer;

- horno.

Mashed Potato Portions

Cuando se haya preparado una tanda.

Yuca

Pelada, cortada y congelada.

---

8. FREEZER — FRUIT CORE

Principalmente para smoothies.

Mantener según consumo:

- fresas;
- arándanos;
- moras;
- banano;
- piña.

El plan alimenticio incluye berries, banano, piña y otras frutas dentro de su sistema base.

---

9. REFRIGERATOR — FRESH VEGETABLE CORE

PRIORIDAD ALTA

Estos son los vegetales que se utilizan con mayor frecuencia y deben considerarse durante cada reposición:

- cebolla blanca/amarilla;
- cebolla morada;
- chile dulce;
- ajo;
- tomate;
- pepino;
- zanahoria;
- repollo;
- espinaca baby;
- lechuga;
- culantro;
- apio.

ROTATION PRODUCE

Comprar según menú:

- espárragos;
- chayote;
- remolacha;
- hongos;

- cebollín;
- vainicas frescas;
- otros vegetales estacionales.

El plan base incluye cebolla, chile dulce, zanahoria, repollo, ajo, apio, hongos, chayote, espinaca, lechuga, pepino, espárragos, remolacha, cebollín y tomate.

---

10. REFRIGERATOR — FRESH FRUIT CORE

HABITUAL

- banano;
- mango;
- naranja;
- mandarina;
- uvas verdes;
- limones.

ROTATION

- papaya;
- manzana;
- pera;
- piña fresca;
- otras frutas según temporada.

BERRIES

Pueden mantenerse frescas cuando se consumirán pronto, pero gran parte del stock puede permanecer congelado para smoothies.

---

11. REFRIGERATOR — PROTEIN & BREAKFAST CORE

Mantener regularmente:

Huevos

Uno de los principales staples de desayuno.

Cottage Cheese

Para desayunos y snacks.

Greek Yogurt / Yogurt Natural

Para:

- desayunos;
- smoothies;
- snacks;
- recetas.

Kéfir

Principalmente para smoothies y desayunos.

Turkey Deli Meat

Para:

- breakfast burritos;
- quesadillas;

- sandwiches;
- snacks.

Cheese

Mantener una selección moderada según consumo.

Ejemplos:

- cheddar;
- mozzarella;
- parmesan;
- feta;
- manchego;
- gouda;
- Babybel.

El plan utiliza huevos, lácteos, queso y kéfir dentro de sus fuentes habituales de proteína y grasa.

---

12. REFRIGERATOR — HEALTHY FAT CORE

Mantener según consumo:

- aguacate;
- aceite de oliva;
- aceite de aguacate;
- olivas;
- mantequilla de maní sin azúcar;
- mantequilla de almendra sin azúcar;
- chía;
- nueces;
- almendras.

Estas grasas aparecen directamente dentro del sistema alimenticio base.

---

13. PANTRY — CARBOHYDRATE CORE

Mantener normalmente:

Rice

Principalmente arroz blanco.

Beans

Principalmente frijoles negros.

Lentils

Chickpeas

Quinoa

Pasta

Preferiblemente mantener al menos una pasta versátil disponible.

Oats

Tortillas

Bread

Preferiblemente una opción integral cuando corresponda.

Potatoes

Parte se conserva fresca y parte se procesa.

Yuca

Puede manejarse fresca o congelada.

El plan base incluye arroz, frijoles, legumbres, papa, yuca, avena, quinoa, pasta y pan/tortillas.

---

14. PANTRY — QUICK PROTEINS

CANNED TUNA

Mantener latas disponibles.

Uso principal:

- arroz con atún;
- sandwiches;
- snacks;
- bowls rápidos.

Atún enlatado ≠ Tuna Steak.

Son dos ingredientes diferentes dentro del sistema.

OTHER OPTIONAL QUICK PROTEINS

Según menú o consumo:

- canned salmon;
- deli turkey;
- salami sin azúcar;
- smoked salmon.

Estos alimentos funcionan principalmente como flex meals o snacks, no como sustitutos del stock mensual principal de proteínas.

---

15. PANTRY — COOKING ESSENTIALS

Mantener disponibles:

- sal;
- pimienta;
- ajo en polvo;
- cebolla en polvo;
- paprika;
- paprika ahumada;
- comino;
- chile en polvo;
- orégano;
- Italian seasoning;
- tomillo;
- jengibre;
- nuez moscada;
- maicena;
- harina;
- aceite;
- vinagre blanco;
- vinagre de manzana;
- vinagre de arroz;
- balsámico;
- mostaza;
- tomato paste;
- ketchup sin azúcar cuando se utilice;
- Salsa Lizano;
- salsa de soya / tamari;
- Lakanto u otro endulzante utilizado en casa.

Estos ingredientes permiten ejecutar la Marinade Library sin tener que comprar condimentos especiales cada semana.

---

16. ASIAN / SPECIALTY CORE

Mantener según frecuencia de uso:

- soy sauce;
- rice vinegar;
- sesame seeds;
- sesame oil;
- ginger;
- kimchi;
- ramen;
- dumplings;
- fish cake cuando se planee tteokbokki;
- anchovies para broth cuando corresponda;

- tteok / rice cakes cuando se planee tteokbokki.

No todos necesitan mantenerse permanentemente.

Se compran según consumo y menú.

---

17. BREAKFAST MASTER INVENTORY

El Breakfast System depende principalmente de mantener disponibles los siguientes grupos.

PROTEÍNAS

- huevos;
- cottage cheese;
- Greek yogurt;
- kéfir;
- protein powder;
- turkey/ham;
- cheese.

CARBOHYDRATOS

- arroz + frijoles para pinto;
- bread;
- tortillas;
- potatoes;
- oats;
- pancake ingredients.

FRUTA / FIBRA

- berries;
- banano;
- chía;
- aguacate;
- hongos;
- vegetales.

COMPLEMENTOS

- nuts;
- nut butter;
- cheese;
- milk;
- spices.

Mientras estos grupos estén disponibles, es posible producir la mayoría de los desayunos del sistema sin compras especiales.

---

18. SNACK MASTER INVENTORY

Los snacks son complementos.

No deben reemplazar sistemáticamente las comidas principales.

El plan original utiliza como regla que un snack funcional incluya al menos dos de estas tres categorías:

proteína · grasa · fibra.

Opciones incluidas en el plan:

PROTEIN / DAIRY

- cottage cheese;
- cured cheeses;
- Babybel;
- turkey deli meat;
- tuna in water;
- smoked salmon;
- salami sin azúcar.

CRUNCH / CARB / FIBER

- Harvest Snaps;
- Hippeas;
- Simple Mills crackers;
- Wasa crackers;
- rice cakes;
- low-carb tortillas;
- Ezekiel bread.

SWEET / FLEX

- dark chocolate;
- sugar-free chocolate;
- sugar-free pudding;
- applesauce;
- granola;
- Catalina Crunch;
- NuTrail;
- Purely Elizabeth;
- Cool Whip Zero.

Estas opciones aparecen en la lista de snacks del plan alimenticio.

---

19. FLEX DINNER INVENTORY

Para evitar que una noche cansada termine necesariamente en takeout, mantener algunos alimentos de preparación muy rápida.

Core options:

- ramen;
- dumplings;
- canned tuna;
- rice;
- tortillas;
- cheese;
- eggs;
- bread;
- soup ingredients;

- frozen vegetables.

Con estos ingredientes se pueden hacer:

- arroz con atún;
- quesadillas;
- sandwiches;
- ramen;
- eggdrop soup;
- bowls;
- dumplings;
- leftovers reforzados con vegetales.

---

20. SUNDAY SPECIAL INVENTORY

No necesita existir un inventario separado permanente.

Durante el meal planning se selecciona una preparación especial para el domingo.

Ejemplos:

- New York steak;
- salmon;
- tuna steak;
- shrimp;
- hamburgers;
- alguna comida especial del Recipe Library.

Si requiere un ingrediente fuera del Master Inventory:

se agrega a Reminders.

---

21. MASTER INVENTORY PRIORITY

Cuando el presupuesto, espacio o tiempo sean limitados, priorizar en este orden:

PRIORIDAD 1 — MEAL FOUNDATION

- proteínas;
- huevos;
- arroz;
- frijoles;
- vegetales;
- frutas;
- grasas básicas.

PRIORIDAD 2 — BREAKFAST

- cottage cheese;
- kéfir/yogurt;
- bread/tortillas;
- berries;
- breakfast potatoes.

PRIORIDAD 3 — FLAVOR

- marinades;
- sauces;
- herbs;
- condiments.

PRIORIDAD 4 — FLEX FOOD

- ramen;
- dumplings;
- canned tuna;
- quick soup ingredients.

PRIORIDAD 5 — SNACKS

Comprar variedad suficiente para hacer el sistema agradable, pero no reemplazar comida base con un pantry lleno de snacks.

---

22. “ADD TO REMINDERS” RULE

Agregar un ingrediente a Apple Reminders cuando ocurra cualquiera de estas situaciones:

CORE STAPLE

Queda menos de lo necesario para otra preparación normal.

MENU ITEM

Será necesario durante la semana y no existe suficiente cantidad.

FRESH PRODUCE

No llegará en buenas condiciones hasta la siguiente reposición.

FREEZER ITEM

Se utiliza la última unidad o queda por debajo del nivel deseado.

SPECIAL ITEM

Una receta futura lo requiere.

---

23. DO NOT AUTO-RESTOCK

No todos los productos del Master Inventory necesitan reponerse inmediatamente.

Ejemplos:

- snacks especiales;
- condimentos poco utilizados;
- ingredientes asiáticos;
- quesos específicos;
- frutas ocasionales;

- productos utilizados en una única receta.

Si no existe una necesidad real:

no se compra solamente porque aparece en este manual.

---

24. MASTER INVENTORY CHECK

Durante cada planificación semanal:

REFRIGERATOR → qué está abierto
→ qué vence primero
→ qué produce debe consumirse

FREEZER → cuántas unidades quedan
→ qué vegetales/preps quedan
→ qué necesita rotación

PANTRY → qué staple está bajo
→ qué se necesita para el menú

REMINDERS → confirmar faltantes

PRINCIPIO CENTRAL

El Master Inventory no es una lista de compras gigantes.

Es el mapa de los alimentos que hacen funcionar la cocina.

El inventario define las posibilidades.

El menú define lo que realmente se compra.

Reminders captura lo que falta.

El freezer evita empezar desde cero cada día.

03. MONTHLY PROTEIN PREP

OBJETIVO

Preparar, porcionar, marinar y congelar las proteínas principales del mes para mantener un freezer organizado y reducir el trabajo diario.

La sesión mensual no significa comprar 25 unidades nuevas cada vez.

La regla es:

STOCK OBJETIVO = 25 UNIDADES

Antes de comprar:

25 − unidades existentes = unidades nuevas necesarias

Ejemplo:

Si quedan 6 unidades en el freezer:

25 − 6 = 19 unidades nuevas

Solo se compran y procesan las 19 necesarias.

---

1. SISTEMA OFICIAL

1 PORCIÓN

2 platos

- 1 para Tita
- 1 para Alonso

1 UNIDAD

2 porciones = 4 platos

Normalmente:

- 2 platos → comida actual
- 2 platos → almuerzo siguiente

REGLA DE EMPAQUE

Siempre que sea práctico:

1 FREEZER BAG = 1 UNIDAD

Esto hace que sacar una bolsa del freezer equivalga directamente a resolver una comida + el almuerzo siguiente.

---

2. STOCK OBJETIVO EXACTO

Categoría	Unidades	Platos
Pollo	10	40
Cerdo	6	24
Res	5	20
Seafood	4	16
TOTAL	**25**	**100**

Estas son **metas de inventario**, no una obligación de consumir 100 platos durante el mes.

---

3. DISTRIBUCIÓN EXACTA — POLLO

10 UNIDADES

Corte	Unidades
Filetes de pechuga	6
Trocitos de pechuga	2
Pollo con hueso	2
TOTAL	**10**

A. FILETES DE PECHUGA

Meta

6 unidades

Preparar suficientes filetes para:

24 platos

Procedimiento:

1. Separar las pechugas.
2. Retirar únicamente grasa o tejido no deseado.
3. Cortar filetes de grosor relativamente uniforme.
4. Aprovechar los recortes para la categoría de trocitos.
5. Dividir en **6 grupos de 1 unidad**.
6. Marinar algunos grupos según el plan mensual.
7. Dejar algunos neutros si se desea mayor flexibilidad.
8. Empacar y congelar.

Usos

- teriyaki;
- mostaza-miel;
- BBQ;
- italiana;
- Lizano;
- culantro-limón;
- queso;
- chicken curry;
- chicken bowls;
- pasta;
- pollo empanizado;

- otras recetas del Recipe Library.

---

4. CHICKEN CHUNKS

Meta

2 unidades

Los trocitos provienen principalmente de:

- recortes de pechuga;
- partes irregulares;
- pechugas destinadas específicamente a preparaciones en cubitos.

Preparar:

2 bolsas de 1 unidad cada una.

Usos frecuentes:

- chicken curry;
- fajitas;
- bowls;
- tortellini;
- pasta;
- tacos;
- preparaciones mexicanas;
- stir-fries.

Los trocitos pueden congelarse:

- marinados;
- o completamente neutros.

---

5. BONE-IN CHICKEN

Meta

2 unidades

Referencia habitual:

4 piezas = 1 porción

Por lo tanto:

1 unidad ≈ 8 piezas

ajustando cuando las piezas sean especialmente grandes o pequeñas.

Preparar:

2 unidades

para un total aproximado de:

16 piezas.

Usos:

- pollo sudado;
- pollo al horno;
- muslos/encuentros herbs;
- preparaciones en olla;
- comidas familiares.

---

6. DISTRIBUCIÓN EXACTA — CERDO

6 UNIDADES

Corte	Unidades
Chuletas	3
Pork shoulder en trocitos	2
Cerdo molido	1
TOTAL	**6**

7. PORK CHOPS

Meta

3 unidades

Equivale a:

12 platos.

El número físico de chuletas por bolsa dependerá del tamaño.

El objetivo no es una cantidad fija de piezas sino suficiente carne para producir:

4 platos por unidad.

Empacar:

- 3 bolsas;
- 1 unidad por bolsa.

Pueden mantenerse:

- neutras;
- Mostaza-Miel;
- Lizano;
- BBQ;
- italiana;
- culantro-limón.

---

8. PORK SHOULDER / PALETA

Meta

2 unidades en trocitos

Seleccionar una pieza económica de pork shoulder.

Procedimiento:

1. Retirar únicamente exceso de grasa no deseado.
2. Reservar grasa útil cuando corresponda.
3. Cortar parte de la carne en trozos uniformes.
4. Crear:

2 unidades de pork chunks.

Usos:

- cerdo con frijoles;
- garbanzos con cerdo;
- cerdo con legumbres;
- carne en salsa;
- Hawaiian pork;
- guisos.

---

9. GROUND PORK

Meta

1 unidad

Moler una cantidad moderada de pork shoulder.

No se necesita mantener una cantidad excesiva porque el cerdo molido tiene menos usos recurrentes que los trocitos y las chuletas.

Uso principal:

- albóndigas;
- bowls;
- dumpling-style fillings;
- recetas especiales.

Congelar:

SIN MARINAR

El seasoning se agrega según la receta.

---

10. PORK RIBS

Las costillas **no forman parte de las 6 unidades mensuales regulares**.

Compra:

aproximadamente cada varios meses o cuando se planee una comida familiar.

Se consideran:

SPECIAL / FAMILY PURCHASE

No deben desplazar automáticamente el stock regular a menos que específicamente se decida utilizarlas durante ese mes.

---

11. DISTRIBUCIÓN EXACTA — RES

5 UNIDADES

Corte / preparación	Unidades
Thin-cut bistec	1
Res en cubitos	1
Molida para hamburguesa	1
Molida magra	1
New York Steak	1
TOTAL	**5**

Esta distribución mantiene cinco usos claramente diferentes sin llenar el freezer con demasiadas variaciones del mismo corte.

---

12. ECONOMICAL BEEF CUT

Para la preparación mensual no es obligatorio comprar brisket.

La regla correcta es:

PIEZA GRANDE Y ECONÓMICA DE RES

Elegir un corte apropiado según:

- precio;
- oferta;
- cantidad de grasa;
- textura;
- disponibilidad;
- usos previstos.

La pieza se utiliza principalmente para:

- carne molida;
- cubitos;
- otras preparaciones de cocción apropiada.

No comprar un corte caro solamente porque aparezca un nombre específico en el manual.

---

13. THIN-CUT BISTEC

Meta

1 unidad

Congelar preferiblemente:

ENTERO

Esto mantiene mayor flexibilidad.

Después de descongelar puede utilizarse:

Entero

Para:

- bistec encebollado;
- bistec con arroz y frijoles.

En tiras

Cortar después de descongelar para:

- beef & broccoli;
- fajitas;
- tacos;
- stir-fries.

Esta estrategia evita mantener dos unidades separadas de prácticamente el mismo corte.

---

14. BEEF CUBES

Meta

1 unidad

Cortar en cubitos relativamente uniformes.

Usos:

- carne en salsa;
- carne con papas;
- carne en salsa con hongos;
- beef stew;
- guisos.

Congelar:

SIN MARINAR

para conservar máxima flexibilidad.

---

15. GROUND BEEF — BURGER BLEND

Meta

1 unidad

Cuando se procesa una pieza grande de res:

1. Separar grasa aprovechable.
2. Moler carne.
3. Agregar una cantidad apropiada de grasa para producir una mezcla adecuada para hamburguesas.

Uso principal:

- hamburguesas.

También puede utilizarse en otras recetas donde una molida menos magra sea apropiada.

Congelar:

SIN MARINAR

---

16. LEAN GROUND BEEF

Meta

1 unidad

Moler carne:

SIN AÑADIR GRASA EXTRA

Usos:

- burritos;
- tacos;
- bowls;
- pasta;
- papas rellenas;
- Mexican ground beef;
- Italian ground beef.

Congelar:

SIN MARINAR

17. NEW YORK STEAK

Meta

1 unidad

Compra habitual:

4 steaks

Esto corresponde perfectamente a:

- 2 steaks → comida especial;
- 2 steaks → almuerzo siguiente.

Por lo tanto:

4 NEW YORK STEAKS = 1 UNIDAD

Uso principal:

Sunday Special Meal

No marinar por default.

Seasoning preferido:

- sal;
- pimienta;
- otros condimentos al cocinar si se desea.

---

18. DISTRIBUCIÓN EXACTA — SEAFOOD

4 UNIDADES

Una opción principal diferente por semana.

Seafood	Unidades
Salmón	1
Tuna steak	1
Tilapia	1
Camarones	1
TOTAL	**4**

19. SALMON

Meta

1 unidad

Si se compra un filete grande:

1. Dividir en cantidad suficiente para 4 platos.
2. Empacar.
3. Congelar.

Normalmente:

NO MARINAR DURANTE MONTHLY PREP

El salmón se sazona o marina cerca del momento de cocinar.

Preparación frecuente:

- Salmon Teriyaki.

---

20. TUNA STEAK

Meta

1 unidad

Este producto es:

FRESH/FROZEN TUNA STEAK

No es atún enlatado.

Preparar suficiente para:

4 platos.

Mantener congelado y marinar cerca del momento de cocinar.

Preparación principal:

- tuna steak con soya;
- bowls;
- Sunday Special.

---

21. TILAPIA

Meta

1 unidad

Puede existir una bolsa grande con muchos filetes.

No confundir:

1 BAG ≠ 1 UNIT

Se cuenta la cantidad real de comida disponible dentro de la bolsa.

Separar mentalmente o físicamente suficiente tilapia para:

1 unidad = 4 platos

dentro del objetivo mensual.

El excedente sigue formando parte del inventario y debe contarse antes de comprar más el mes siguiente.

Preparaciones:

- empanizada;
- frita;
- al ajillo.

---

22. SHRIMP

Meta

1 unidad

Mantener suficiente camarón para:

4 platos.

Preparaciones:

- tacos;
- bowls;
- garlic shrimp;
- Sunday Special.

No marinar con limón durante periodos prolongados.

---

23. SEAFOOD INVENTORY RULE

Seafood puede venir en bolsas o paquetes que contienen más de una unidad.

Por lo tanto:

CONTAR COMIDA, NO PAQUETES

Ejemplo:

Una bolsa de camarones puede contener:

2.5 unidades

aunque físicamente sea una sola bolsa.

Registrar el equivalente real aproximado.

---

24. MARINADE STRATEGY

No todas las proteínas deben congelarse marinadas.

La mejor estrategia es combinar:

PRE-MARINATED

Para reducir trabajo.

NEUTRAL

Para mantener flexibilidad.

Pollo

La mayoría de marinadas funcionan muy bien durante freezer prep.

Cerdo

Varias unidades pueden congelarse marinadas.

Res

Normalmente:

SIN MARINAR

Ground Meat

Siempre:

SIN MARINAR

Seafood

Normalmente:

MARINAR CERCA DE LA COCCIÓN

---

25. SUGGESTED CHICKEN MARINADE DISTRIBUTION

Para las 10 unidades de pollo, una distribución práctica es:

6 FILET UNITS

- 4 marinadas;
- 2 neutras.

2 CHUNK UNITS

- 1 marinada;
- 1 neutra.

2 BONE-IN UNITS

- 1 Herbs;
- 1 BBQ u otra preparación elegida.

Esto significa que aproximadamente:

6 de las 10 unidades

pueden salir del freezer con el sabor prácticamente resuelto.

Las marinadas exactas pueden cambiar cada mes.

---

26. SUGGESTED PORK MARINADE DISTRIBUTION

3 CHOP UNITS

- 2 marinadas;
- 1 neutra.

2 CHUNK UNITS

- 1 marinada;
- 1 neutra.

1 GROUND PORK

- neutra.

Esto permite variedad sin eliminar la posibilidad de utilizar una receta diferente.

---

27. MARINADE ROTATION

No es necesario utilizar todas las marinadas todos los meses.

Seleccionar aproximadamente:

4–6 FLAVORS POR MES

de la Marinade Library.

Ejemplos:

MES A

- Teriyaki
- Mostaza-Miel
- Mexicana
- Lizano
- BBQ

MES B

- Queso
- Culantro-Limón
- Italiana
- Hawaiian
- Teriyaki

Esto evita llenar el freezer con demasiados sabores distintos y simplifica la sesión de prep.

---

28. EQUIPMENT & SUPPLIES

DISPONIBLE

- ☒ Molino de carne
- ☒ Licuadora Ninja
- ☒ Bowl grande
- ☒ Masking tape para etiquetar

COMPRAR / MANTENER

- ☐ Tabla plástica grande, antideslizante, apta para dishwasher y exclusiva para carnes
- ☐ Extra-large food-grade silicone counter mat
- ☐ Bandeja plástica grande lavable para meat prep
- ☐ Ziploc Freezer — quart
- ☐ Ziploc Freezer — gallon
- ☐ Guantes desechables de nitrilo, sin polvo y food-safe
- ☐ Set de cuchillos afilados
- ☐ Marcador permanente
- ☐ Báscula digital de cocina — opcional pero útil

---

29. PREP WORKSTATION

Antes de comenzar:

SOBRE KARLBY

Colocar:

extra-large silicone counter mat

Encima:

tabla plástica exclusiva para carnes

El silicone mat funciona como containment layer para:

- jugos;
- bolsas;
- bowls;
- molino;
- packaging;
- marinadas.

No cortar directamente sobre el silicone mat.

30. PREPARATION ORDER

Orden habitual:

BEEF → PORK → CHICKEN

Este orden es únicamente organizativo.

No sustituye limpieza y sanitización entre proteínas.

Procedimiento

1. Limpiar y despejar la cocina.
2. Colocar silicone mat.
3. Preparar tabla, cuchillos y bowls.
4. Preparar bolsas.
5. Preparar etiquetas.
6. Mantener carnes en refrigerator.
7. Sacar solamente una tanda a la vez.
8. Procesar res.
9. Limpiar y sanitizar.
10. Procesar cerdo.
11. Limpiar y sanitizar.
12. Procesar pollo.
13. Limpiar y sanitizar.
14. Preparar marinadas.
15. Empacar.
16. Etiquetar.
17. Congelar inmediatamente.
18. Realizar Meat Prep Cleanup.

31. KEEP IT COLD RULE

No sacar toda la carne al countertop simultáneamente.

Trabajar:

POR TANDAS PEQUEÑAS

Mientras una proteína se procesa:

el resto permanece refrigerado.

Esto también hace la sesión menos caótica y reduce el espacio necesario.

32. BAGGING SYSTEM

Siempre que sea posible:

QUART FREEZER BAG

Usar para unidades compactas.

GALLON FREEZER BAG

Usar cuando:

- hay huesos;
- piezas grandes;
- la unidad no cabe cómodamente en quart.

Eliminar exceso de aire.

Aplanar cuando sea apropiado para:

- congelación rápida;
- descongelación más uniforme;
- mejor organización.

---

33. LABELING SYSTEM

Cada paquete debe indicar:

PROTEÍNA

Chicken / Pork / Beef / Seafood

CUT

Filets / Chunks / Chops / Ground / etc.

MARINADE

Si corresponde.

QUANTITY

1 UNIT

DATE

Fecha de preparación.

STATE

RAW

Ejemplo:

CHICKEN — FILETS
TERIYAKI
1 UNIT / 4 PLATES
04 NOV 2026
RAW

34. NEUTRAL LABEL

Si no tiene marinada:

Ejemplo:

BEEF — CUBES
UNSEASONED
1 UNIT / 4 PLATES
04 NOV 2026
RAW

Esto elimina cualquier duda al revisar el freezer.

---

35. FREEZER INVENTORY UPDATE

Después de terminar el prep:

registrar:

Categoría	Meta	Disponible
Pollo	10	___
Cerdo	6	___
Res	5	___
Seafood	4	___
TOTAL	**25**	___

No contar únicamente bolsas.

Contar:

UNIT EQUIVALENTS

especialmente en seafood y paquetes grandes.

---

36. FIRST IN, FIRST OUT

Organizar cada categoría:

FRONT

Más antiguo.

BACK

Más reciente.

Utilizar primero las unidades de fecha más antigua cuando sea razonable.

---

37. THAWING

La noche anterior:

1. Revisar menú.
2. Elegir unidad.
3. Pasar del freezer al refrigerator.
4. Mantener dentro de una bandeja o recipiente si existe posibilidad de fuga.

Nunca descongelar rutinariamente:

- sobre KARLBY;
- en countertop;
- a temperatura ambiente.

---

38. ACIDIC MARINADES

Algunas marinadas contienen:

- limón;
- vinagre;
- piña.

La congelación detiene gran parte de la actividad mientras permanece congelada.

Pero después de descongelar:

NO DEJAR LA CARNE OLVIDADA VARIOS DÍAS

Especialmente:

Lizano + limón

Cocinar el mismo día una vez descongelada.

Culantro + limón

Cocinar pronto.

Hawaiian

Cocinar aproximadamente dentro de 24 horas.

Las reglas específicas aparecen en:

06. Marinades, Seasonings & Flavor Bases

---

39. RAW MARINADE RULE

Una marinada que estuvo en contacto con carne cruda:

NO SE UTILIZA DIRECTAMENTE COMO SALSA

Si una receta necesita salsa adicional:

- preparar una porción limpia aparte;
- o cocinar adecuadamente según la receta específica.

Nunca asumir marinada está lista para comer.

---

40. MEAT PREP FOOD SAFETY

- Mantener refrigerator a **40°F / 4°C o menos**.
- Mantener freezer a **0°F / -18°C o menos**.
- No lavar carne cruda bajo el faucet.
- Evitar contacto entre carne cruda y alimentos listos para comer.
- Cambiar guantes cuando estén contaminados o al cambiar de tarea.
- Los guantes no sustituyen lavado de manos.
- Lavar equipo antes de sanitizar.
- Sanitizer no sustituye cleaning.
- Limpiar inmediatamente fugas o derrames.
- Proteger KARLBY con el meat-prep workstation.
- No utilizar utensilios contaminados sobre comida lista para comer.

---

41. GRINDER PROCEDURE

Cuando se utilice el molino:

1. Mantener carne fría.
2. Cortar en piezas apropiadas para el molino.
3. Mantener piezas esperando en refrigerator.
4. Moler únicamente la cantidad necesaria.
5. Separar burger blend de lean ground meat.
6. Empacar rápidamente.
7. Desarmar molino.
8. Lavar completamente todas las piezas food-contact.
9. Sanitizar las piezas compatibles.
10. Secar completamente antes de guardar.

---

42. END-OF-SESSION CHECK

Antes de considerar terminado Monthly Protein Prep:

- ☐ 10 unidades de pollo o cantidad necesaria para completar la meta
- ☐ 6 unidades de cerdo o cantidad necesaria
- ☐ 5 unidades de res o cantidad necesaria
- ☐ 4 unidades de seafood o cantidad necesaria
- ☐ Todas las bolsas etiquetadas
- ☐ Todas las fechas visibles
- ☐ Marinadas identificadas

- ☐ Raw claramente indicado
- ☐ Freezer inventory actualizado
- ☐ Proteínas antiguas colocadas adelante
- ☐ Molino completamente limpio
- ☐ Tabla lavada y sanitizada
- ☐ Silicone mat lavado y sanitizado
- ☐ Sink limpio
- ☐ Handles contaminados limpiados
- ☐ KARLBY inspeccionado y seco

---

43. MONTHLY TARGET SHEET

CHICKEN — 10

- ☐ Filets 1
- ☐ Filets 2
- ☐ Filets 3
- ☐ Filets 4
- ☐ Filets 5
- ☐ Filets 6
- ☐ Chunks 1
- ☐ Chunks 2
- ☐ Bone-In 1
- ☐ Bone-In 2

PORK — 6

- ☐ Chops 1
- ☐ Chops 2
- ☐ Chops 3
- ☐ Chunks 1
- ☐ Chunks 2
- ☐ Ground Pork 1

BEEF — 5

- ☐ Thin-Cut Bistec 1
- ☐ Beef Cubes 1
- ☐ Burger Ground 1
- ☐ Lean Ground 1
- ☐ New York Steak 1

SEAFOOD — 4

- ☐ Salmon 1
- ☐ Tuna Steak 1
- ☐ Tilapia 1
- ☐ Shrimp 1

TOTAL = 25 UNITS

PRINCIPIO CENTRAL

Monthly Protein Prep no existe para llenar el freezer sin límite.

Existe para que durante el mes:

abrir freezer → escoger unidad → descongelar → cocinar

reemplace:

decidir proteína → comprar → cortar → marinar → limpiar → cocinar

cada noche.

El trabajo pesado se concentra en una sesión.

La comida se sigue cocinando fresca.

04. PRODUCE & INGREDIENT PREP

OBJETIVO

Preparar frutas, vegetales, aromáticos y bases de cocina de manera que los ingredientes más utilizados estén listos sin sacrificar innecesariamente:

- textura;
- sabor;
- seguridad;
- frescura;
- espacio en refrigerator y freezer.

A diferencia de las proteínas, **no todo el produce se prepara con la misma frecuencia**.

El sistema utiliza dos ciclos principales:

MONTHLY FREEZER PREP

Una sesión al mes para productos destinados a congelación.

TWICE-MONTHLY FRESH PREP

Aproximadamente dos veces al mes para productos que funcionan mejor frescos.

---

1. SISTEMA DE FRECUENCIAS

MONTHLY

Preparar principalmente:

- cebolla para congelar;
- chile dulce para congelar;
- ajo;
- cebollín;
- culantro congelado;
- apio base;
- pesto;
- mixed flavor bases;
- papas de desayuno;
- freezer fries;
- mashed potato portions;
- yuca;
- hongos destinados al freezer;
- vegetales frescos que se decida blanquear;
- frutas para smoothies.

TWICE MONTHLY

Comprar, revisar o reponer principalmente:

- lechuga;
- espinaca baby;
- pepino;
- tomate;
- repollo;
- aguacate;
- culantro fresco;
- perejil;
- apio fresco;
- cebolla morada;
- limones;
- frutas frescas;
- huevos y otros acompañamientos frescos cuando corresponda.

WEEKLY CHECK

Aunque la compra fresca sea aproximadamente dos veces al mes:

revisar semanalmente:

- madurez;
- humedad;
- moho;
- vegetales blandos;
- leftovers;
- fruta demasiado madura.

La revisión no implica comprar semanalmente.

---

2. PREPARATION WORKFLOW

1. Revisar refrigerator.
2. Revisar freezer.
3. Identificar produce que debe utilizarse primero.
4. Separar productos destinados a:
   - fresco;
   - congelación;
   - bases;
   - cocción.
5. Lavar según corresponda.
6. Cortar.
7. Blanquear o cocinar cuando sea necesario.
8. Enfriar rápidamente.
9. Secar correctamente.
10. Precongelar cuando corresponda.
11. Empacar.
12. Etiquetar.
13. Guardar.

14. Actualizar inventario.
15. Realizar Vegetable Prep Cleanup.

---

3. AROMATICS — CEBOLLA

CEBOLLA BLANCA / AMARILLA

Preparar tres cortes diferentes.

SMALL DICE

Uso:

- gallo pinto;
- frijoles arreglados;
- huevos;
- sofritos;
- fillings.

LARGE DICE

Uso:

- sopas;
- guisos;
- arroces;
- fondos.

JULIENNE

Uso:

- bistec encebollado;
- fajitas;
- stir-fries;
- salteados.

Procedimiento:

1. Pelar.
2. Cortar.
3. Separar por tipo de corte.
4. Precongelar si resulta útil para evitar bloques.
5. Guardar en bolsas diferentes.
6. Etiquetar.

No mezclar todos los cortes en una sola bolsa.

---

4. RED ONION

Meta habitual

Aproximadamente:

2 unidades frescas por ciclo mensual, ajustando por consumo.

Mantener:

FRESH

Uso principal:

- chimichurri;
- ensaladas;
- pico de gallo;
- toppings;
- encurtidos.

Cortar al momento cuando sea posible.

No es necesario congelarla como sistema principal.

---

5. BELL PEPPER / CHILE DULCE

Mantener:

FRESH

Al menos una cantidad pequeña disponible.

FROZEN

Preparar:

- cubitos;
- juliana.

Usos:

Cubitos

- arroz;
- huevos;
- sofritos;
- frijoles.

Juliana

- fajitas;
- stir-fries;
- bowls;
- bistec.

---

6. GARLIC PREP

El ajo puede procesarse en mayor cantidad durante Monthly Prep.

PROCEDIMIENTO

1. Separar dientes.
2. Pelar.
3. Revisar y desechar piezas dañadas.
4. Procesar en Ninja.
5. Agregar únicamente una pequeña cantidad de aceite necesaria para facilitar el procesamiento.
6. Distribuir en porciones pequeñas.
7. Congelar inmediatamente.

Puede utilizarse:

- silicone cube tray;
- porciones pequeñas en bolsa;
- recipiente freezer-safe.

FRESH GARLIC LIMIT

Si se guarda ajo procesado con aceite en refrigerator:

mantener únicamente una cantidad destinada a aproximadamente:

MÁXIMO 4 DÍAS

La mayor parte debe congelarse.

Nunca almacenar mezclas caseras de ajo + aceite a temperatura ambiente.

---

7. GREEN ONION / CEBOLLÍN

Mantener:

Una cantidad pequeña fresca

para:

- toppings;
- ramen;
- eggs;
- bowls.

Congelar el excedente:

1. Lavar.
2. Secar muy bien.
3. Picar.
4. Congelar.
5. Transferir a recipiente o bolsa.

---

8. CILANTRO

Utilizar dos sistemas.

FRESH CILANTRO

Para preparaciones donde importa más la frescura:

- pico de gallo;
- ensaladas;
- tacos;
- toppings;
- chimichurri-style sauces.

Conservar mediante:

FLOWER METHOD

Recortar ligeramente tallos y mantener de manera apropiada para prolongar frescura.

FROZEN CILANTRO

Para:

- arroz;
- frijoles;
- sopas;
- guisos;
- marinadas;
- salsas cocidas.

Puede congelarse:

PICADO

o

BLENDED BASE

---

9. PARSLEY

Mantener principalmente:

FRESH

Utilizar flower method.

Congelar excedentes únicamente cuando exista una cantidad que no se consumirá a tiempo.

---

10. CELERY

FRESH STORAGE

1. Separar tallos.
2. Lavar.
3. Secar muy bien.
4. Envolver apropiadamente en aluminio.
5. Refrigerar.

Revisar periódicamente que no exista humedad excesiva.

CELERY BASE

El excedente puede transformarse en base.

1. Lavar.
2. Cortar.
3. Licuar con pequeña cantidad de agua.
4. Dividir.
5. Congelar.

Uso:

- soups;
- stews;
- stocks;
- olla de carne.

---

11. VEGETALES COMPRADOS CONGELADOS

Productos habituales:

- brócoli;
- coliflor;
- vainicas;
- maíz;
- peas;
- peas + carrot mix.

Si fueron comprados:

FROZEN & READY TO COOK

no volver a blanquear.

Mantener congelados según las instrucciones del producto.

---

12. FRESH BROCCOLI — OPTIONAL FREEZER PREP

Cuando se quiera sustituir parte del brócoli comercial congelado por brócoli fresco:

1. Seleccionar brócoli firme.
2. Lavar.
3. Separar en floretes de aproximadamente 1½ pulgadas o menos.
4. Preparar una olla con agua hirviendo.

WATER BLANCH

3 minutos.

o

STEAM BLANCH

5 minutos.

Después:

5. Transferir inmediatamente a ice bath.
6. Enfriar.
7. Escurrir.
8. Secar.
9. Precongelar en bandeja.
10. Transferir a Freezer Bag.
11. Etiquetar.

---

13. FRESH CAULIFLOWER

Preparación opcional:

1. Separar en floretes de aproximadamente 1 pulgada.
2. Lavar.
3. Blanquear aproximadamente: **3 minutos.**
4. Ice bath.
5. Escurrir.
6. Secar.
7. Precongelar.
8. Empacar.

---

14. CARROTS

Dividir en dos destinos.

FRESH

Reservar para:

- ensaladas;
- snacks;
- slaw;

- acompañamientos.

FREEZER

Cortar:

- rodajas;
- cubitos;
- bastones.

Blanquear aproximadamente:

2 minutos

cuando estén cortadas.

Después:

1. Ice bath.
2. Escurrir.
3. Secar.
4. Precongelar.
5. Empacar.

---

15. MUSHROOMS

No congelar hongos crudos como sistema principal.

FRESH PORTION

Mantener una parte:

- en empaque ventilado;
- o paper bag apropiada.

Uso:

- omelettes;
- pasta;
- breakfast bowls;
- sauces.

FREEZER PORTION

1. Limpiar.
2. Cortar.
3. Saltear.
4. Cocinar hasta reducir buena parte de su humedad.
5. Enfriar completamente.
6. Dividir en porciones pequeñas.
7. Congelar.

Esto produce mejor textura que congelarlos crudos.

---

16. CHAYOTE

Compra:

OCCASIONAL

Preferencia:

utilizar fresco.

Si existe excedente destinado a guisos:

1. Pelar.
2. Cortar.
3. Blanquear aproximadamente 2 minutos.
4. Ice bath.
5. Secar.
6. Congelar.

Uso:

- picadillo;
- soups;
- stews.

---

17. ASPARAGUS

Preferencia:

BUY FRESH

Preparación:

1. Lavar.
2. Retirar bases duras.

Si se congelará:

Thin

2 minutos.

Medium

3 minutos.

Thick

4 minutos.

Después:

- ice bath;
- secar;
- precongelar;

- empacar.

18. BEETS / REMOLACHA

1. Lavar.
2. Cocinar hasta que estén tiernas.
3. Enfriar.
4. Pelar.
5. Cortar en cubitos.
6. Dividir en porciones.
7. Congelar.

Uso principal:

- ensaladas;
- sides;
- bowls.

19. PRODUCE THAT STAYS FRESH

Mantener principalmente en refrigerator:

- spinach baby;
- lettuce;
- cucumber;
- tomato;
- cabbage;
- avocado;
- lemons;
- olives.

No procesarlos únicamente por “hacer prep”.

Si un alimento conserva mejor calidad fresco:

KEEP IT FRESH

20. TOMATO RULE

Tomate destinado a:

- ensalada;
- pico;
- sandwich;
- fresh toppings;

se mantiene fresco.

Tomate puede congelarse cuando:

- se procesa en salsa;

- se utilizará posteriormente en preparación cocida.

No esperar textura de tomate fresco después de congelarlo.

---

21. LEMON RULE

Mantener:

REFRIGERATED

No requiere preparación mensual.

Utilizar fresco para:

- marinades;
- seafood;
- dressings;
- agua;
- toppings.

No exprimir todos los limones de antemano sin una necesidad concreta.

---

22. POTATO SYSTEM

La papa tiene cuatro destinos oficiales.

A. BREAKFAST POTATO CUBES

B. MASHED POTATO

C. FRESH POTATOES

D. HOMEMADE FREEZER FRIES

---

23. BREAKFAST POTATO CUBES

Uso:

- breakfast bowls;
- burritos;
- egg plates;
- sides.

Procedimiento:

1. Lavar.
2. Pelar si se desea.
3. Cortar en cubos uniformes.
4. Precocinar hasta parcialmente tiernos.
5. Enfriar rápidamente.
6. Escurrir.
7. Secar.
8. Colocar en bandeja.
9. Precongelar.
10. Transferir a Freezer Bag.

Etiquetar:

BREAKFAST POTATOES

---

24. MASHED POTATO PREP

1. Pelar.
2. Cortar.
3. Hervir hasta completamente suaves.
4. Escurrir.
5. Preparar puré.
6. Enfriar rápidamente.
7. Dividir en porciones apropiadas.
8. Guardar en:
   - bolsas planas;
   - o recipientes freezer-safe.
9. Congelar.

No es necesario preparar mashed potato todos los meses si no aparece en el menú.

---

25. FRESH POTATOES

Reservar una parte sin procesar.

Almacenar en lugar:

- fresco;
- oscuro;
- seco;
- ventilado.

No almacenar junto con exceso de humedad.

Usos:

- carne con papas;
- pollo con papas;
- soups;
- baked potato;
- Sunday meals.

26. HOMEMADE FREEZER FRIES

Objetivo:

Tener papas listas para cocinar directamente desde freezer.

CUT

Aproximadamente:

¼–⅜ inch

Buscar uniformidad.

PROCEDIMIENTO

1. Lavar.
2. Pelar si se desea.
3. Cortar.
4. Enjuagar para retirar almidón superficial.
5. Blanquear en agua hirviendo aproximadamente: **2 minutos.**
6. Ice bath.
7. Escurrir.
8. Secar MUY bien.
9. Mezclar con pequeña cantidad de aceite.
10. Extender en single layer.
11. Precongelar.
12. Transferir a Freezer Bag.

COOK FROM FROZEN

Air Fryer

Aproximadamente:

400°F

Comenzar a revisar entre:

12–20 minutos

dependiendo de:

- grosor;
- cantidad;
- modelo del air fryer.

Sacudir a mitad de cocción.

Ajustar después de probar la primera tanda.

---

27. YUCA

Preferencia:

BUY FRESH → PREP → FREEZE

1. Pelar.
2. Lavar.
3. Cortar en piezas.
4. Retirar partes fibrosas cuando corresponda.
5. Dividir.
6. Congelar.

Cocinar completamente antes de consumir.

---

28. FLAVOR CUBE SYSTEM

El freezer debe tener una pequeña zona dedicada a:

FLAVOR CUBES

Posibles bases:

- cilantro;
- celery;
- garlic;
- pesto;
- mixed sofrito.

Estas bases permiten agregar sabor sin repetir chopping y blending durante la semana.

---

29. CILANTRO BASE

1. Lavar.
2. Seleccionar hojas/tallos apropiados.
3. Escurrir.
4. Licuar con pequeña cantidad de agua.
5. Distribuir en moldes.
6. Congelar.
7. Transferir a recipiente.

Usos:

- arroz;
- beans;
- soups;
- sauces.

---

30. GARLIC CUBES

1. Pelar.
2. Procesar con pequeña cantidad de aceite.
3. Distribuir en moldes.
4. Congelar inmediatamente.
5. Transferir los cubos congelados a recipiente hermético.

Label:

GARLIC + OIL

---

31. PESTO CUBES

1. Preparar pesto.
2. Dividir en porciones pequeñas.
3. Congelar.
4. Transferir a recipiente.

Uso:

- pasta;
- chicken;
- sauces;
- vegetables.

---

32. MIXED VEGETABLE FLAVOR BASE

Utilizar únicamente vegetales:

FRESH & SAFE

No utilizar produce deteriorado como forma de “salvarlo”.

Procedimiento:

1. Seleccionar excedentes compatibles.
2. Lavar.
3. Cocinar o blanquear cuando corresponda.
4. Procesar.
5. Enfriar si fue cocinado.
6. Dividir.
7. Congelar.

Ejemplo de etiqueta:

MIXED SOFRITO BASE

---

33. FRUIT PREP — FREEZER

Frutas principales:

- strawberries;
- blueberries;
- blackberries;
- banana;
- pineapple.

PROCEDIMIENTO GENERAL

1. Lavar cuando corresponda.
2. Secar.
3. Pelar si es necesario.
4. Cortar.
5. Precongelar cuando ayude a evitar bloques.
6. Guardar en Freezer Bag.

Uso principal:

SMOOTHIES

El plan incluye berries, banano y piña entre sus frutas base.

---

34. BANANA FREEZER PREP

Cuando el banano esté maduro y no se utilizará a tiempo:

1. Pelar.
2. Cortar.
3. Precongelar.
4. Guardar.

No congelar con cáscara como sistema principal.

---

35. FRESH FRUIT ROTATION

Mantener fresco según consumo:

- banana;
- mango;
- green mango;
- oranges;
- mandarins;
- green grapes.

Comprar ocasionalmente:

- papaya;
- apples;

- pears.

No es necesario tener todas las frutas simultáneamente.

---

36. DRY LEGUMES

Mantener en pantry:

- black beans;
- lentils;
- chickpeas;
- other legumes utilizadas.

Storage:

- dry;
- airtight;
- clean;
- away from moisture.

No requieren ingredient prep al comprarlos.

---

37. FREEZER ORGANIZATION

Organizar por zonas.

ZONE 1 — COOKING BASES

- onion;
- bell pepper;
- green onion.

ZONE 2 — FLAVOR CUBES

- garlic;
- cilantro;
- celery;
- pesto;
- sofrito.

ZONE 3 — VEGETABLES

- broccoli;
- cauliflower;
- peas;
- carrots;
- corn;
- green beans;
- asparagus.

ZONE 4 — BREAKFAST PREP

- potato cubes;
- sautéed mushrooms.

ZONE 5 — ROOT & POTATO

- freezer fries;
- mashed potato;
- yuca.

ZONE 6 — SMOOTHIE FRUIT

- berries;
- banana;
- pineapple.

---

38. LABELING

Cada paquete debe indicar al menos:

NAME

Ejemplo:

ONION

PREP

Ejemplo:

SMALL DICE

DATE

Ejemplo:

04 NOV 2026

Cantidad puede agregarse cuando sea útil.

---

39. PRODUCE FIFO

Utilizar primero:

OLDEST PREP

Antes de abrir una bolsa nueva de la misma categoría.

No seguir agregando:

“un poquito nuevo”

sobre:

“un poquito viejo”

indefinidamente.

---

40. FRESH PRODUCE PRIORITY RULE

Durante Meal Planning:

primero utilizar ingredientes que:

1. ya están cortados;
2. están maduros;
3. están abiertos;
4. tienen vida útil más corta.

Después utilizar freezer stock.

El freezer sirve como respaldo.

No debe hacer que ignoremos comida fresca que necesita consumirse.

---

41. BLANCHING WORKSTATION

Antes de empezar:

Preparar:

- large pot;
- colander;
- large bowl;
- ice;
- trays;
- towels;
- Freezer Bags;
- labels.

Esto evita que el vegetal termine sobrecocido mientras se buscan recipientes.

---

42. BLANCHING RULE

El proceso completo es:

BOILING WATER

↓

VEGETABLE

↓

TIMED BLANCH

↓

ICE BATH

↓

DRAIN

↓

DRY

↓

PRE-FREEZE

↓

BAG

Saltarse cooling y drying reduce la calidad del resultado.

---

43. PRE-FREEZE RULE

Precongelar especialmente alimentos que:

- se pegan;
- se compactan;
- se necesitan sacar por pequeñas cantidades.

Ejemplos:

- fries;
- breakfast potatoes;
- berries;
- banana pieces;
- broccoli;
- cauliflower.

Una vez firmes:

transferir a bolsa.

---

44. WATER CONTROL

Durante Produce Prep habrá mucha humedad.

Al terminar:

secar completamente:

- sink perimeter;
- faucet base;
- backsplash area;
- KARLBY seams;
- countertop edges;
- zona detrás del faucet.

Especialmente importante alrededor de KARLBY.

---

45. FOOD SAFETY

- Refrigerator: **40°F / 4°C o menos**.
- Freezer: **0°F / -18°C o menos**.
- Lavar produce bajo agua corriente.
- No utilizar jabón sobre frutas o vegetales.
- Enfriar rápidamente alimentos cocidos.
- No congelar comida ya deteriorada.
- Secar alimentos antes de freezer storage cuando sea apropiado.
- Mantener garlic + oil fuera de temperatura ambiente.
- Utilizar recipientes limpios.
- Revisar fresh produce semanalmente.

---

46. MONTHLY FREEZER PREP CHECKLIST

AROMATICS

- ☐ Onion — small dice
- ☐ Onion — large dice
- ☐ Onion — julienne
- ☐ Bell pepper — dice
- ☐ Bell pepper — julienne
- ☐ Green onion
- ☐ Garlic cubes
- ☐ Cilantro base
- ☐ Celery base
- ☐ Pesto / sofrito if needed

VEGETABLES

- ☐ Review frozen broccoli
- ☐ Review frozen cauliflower
- ☐ Review green beans
- ☐ Review peas
- ☐ Review corn
- ☐ Carrots if needed
- ☐ Mushrooms if needed
- ☐ Other blanching prep

POTATO / ROOT

- ☐ Breakfast potatoes
- ☐ Freezer fries
- ☐ Mashed potatoes if planned

- ☐ Yuca

FRUIT

- ☐ Strawberries
- ☐ Blueberries
- ☐ Blackberries
- ☐ Bananas
- ☐ Pineapple if needed

---

47. TWICE-MONTHLY FRESH CHECKLIST

Review/replenish:

- ☐ Red onion
- ☐ Fresh bell pepper
- ☐ Cilantro
- ☐ Parsley
- ☐ Celery
- ☐ Spinach baby
- ☐ Lettuce
- ☐ Cucumber
- ☐ Tomato
- ☐ Cabbage
- ☐ Avocado
- ☐ Lemons
- ☐ Fresh fruit
- ☐ Potatoes
- ☐ Fresh mushrooms if needed
- ☐ Fresh asparagus if planned

---

48. DO NOT PREP JUST TO PREP

Ingredient Prep only makes sense when it removes future work.

Do not:

- chop lettuce weeks in advance;
- freeze vegetables that taste substantially better fresh without a reason;
- process all fruit simply because it was purchased;
- make enormous quantities of bases that will sit unused.

The goal is:

PREP THE REPETITIVE WORK

not:

PROCESS EVERY FOOD IN THE HOUSE

PRINCIPIO CENTRAL

Freeze what freezes well.

Keep fresh what tastes better fresh.

Prep the ingredients that create repetitive work.

Do not turn Ingredient Prep into extra work for its own sake.

El objetivo es que durante la semana gran parte del trabajo ya esté resuelto:

grab → combine → cook.

05. BREAKFAST SYSTEM

OBJETIVO

El desayuno se planifica diariamente para:

2 PERSONAS

- Tita
- Alonso

El objetivo no es crear dos desayunos diferentes.

La regla es:

ONE BREAKFAST — TWO BUILDS

Se prepara una misma base para ambos y, cuando sea útil, se ajusta la composición de Tita para que encaje mejor con el enfoque PCOS del plan alimenticio.

El plan busca una alimentación estable, sostenible y suficientemente rica en proteína, fibra y grasas, evitando depender de decisiones constantes durante la mañana.

---

1. BREAKFAST FORMULA

Un desayuno completo debe intentar incluir:

1. PROTEÍNA

La parte que ayuda a convertir el desayuno en una comida real.

Opciones:

- huevos;
- cottage cheese;
- Greek yogurt;
- kéfir;
- protein powder;
- turkey deli meat;
- ham;
- cheese;
- beans.

---

2. FIBER / PRODUCE

Puede provenir de:

- berries;
- banana;
- avocado;
- beans;

- chia;
- mushrooms;
- vegetables;
- fruit.

---

3. CARBOHYDRATE

No se elimina.

Se combina con proteína, fibra y/o grasa.

Opciones:

- gallo pinto;
- potato;
- bread;
- tortilla;
- oats;
- fruit;
- pancakes;
- waffles.

El sistema alimenticio original especifica que el carbohidrato aporta energía pero funciona mejor como parte de una comida completa, no como el centro aislado del plato.

---

4. FAT / COMPLEMENT

Opciones:

- avocado;
- chia;
- nuts;
- nut butter;
- cheese;
- olive oil.

---

2. TITA — PCOS-FRIENDLY ADJUSTMENT

No se crea una comida separada.

Cuando un desayuno sea predominantemente carbohidrato, se modifica mediante uno o más de estos ajustes:

ADD PROTEIN

Ejemplos:

- agregar huevo;
- cottage cheese;
- Greek yogurt;
- protein powder;
- turkey;
- kéfir.

ADD FIBER

Ejemplos:

- berries;
- chia;
- beans;
- avocado;
- vegetables.

REDUCE ISOLATED CARB

No significa eliminarlo.

Significa evitar desayunos compuestos solamente por:

- cereal;
- toast;
- pancakes;
- fruit;
- waffles;

sin proteína ni acompañamientos.

KEEP ADDED SUGAR LOW

Usar las versiones habituales de la casa:

- Lakanto;
- productos sin azúcar añadida cuando tenga sentido;
- fruta como fuente de dulzor.

---

3. ALONSO — DEFAULT BUILD

Alonso puede comer la misma preparación.

Su plato puede incluir:

- porción estándar o mayor de carbohidrato;
- fruta adicional;
- más toast;
- una tortilla adicional;
- mayor cantidad de papa;
- cereal adicional;

según hambre y preferencia.

No es necesario preparar una segunda receta.

---

4. WEEKLY BREAKFAST ROTATION

La semana utiliza siete tipos de desayuno.

La rotación existe para reducir decisiones.

No es obligatorio respetar el orden exacto.

Día	Breakfast
Domingo	Gallo Pinto Breakfast
Lunes	Protein Smoothie
Martes	Eggs + Toast
Miércoles	Breakfast Burrito
Jueves	Omelette
Viernes	Pancakes / Sweet Breakfast
Sábado	Potato Breakfast / Flexible

El objetivo es rotar:

- savory;
- smoothie;
- egg-based;
- handheld;
- vegetable-heavy;
- sweet;
- flexible.

---

5. BREAKFAST 01 — GALLO PINTO BREAKFAST

BASE FOR TWO

Preparar:

- gallo pinto;
- huevos;
- cottage cheese;
- avocado.

TITA

Estructura habitual:

- aproximadamente ½ taza de gallo pinto;
- 2 huevos;
- cottage cheese;
- avocado.

ALONSO

Misma base.

Puede aumentar:

- gallo pinto;
- huevos;
- tortilla;
- toast;

según apetito.

WHY IT WORKS

Incluye:

beans + rice → carbohydrate + fiber

eggs + cottage → protein

avocado → fat

Es uno de los desayunos más completos del sistema sin necesidad de modificaciones complicadas.

---

6. BREAKFAST 02 — PROTEIN SMOOTHIE

BASE FOR TWO

Componentes:

PROTEIN

- protein powder;
- kéfir y/o Greek yogurt.

FRUIT

Elegir una combinación:

- berries;
- banana;
- pineapple.

FIBER / FAT

- chia.

LIQUID

- milk;
- kéfir;
- combinación apropiada.

El plan original establece específicamente que un batido completo debería incluir:

protein + carbohydrate + fat + fiber.

TITA

Priorizar:

- protein powder suficiente;
- berries;
- chia;
- kéfir/Greek yogurt.

Banano puede utilizarse, pero no necesita ser la única fruta ni ocupar la mayor parte del smoothie.

ALONSO

Puede utilizar:

- más banana;
- mayor cantidad total;
- oats;
- granola como topping;

cuando necesite más energía.

---

7. BREAKFAST 03 — EGGS + TOAST

BASE FOR TWO

- huevos;
- whole-grain toast;
- fruta o vegetable;
- optional avocado.

Opciones de huevos:

- scrambled;
- fried;
- over-easy;
- boiled;
- omelette-style.

TITA

Construir:

eggs + toast + fiber/fat

Ejemplos:

OPTION A

2 eggs

- toast
- avocado

OPTION B

2 eggs

- toast
- berries

OPTION C

Eggs

- cottage cheese
- toast

ALONSO

Misma base.

Puede añadir:

- second toast;
- more eggs;
- fruit;
- cheese.

---

8. BREAKFAST 04 — BREAKFAST BURRITO

BASE

Utilizar:

- tortilla;
- eggs;
- breakfast potatoes;
- turkey/ham;
- cheese;
- onion/bell pepper when desired.

Opcionales:

- beans;
- avocado;
- salsa.

TITA

Priorizar:

- egg;
- turkey;
- vegetables;
- avocado;

y evitar que el burrito termine siendo principalmente:

tortilla + potato + cheese

sin suficiente proteína.

ALONSO

Puede utilizar:

- tortilla más grande;
- mayor potato portion;
- extra cheese;

- additional burrito;

según apetito.

---

9. BREAKFAST 05 — OMELETTE

Esta es una de las mejores preparaciones para utilizar:

- mushrooms;
- spinach;
- bell pepper;
- onion;
- leftover vegetables.

BASE FOR TWO

Eggs

elegir 2–4:

- mushrooms;
- spinach;
- bell pepper;
- onion;
- tomato;
- turkey;
- ham;
- cheese.

Servir con:

- toast;
- potato;
- fruit;
- gallo pinto;

según menú.

TITA

Mantener el omelette como componente principal.

Agregar un acompañamiento moderado.

ALONSO

Misma preparación.

Puede añadir mayor cantidad de:

- toast;
- potato;
- pinto;

- fruit.

10. BREAKFAST 06 — PANCAKE DAY

Los pancakes pueden formar parte del sistema.

No necesitan convertirse en un desayuno prohibido.

La regla es:

PANCAKES ARE THE CARB — NOT THE WHOLE BREAKFAST

BASE

Pancakes

una proteína:

- eggs;
- Greek yogurt;
- cottage cheese;
- protein-enhanced batter.

fruit:

- berries;
- banana.

TITA

Preferir:

- pancakes con buena fuente de proteína;
- berries;
- Greek yogurt/cottage;
- sugar-free syrup o poca cantidad de topping dulce.

ALONSO

Puede utilizar:

- mayor cantidad de pancakes;
- banana;
- syrup/toppings según preferencia.

La base de la receta sigue siendo compartida.

---

11. BREAKFAST 07 — POTATO BREAKFAST BOWL

Utiliza:

Breakfast Potato Cubes

de la Sección 04.

BASE

- potato cubes;
- eggs;
- vegetables;
- cheese opcional;
- avocado.

Puede incluir:

- turkey;
- ham;
- beans.

TITA

Construir aproximadamente:

protein first

Eggs / turkey

vegetables

potato

avocado.

ALONSO

Puede aumentar principalmente:

- potato;
- cheese;
- eggs.

---

12. POTATO WAFFLES

Los potato waffles pertenecen al mismo grupo que Potato Breakfast Bowl.

Funcionan como:

CARBOHYDRATE COMPONENT

No como desayuno completo por sí solos.

Servir con:

- eggs;
- turkey;
- cottage cheese;

y opcionalmente:

- avocado;
- vegetables.

---

13. BREAKFAST QUESADILLA

Quick option.

BASE

- tortilla;
- eggs;
- turkey/ham;
- cheese.

Opcional:

- beans;
- onion;
- bell pepper;
- avocado;
- salsa.

BEST USE

Días en que:

- no se quiere cocinar mucho;
- hay tortillas abiertas;
- hay leftover egg filling;
- se necesita desayuno portable.

---

14. CEREAL RULE

Cereal puede utilizarse.

Pero:

CEREAL + MILK ONLY

no será el desayuno default del sistema.

Si se utiliza cereal:

Agregar al menos:

PROTEIN

- Greek yogurt;
- eggs;
- cottage cheese;
- high-protein milk.

y/o:

FAT / FIBER

- chia;
- nuts;
- nut butter;
- berries.

EXAMPLE

Cereal + milk

- Greek yogurt
- berries

es una comida más completa que:

Cereal + milk solamente.

---

15. OATMEAL RULE

Oats forman parte del Master Inventory.

Cuando se utilicen:

BASE

Oats

PROTEIN

- Greek yogurt;
- protein powder;
- milk;
- cottage cheese on the side.

FAT / FIBER

- chia;
- peanut butter;
- nuts.

FRUIT

- berries;
- banana;
- apple.

---

16. SWEET BREAKFAST RULE

Sweet breakfast incluye:

- pancakes;
- waffles;
- oatmeal;
- cereal.

No necesita eliminarse.

La regla es:

PAIR IT

No servir como desayuno compuesto únicamente de starch + sweet topping.

Agregar:

protein + fiber/fat.

---

17. SUNDAY BREAKFAST PREP

Durante el prep semanal se pueden dejar listas algunas bases.

No cocinar siete desayunos completos.

Preparar componentes.

POSSIBLE PREP

- breakfast potatoes;
- washed berries;
- smoothie bags;
- chopped vegetables;
- mushrooms;
- cooked beans;
- gallo pinto base;
- boiled eggs;
- breakfast burrito filling;
- washed fruit.

La meta es reducir trabajo, no comer breakfast leftovers toda la semana.

---

18. SMOOTHIE BAGS

Opcionalmente preparar freezer bags individuales.

Ejemplo:

BERRY BAG

- strawberries;
- blueberries;
- blackberries;
- banana portion.

Al cocinar:

agregar:

- protein powder;
- kéfir;

- chia;
- liquid.

No es necesario congelar todos los ingredientes juntos.

---

19. BREAKFAST POTATO PREP

Preparar durante Monthly Produce Prep.

Freezer:

Breakfast Potato Cubes

Durante la mañana:

1. Sacar cantidad necesaria.
2. Air fryer / pan.
3. Cocinar eggs.
4. Agregar vegetables.
5. Assemble.

---

20. GALLO PINTO PREP

Los frijoles pueden prepararse previamente.

El arroz puede existir como:

- fresh rice;
- leftover rice apropiadamente refrigerado.

El gallo pinto se cocina fresco cuando sea posible.

No es necesario congelar un mes completo de pinto.

---

21. EGG SYSTEM

Mantener suficientes huevos para el ciclo de compra.

Huevos aparecen repetidamente en:

- gallo pinto breakfast;
- eggs + toast;
- omelette;
- burritos;
- quesadillas;
- potato bowls;
- flex meals.

Por lo tanto:

EGGS = CORE STAPLE

Agregar a Reminders cuando la cantidad restante no alcance para varios desayunos.

---

22. BREAKFAST VEGETABLE SYSTEM

Vegetales particularmente útiles para desayuno:

- mushrooms;
- spinach;
- onion;
- bell pepper;
- tomato;
- avocado;
- green onion.

No es necesario utilizar vegetables en todos los desayunos.

Fruit y beans también pueden aportar fiber/produce dentro de la estructura.

---

23. BREAKFAST FRUIT SYSTEM

Rotar principalmente:

BERRIES

Especialmente fáciles con:

- smoothies;
- yogurt;
- pancakes;
- cereal;
- oatmeal.

BANANA

Ideal con:

- smoothies;
- cereal;
- pancakes;
- oatmeal.

OTHER FRESH FRUIT

- orange;
- mandarin;
- grapes;
- mango;
- apple;
- pear;
- papaya.

No es necesario comprar todas simultáneamente.

---

24. EMERGENCY BREAKFASTS

Debe existir una opción para mañanas donde cocinar no sea realista.

OPTION 1

Protein smoothie.

OPTION 2

Greek yogurt + berries + chia + nuts.

OPTION 3

Eggs + toast.

OPTION 4

Cottage cheese + fruit + nuts.

OPTION 5

Breakfast quesadilla.

OPTION 6

Boiled eggs + toast + fruit.

El desayuno de emergencia debe ser:

EASIER THAN SKIPPING BREAKFAST

---

25. BREAKFAST ROTATION LIBRARY

SAVORY

- Gallo pinto breakfast
- Eggs + toast
- Omelette
- Breakfast burrito
- Breakfast quesadilla
- Potato breakfast bowl
- Potato waffles + eggs

SWEET / COLD

- Protein smoothie
- Pancakes
- Oatmeal
- Cereal build

- Greek yogurt bowl

---

26. SAMPLE 2-WEEK ROTATION

No es obligatoria.

Sirve como default cuando no se quiere pensar.

WEEK 1

Sunday
Gallo Pinto + Eggs + Cottage + Avocado

Monday
Protein Berry Smoothie

Tuesday
Eggs + Toast + Avocado

Wednesday
Breakfast Burrito

Thursday
Mushroom + Spinach Omelette

Friday
Pancakes + Protein Side + Berries

Saturday
Potato Breakfast Bowl

WEEK 2

Sunday
Gallo Pinto Breakfast

Monday
Greek Yogurt / Smoothie Bowl

Tuesday
Eggs + Toast + Fruit

Wednesday
Breakfast Quesadilla

Thursday
Omelette + Potatoes

Friday
Oatmeal + Protein + Berries

Saturday
Potato Waffles + Eggs

Después:

repetir, intercambiar o sustituir según inventario.

---

27. BREAKFAST SHOPPING CHECK

Antes de completar el menú semanal revisar:

PROTEIN

- ☐ Eggs
- ☐ Cottage cheese
- ☐ Greek yogurt
- ☐ Kéfir
- ☐ Protein powder
- ☐ Turkey/ham
- ☐ Cheese

CARBS

- ☐ Gallo pinto ingredients
- ☐ Bread
- ☐ Tortillas
- ☐ Breakfast potatoes
- ☐ Oats
- ☐ Pancake ingredients
- ☐ Cereal if wanted

FIBER / PRODUCE

- ☐ Berries
- ☐ Banana
- ☐ Avocado
- ☐ Mushrooms
- ☐ Spinach
- ☐ Other fruit

FAT / COMPLEMENT

- ☐ Chia
- ☐ Nuts
- ☐ Nut butter
- ☐ Avocado

---

28. BREAKFAST MENU RULE

El Sunday Meal Planning debe incluir:

7 BREAKFASTS

No simplemente:

“desayuno”.

Ejemplo:

MON — Berry Protein Smoothie

TUE — Eggs + Toast + Avocado

Esto elimina otra decisión diaria.

29. SWITCHING RULE

Si el desayuno del menú no funciona ese día:

no rehacer el plan.

Cambiarlo por otro desayuno de la Breakfast Library utilizando ingredientes disponibles.

La rotación es una herramienta.

No una obligación.

---

30. PRINCIPIO CENTRAL

El desayuno debe ser:

EASY ENOUGH TO REPEAT

COMPLETE ENOUGH TO SATISFY

FLEXIBLE ENOUGH FOR TWO PEOPLE

No hace falta cocinar dos desayunos diferentes.

Se prepara una base común y se ajustan cantidades o acompañamientos.

Para Tita:

protein + fiber + carb + fat

es la estructura default.

Para Alonso:

same meal + adjust quantity according to appetite.

La meta es que ambos puedan desayunar bien sin duplicar el trabajo de cocina.

06. MARINADES, SEASONINGS & FLAVOR BASES

OBJETIVO

Crear variedad de sabor utilizando las mismas proteínas base del freezer.

El sistema de marinadas permite que una misma pechuga, chuleta o pork chunk se convierta en preparaciones diferentes sin aumentar innecesariamente el número de ingredientes.

La regla oficial es:

1 MARINADE RECIPE = 1 UNIDAD

Es decir:

1 unidad = 4 platos = 2 porciones

Las cantidades de esta sección están diseñadas para una unidad de proteína.

---

1. MARINADE RULES

No existe una base universal.

La antigua idea de utilizar siempre:

- Greek yogurt;
- buttermilk;

como base queda eliminada.

Cada marinada se prepara según su propio perfil de sabor.

---

2. FREEZER RULE

Las marinadas se clasifican como:

FREEZER FRIENDLY

Puede agregarse directamente a la proteína cruda antes de congelar.

COOK-DAY MARINADE

Conviene preparar cerca del momento de cocinar.

SHORT MARINADE

Debe utilizarse únicamente durante pocos minutos antes de cocinar.

---

3. ACID RULE

Ingredientes ácidos incluyen:

- limón;
- vinagre;
- pineapple juice;
- tomato;
- balsamic.

El ácido ayuda con sabor y textura, pero demasiado tiempo puede afectar la carne.

Por eso:

FREEZE → THAW → COOK

Las carnes con marinadas ácidas no deben quedarse varios días adicionales en refrigerator después de descongelar.

---

4. MARINADE 01 — TERIYAKI

COMPATIBLE

- Chicken
- Pork

INGREDIENTS — 1 UNIT

- 2 tbsp soy sauce or tamari
- 1 tbsp rice vinegar or lemon juice
- 1 tsp ginger
- 1–2 garlic cloves
- 1–2 tsp Lakanto or sugar

ACID

Rice vinegar or lemon.

FREEZER

YES

FLAVOR PROFILE

Sweet + salty + umami.

BEST WITH

- rice;
- quinoa;
- broccoli;
- carrots;
- edamame;
- sesame.

AFTER THAWING

Cook once fully thawed.

Do not leave unnecessarily marinating for several additional days.

---

5. MARINADE 02 — MUSTARD “HONEY”

COMPATIBLE

- Chicken
- Pork
- Pork chops

INGREDIENTS — 1 UNIT

- 2 tbsp mustard
- 1 tbsp apple cider vinegar
- 1–2 tsp Lakanto or sugar
- black pepper
- minimal salt

ACID

Apple cider vinegar.

FREEZER

YES

FLAVOR PROFILE

Sweet + tangy + mustard.

BEST WITH

- green beans;
- potatoes;
- roasted vegetables;
- salad.

---

6. MARINADE 03 — MEXICAN

COMPATIBLE

- Chicken
- Pork

INGREDIENTS — 1 UNIT

- 1 tsp chili powder
- 1 tsp paprika
- 1 tsp cumin

For a milder cumin flavor:

use ½ tsp

- ½ tsp oregano
- garlic
- onion
- salt
- ½ tomato

ACID

Tomato provides mild acidity.

FREEZER

YES

BEST WITH

- fajitas;
- tacos;
- burritos;
- bowls;
- tortillas;
- pico de gallo;
- guacamole.

---

7. MARINADE 04 — LIZANO

COMPATIBLE

- Chicken
- Pork

INGREDIENTS — 1 UNIT

- 2–3 tbsp Salsa Lizano
- 1 tbsp lemon juice
- garlic optional
- black pepper

ACID

Lemon.

FREEZER

YES

IMPORTANT AFTER THAWING

Cook:

THE SAME DAY

Do not thaw and then leave marinating in refrigerator for another 1–2 days.

BEST WITH

- rice;
- beans;
- chayote picadillo;
- avocado;
- simple salad.

---

8. MARINADE 05 — QUESO + NUTMEG

COMPATIBLE

CHICKEN ONLY

INGREDIENTS — 1 UNIT

- ¼ cup parmesan
- 1 tsp garlic powder
- black pepper
- pinch of salt
- 1 tsp Lakanto or sugar
- 1 tsp nutmeg

ACID

None.

FREEZER

YES

This marinade remains part of the permanent library.

IMPORTANT

This is the:

CHEESE + NUTMEG MARINADE

It is not the same thing as a cream sauce.

If a very creamy finished dish is desired, cream or additional cheese can be added during cooking.

BEST WITH

- pasta;
- mushrooms;
- spinach;

- parmesan;
- olives.

---

9. MARINADE 06 — CILANTRO + GARLIC + LEMON

COMPATIBLE

- Chicken
- Pork

INGREDIENTS — 1 UNIT

- ½ cup cilantro
- 2–3 garlic cloves
- juice of 1 lemon
- salt
- black pepper

ACID

Lemon.

ACIDITY

HIGH

FREEZER

YES

The cilantro may lose some fresh aroma after freezing, but it still works well as a marinade.

AFTER THAWING

Cook promptly.

BEST WITH

- rice;
- beans;
- chickpea salad;
- cucumber;
- tomato;
- avocado.

---

10. MARINADE 07 — BBQ

COMPATIBLE

- Chicken
- Pork
- Wings
- Ribs

INGREDIENTS — 1 UNIT

- 1 tbsp mustard
- 2 tbsp tomato paste or sugar-free ketchup
- 1½ tbsp smoked paprika
- vinegar
- garlic powder
- onion powder
- 1–2 tsp Lakanto or sugar

ACID

Vinegar + tomato.

FREEZER

YES

COOKING RULE

Do not rely on the freezer marinade alone for the final sticky BBQ coating.

During cooking:

ADD EXTRA BBQ NEAR THE END

This gives better glaze and reduces the chance of burning sugar-based sauce too early.

---

11. MARINADE 08 — ITALIAN

COMPATIBLE

- Chicken
- Pork

INGREDIENTS — 1 UNIT

- 1 tsp oregano
- ½ tsp basil or Italian seasoning
- garlic
- black pepper
- lemon juice or balsamic vinegar

ACID

Lemon or balsamic.

FREEZER

YES

BEST WITH

- asparagus;
- mushrooms;
- tomato;
- pasta;
- quinoa;
- parmesan;
- olives.

---

12. MARINADE 09 — HAWAIIAN

COMPATIBLE

PORK

INGREDIENTS — 1 UNIT

- 2 tbsp soy sauce
- 2–3 tbsp pineapple juice
- 1 tbsp rice vinegar
- 1 tsp ginger
- 1–2 tsp Lakanto or sugar

ACID

Rice vinegar + pineapple.

ENZYME

Pineapple contains enzymes that can tenderize meat.

FREEZER

YES

AFTER THAWING

Cook within approximately:

24 HOURS

Do not leave the pork sitting in pineapple marinade for an extended period after thawing.

BEST WITH

- rice;
- cabbage slaw;
- carrots;
- sesame.

---

13. SPECIAL CHICKEN PREP — BBQ WINGS

YIELD

1 unit

INGREDIENTS

- 1½ tbsp smoked paprika
- 1 tsp garlic powder
- 1 tsp onion powder
- ½ tsp black pepper
- ¾ tsp salt
- 1 tbsp apple cider vinegar
- 1 tbsp mustard
- 1–2 tsp Lakanto optional
- 1 tbsp oil
- 2 tbsp tomato paste or sugar-free ketchup optional

MARINADE TIME

Approximately:

2–12 hours

COOKING

Cook wings until done and crisp.

Add BBQ glaze near the end.

---

14. SPECIAL CHICKEN PREP — HERB MUSLOS / ENCUENTROS

YIELD

1 unit

INGREDIENTS

- paprika
- garlic
- onion

- 1 tsp oregano
- ½ tsp thyme optional
- black pepper
- ¾ tsp salt

MARINADE TIME

Approximately:

4–24 hours

BEST FOR

- oven;
- pollo sudado;
- pressure cooker;
- roasted chicken preparations.

---

15. BEEF RULE

Beef generally enters the freezer:

UNMARINATED

This preserves flexibility.

Default seasoning:

- salt;
- pepper;

at cooking time.

Exceptions are documented below.

---

16. BEEF PREP — BISTEC ENCEBOLLADO

YIELD

1 unit

MARINADE

- 2 tbsp Salsa Lizano
- 1 tbsp oil
- 2 garlic cloves
- ½ tsp salt
- ½ tsp black pepper
- ½ tsp soy sauce optional

MARINADE TIME

Approximately:

30 minutes–2 hours

ACID

No strong acid is deliberately added.

BEST WITH

- onion;
- rice;
- beans;
- salad;
- avocado.

---

17. BEEF PREP — BEEF & BROCCOLI VELVET

YIELD

1 unit

This is:

NOT A FREEZER MARINADE

It is a short treatment immediately before cooking.

INGREDIENTS

- 2½ tbsp soy sauce
- 1 tbsp rice vinegar
- 1 tsp ginger
- 1–2 garlic cloves
- 1½ tbsp cornstarch
- 1 tsp oil

TIME

10–20 MINUTES MAXIMUM

Do not leave for several hours.

BEST WITH

- broccoli;
- rice;
- sesame;
- sesame oil.

---

18. GROUND BEEF RULE

Ground beef freezes:

UNSEASONED

Season according to the meal.

This preserves flexibility for:

- burgers;
- tacos;
- burritos;
- pasta;
- bowls;
- stuffed potatoes.

---

19. GROUND BEEF — MEXICAN SEASONING

Use when cooking:

- cumin;
- paprika;
- chili powder;
- oregano;
- garlic;
- onion;
- salt.

Finish with:

- lemon or lime if desired.

---

20. GROUND BEEF — ITALIAN SEASONING

Use when cooking:

- Italian seasoning;
- garlic;
- onion;
- salt;
- black pepper.

Optional finish:

- parmesan.

---

21. SEAFOOD RULE

Seafood is generally:

MARINATED CLOSE TO COOKING

It does not need to be part of the large monthly marinade session.

Main reasons:

- delicate texture;
- short marinade times;
- acid can affect seafood rapidly.

---

22. SALMON — SWEET TERIYAKI

YIELD

1 unit

INGREDIENTS

- 2½–3 tbsp soy sauce
- 1 tbsp rice vinegar or lemon juice
- 1 tsp ginger
- garlic
- 2–3 tsp Lakanto or sugar

MARINADE TIME

Approximately:

20–60 minutes

ACID

Rice vinegar or lemon.

COOKING

Cook salmon.

Reduce some clean sauce separately if desired.

Glaze near the end.

BEST WITH

- quinoa;
- rice;
- broccoli;
- asparagus;
- avocado.

---

23. TUNA STEAK — SOY MARINADE

YIELD

1 unit

INGREDIENTS

- 2½ tbsp soy sauce

- 1 tbsp rice vinegar or lemon
- ginger optional
- small amount of oil

MARINADE TIME

10–20 MINUTES

This is a short marinade.

---

24. TUNA STEAK — MAYO-STYLE SAUCE

This sauce is:

NOT FOR FREEZING

Prepare at cooking time.

INGREDIENTS

- ¼ cup mayonnaise
- 1½ tbsp soy sauce
- 1 tbsp lemon juice
- Lakanto or sugar optional
- garlic powder

Use as:

- drizzle;
- bowl sauce;
- dipping sauce.

---

25. TILAPIA

Tilapia has:

NO MONTHLY STANDARD MARINADE

Season close to cooking.

Primary preparations:

- crispy breaded tilapia;
- fried tilapia;
- garlic tilapia.

This preserves flexibility for different coatings and cooking methods.

---

26. SHRIMP

Shrimp is prepared close to cooking.

Avoid:

LONG LEMON MARINADES

Main uses:

- tacos;
- bowls;
- garlic shrimp;
- quick seasoned preparations.

Short seasoning/marinade only.

---

27. MARINADE MONTHLY SELECTION

Do not prepare every flavor every month.

Choose approximately:

4–6 MARINADES

based on:

- upcoming menu;
- current inventory;
- mood;
- ingredients already available.

---

28. SAMPLE MONTH A

Possible rotation:

- Teriyaki Chicken
- Mexican Chicken
- Cheese + Nutmeg Chicken
- BBQ Chicken
- Mustard-Honey Pork
- Hawaiian Pork

---

29. SAMPLE MONTH B

Possible rotation:

- Cilantro-Lemon Chicken

- Lizano Chicken
- Italian Chicken
- Teriyaki Pork
- BBQ Pork
- Mustard-Honey Pork

The goal is variety without creating unnecessary complexity.

---

30. MARINADE LABELING

Each freezer bag should include:

PROTEIN

Example:

CHICKEN FILETS

FLAVOR

Example:

TERIYAKI

QUANTITY

1 UNIT / 4 PLATES

DATE

RAW

Example:

CHICKEN — FILETS
TERIYAKI
1 UNIT / 4 PLATES
04 NOV 2026
RAW

---

31. NEUTRAL PROTEIN LABEL

If there is no marinade:

Use:

UNSEASONED

Example:

PORK — CHUNKS
UNSEASONED
1 UNIT / 4 PLATES

32. FREEZER MARINADE WORKFLOW

1. Prepare all protein units first.
2. Decide which units remain neutral.
3. Group bags by flavor.
4. Prepare marinade.
5. Add marinade to bag.
6. Add protein.
7. Distribute marinade around meat.
8. Remove excess air.
9. Seal.
10. Label.
11. Lay flat when possible.
12. Freeze immediately.

33. DO NOT CROSS-CONTAMINATE MARINADES

When preparing multiple bags:

Do not:

- touch spice containers with contaminated hands;
- reuse contaminated spoons;
- return unused marinade that touched raw meat to a clean batch.

Prepare marinades using clean utensils before handling raw protein whenever possible.

34. RAW MARINADE RULE

Marinade that has touched raw meat is considered:

RAW FOOD CONTACT

Do not pour it directly over finished food.

If sauce is desired:

OPTION 1

Prepare extra clean sauce separately.

OPTION 2

Use a recipe-specific method that fully cooks the marinade.

Never assume marinade is ready-to-eat.

35. FLAVOR BASES VS MARINADES

These are different systems.

MARINADE

Used directly with raw protein before cooking.

Examples:

- Teriyaki
- Lizano
- Mustard-Honey

FLAVOR BASE

Used during cooking.

Examples:

- garlic cubes;
- cilantro base;
- celery base;
- pesto cubes;
- sofrito.

A flavor base does not need to be attached to a specific protein.

---

36. GARLIC CUBE

Prepared in Produce Prep.

Use:

- soups;
- rice;
- beans;
- meat sauces;
- vegetables;
- marinades.

Default:

1 cube or amount needed according to recipe.

Exact cube size depends on the mold used.

---

37. CILANTRO BASE

Use in:

- rice;
- beans;
- soups;
- sauces;
- marinades;
- stews.

Keep separate from fresh cilantro used as garnish.

---

38. CELERY BASE

Use mainly for:

- soups;
- stews;
- stocks;
- olla de carne.

It exists primarily to save chopping time.

---

39. PESTO CUBES

Use with:

- chicken;
- pasta;
- vegetables;
- sauces.

Can convert a neutral chicken unit into a completely different meal without requiring monthly marination.

---

40. MIXED SOFRITO BASE

Use in:

- beans;
- rice;
- soups;
- stews;
- meat sauce;
- legumes.

Contents may vary according to available vegetables.

Always label enough to remember what the base contains if it differs significantly from the usual mixture.

---

41. SEASONING CORE

The following should normally remain available:

SAVORY BASE

- salt;
- black pepper;
- garlic powder;
- onion powder.

LATIN / MEXICAN

- paprika;
- smoked paprika;
- cumin;
- chili powder;
- oregano.

HERBS

- Italian seasoning;
- basil;
- thyme.

ASIAN

- ginger;
- soy sauce / tamari;
- rice vinegar;
- sesame oil;
- sesame seeds.

SPECIAL

- nutmeg;
- Salsa Lizano;
- mustard;
- tomato paste;
- balsamic vinegar;
- apple cider vinegar;
- lemon.

---

42. FLAVOR PROFILE GUIDE

TERIYAKI

Sweet + salty + umami.

MUSTARD-HONEY

Tangy + sweet.

MEXICAN

Warm spices + savory.

LIZANO

Savory + tangy + Costa Rican profile.

CHEESE + NUTMEG

Savory + cheesy + warm spice.

CILANTRO-LEMON

Fresh + citrusy.

BBQ

Smoky + sweet + tangy.

ITALIAN

Herby + acidic.

HAWAIIAN

Sweet + savory + pineapple.

---

43. “I HAVE NEUTRAL CHICKEN” RULE

If a chicken unit was frozen unseasoned, it can still become:

- curry;
- pesto chicken;
- breaded chicken;
- chicken pasta;
- fajitas;
- creamy chicken;
- garlic chicken;
- chicken soup;
- other Recipe Library meals.

Neutral units are intentional flexibility.

They are not unfinished prep.

---

44. “I HAVE NEUTRAL PORK” RULE

Neutral pork can become:

- pork with beans;
- pork with chickpeas;
- pork with legumes;
- Mexican pork;
- Italian pork;
- pork stew;

- BBQ pork.

---

45. “I HAVE NEUTRAL BEEF” RULE

Neutral beef can become:

- bistec encebollado;
- beef & broccoli;
- carne en salsa;
- mushroom beef;
- tacos;
- fajitas;
- burgers;
- pasta;
- stuffed potatoes.

---

46. MARINADE DECISION TREE

When planning a protein unit:

STEP 1

Is it seafood?

YES → generally marinate on cooking day.

STEP 2

Is it ground meat?

YES → freeze unseasoned.

STEP 3

Is it beef?

Usually → freeze unseasoned.

STEP 4

Is it chicken or pork?

Choose:

marinated

or

neutral

according to monthly flavor balance.

---

47. MONTHLY MARINADE CHECKLIST

Before Monthly Protein Prep:

- ☐ Review Recipe Library
- ☐ Review pantry seasonings
- ☐ Choose 4–6 flavors
- ☐ Check soy sauce
- ☐ Check mustard
- ☐ Check Salsa Lizano
- ☐ Check vinegar
- ☐ Check lemons
- ☐ Check tomato paste / ketchup
- ☐ Check parmesan
- ☐ Check nutmeg
- ☐ Check cilantro
- ☐ Check ginger
- ☐ Check garlic
- ☐ Check Lakanto

Only purchase what is missing.

---

48. QUICK REFERENCE TABLE

BBQ	✓	✓	—	—	✓
Italian	✓	✓	—	—	✓
Hawaiian	—	✓	—	—	✓
Beef & Broccoli Velvet	—	—	✓	—	No
Salmon Teriyaki	—	—	—	✓	Cooking day
Tuna Soy	—	—	—	✓	Cooking day

PRINCIPIO CENTRAL

The protein provides the structure.

The marinade provides the identity.

The side dishes complete the meal.

A freezer with a limited number of proteins can still create a large variety of meals when the flavor system changes.

The goal is not to own dozens of ingredients.

The goal is to make the ingredients already in the kitchen taste intentionally different.

07. MEAL COMBINATION LIBRARY

OBJETIVO

La Meal Combination Library responde una sola pregunta:

“Tengo esta proteína. ¿Con qué la hago?”

No contiene recetas completas.

No indica cantidades exactas.

No reemplaza el Recipe Library.

Su función es acelerar el meal planning utilizando combinaciones que ya encajan con el sistema general de alimentación.

La estructura base es:

PROTEIN

VEGETABLE / FIBER

CARBOHYDRATE

FAT / COMPLEMENT

El plan alimenticio utiliza esta misma lógica para construir comidas completas y reducir decisiones.

---

1. HOW TO USE THIS LIBRARY

Durante el Sunday Meal Planning:

STEP 1

Elegir la proteína según la rotación.

STEP 2

Elegir preparación o marinada.

STEP 3

Buscar esa preparación en esta biblioteca.

STEP 4

Escoger acompañamientos según:

- inventario;
- fresh produce que debe utilizarse;
- bases disponibles;
- tiempo;
- preferencia.

No es obligatorio utilizar todos los acompañamientos listados.

---

2. SIDE PRIORITY RULE

Cuando existan varias opciones posibles, elegir en este orden:

FIRST

Fresh produce que debe consumirse pronto.

SECOND

Vegetales ya abiertos o preparados.

THIRD

Freezer vegetables.

FOURTH

Comprar algo adicional únicamente si realmente mejora la comida o es necesario para la receta.

---

3. CARBOHYDRATE ROTATION

Evitar utilizar arroz automáticamente con absolutamente todo.

Rotar entre:

- rice;
- beans;
- rice + beans;
- quinoa;
- potato;
- yuca;
- pasta;
- tortillas;
- legumes;
- bread;
- noodles.

Esto aumenta variedad sin necesitar cambiar la proteína.

---

4. POLLO — TERIYAKI

PROTEIN

Chicken Teriyaki

VEGETABLE / FIBER

Elegir:

- broccoli;
- carrots;
- edamame;
- bell pepper.

CARBOHYDRATE

- rice;
- quinoa.

FAT / COMPLEMENT

- sesame seeds;
- avocado;
- small amount sesame oil.

DEFAULT COMBINATION

Chicken Teriyaki + rice + broccoli + carrot + sesame

---

5. POLLO — MUSTARD-HONEY

VEGETABLE / FIBER

- green beans;
- salad;
- roasted vegetables.

CARBOHYDRATE

- potato;
- mashed potato;
- roasted potato.

FAT / COMPLEMENT

- olive oil;
- olives;
- avocado if desired.

DEFAULT

Mustard-Honey Chicken + green beans + roasted potatoes

---

6. POLLO — ITALIAN

VEGETABLE / FIBER

- asparagus;
- mushrooms;
- tomato;
- spinach.

CARBOHYDRATE

- pasta;
- quinoa.

COMPLEMENT

- parmesan;
- olives;
- olive oil.

DEFAULT

Italian Chicken + asparagus + mushrooms + pasta + parmesan

---

7. POLLO — MEXICAN

VEGETABLE / FIBER

- bell pepper;
- onion;
- cabbage/slaw;
- tomato;
- lettuce.

CARBOHYDRATE

- tortillas;
- rice;
- beans.

COMPLEMENT

- guacamole;
- avocado;
- cheese;
- pico de gallo.

POSSIBLE BUILDS

FAJITAS

Chicken

- peppers + onion
- tortillas
- avocado.

BOWL

Chicken

- rice + beans
- vegetables
- guacamole.

TACOS

Chicken

- tortilla
- slaw/pico
- avocado.

---

8. POLLO — CILANTRO + LEMON

VEGETABLE / FIBER

- chickpea salad;
- cucumber;
- tomato;
- onion;
- green salad.

CARBOHYDRATE

- rice;
- quinoa;
- chickpeas can partially fill this role.

COMPLEMENT

- avocado;
- olive oil.

DEFAULT

Cilantro-Lemon Chicken + cucumber-tomato-chickpea salad + avocado

---

9. POLLO — BBQ

VEGETABLE / FIBER

- coleslaw;
- cabbage;
- salad;
- corn.

CARBOHYDRATE

- potato;
- freezer fries;
- yuca;

- rice.

COMPLEMENT

- avocado;
- pickles.

DEFAULT

BBQ Chicken + coleslaw + potato wedges

---

10. POLLO — LIZANO

VEGETABLE / FIBER

- chayote picadillo;
- salad;
- cabbage.

CARBOHYDRATE

- rice;
- beans;
- rice + beans.

COMPLEMENT

- avocado.

DEFAULT

Lizano Chicken + chayote picadillo + rice + beans

---

11. POLLO — QUESO + NUTMEG

VEGETABLE / FIBER

- spinach;
- mushrooms;
- asparagus.

CARBOHYDRATE

- pasta;
- potato.

COMPLEMENT

- parmesan;
- olives.

DEFAULT

Cheese-Nutmeg Chicken + mushrooms + spinach + pasta

---

12. POLLO — BBQ WINGS

VEGETABLE / FIBER

- salad;
- cabbage slaw;
- cucumber;
- pickles.

CARBOHYDRATE

- potato wedges;
- freezer fries;
- yuca.

COMPLEMENT

- ranch/light dressing;
- avocado.

DEFAULT

BBQ Wings + potato wedges + salad + pickles

---

13. POLLO — MUSLOS / ENCUENTROS HERBS

VEGETABLE / FIBER

- carrots;
- salad;
- cooked vegetables.

CARBOHYDRATE

- rice;
- beans;
- potatoes.

COMPLEMENT

- avocado.

DEFAULT

Herb Chicken + rice + beans + carrots + avocado

---

14. POLLO — CURRY

VEGETABLE / FIBER

Depending on recipe:

- carrots;
- peas;
- broccoli;
- spinach.

CARBOHYDRATE

- rice;
- quinoa.

COMPLEMENT

- cilantro;
- yogurt/sour cream if part of recipe.

DEFAULT

Creamy Chicken Curry + rice + vegetables

---

15. POLLO — TORTELLINI / WHITE SAUCE

VEGETABLE / FIBER

- broccoli;
- spinach;
- mushrooms.

CARBOHYDRATE

Tortellini already provides the primary carbohydrate.

COMPLEMENT

- parmesan.

DEFAULT

Chicken Tortellini + broccoli + creamy white sauce

---

16. POLLO — FAJITAS

VEGETABLE / FIBER

- peppers;
- onions;
- lettuce;
- tomato.

CARBOHYDRATE

- tortillas;
- rice.

COMPLEMENT

- avocado;
- cheese;
- salsa.

---

17. POLLO — BOWL

Use as a flexible assembly meal.

BASE

Chicken

VEGETABLE

Whatever is available.

CARB

- rice;
- quinoa;
- beans.

COMPLEMENT

- avocado;
- sauce;
- cheese;
- seeds.

---

18. CERDO — HAWAIIAN

VEGETABLE / FIBER

- cabbage;
- carrot slaw;
- bell pepper.

CARBOHYDRATE

- rice.

COMPLEMENT

- sesame.

DEFAULT

Hawaiian Pork + cabbage-carrot slaw + rice + sesame

---

19. CERDO — MUSTARD-HONEY

VEGETABLE / FIBER

- green beans;
- salad;
- roasted vegetables.

CARBOHYDRATE

- potato.

COMPLEMENT

- olives;
- olive oil.

DEFAULT

Mustard-Honey Pork + green beans + potato

---

20. CERDO — CILANTRO + LEMON

VEGETABLE / FIBER

- green salad;
- cucumber;
- tomato;
- beans.

CARBOHYDRATE

- rice;
- rice + beans.

COMPLEMENT

- avocado.

DEFAULT

Cilantro-Lemon Pork + rice + beans + green salad + avocado

---

21. CERDO — ITALIAN

VEGETABLE / FIBER

- asparagus;
- tomato;
- mushrooms.

CARBOHYDRATE

- quinoa;
- pasta.

COMPLEMENT

- parmesan;
- olives.

DEFAULT

Italian Pork + asparagus + tomato + quinoa + parmesan

---

22. CERDO — BBQ

VEGETABLE / FIBER

- pico de gallo;
- cabbage;
- salad;
- corn.

CARBOHYDRATE

- potatoes;
- fries;
- yuca.

COMPLEMENT

- avocado.

DEFAULT

BBQ Pork + potatoes + pico de gallo + cabbage salad

---

23. CERDO — TERIYAKI

VEGETABLE / FIBER

- broccoli;
- bell pepper;
- carrots.

CARBOHYDRATE

- rice;
- quinoa.

COMPLEMENT

- sesame;
- almonds/nuts.

DEFAULT

Teriyaki Pork + broccoli + bell pepper + rice

---

24. CERDO — LIZANO

VEGETABLE / FIBER

- lentils;
- salad;
- chayote.

CARBOHYDRATE

- rice;
- lentils;
- beans.

COMPLEMENT

- avocado.

DEFAULT

Lizano Pork + lentils + green salad + avocado

---

25. CERDO — MEXICAN

VEGETABLE / FIBER

- peppers;
- onions;
- lettuce;
- cabbage;
- pico de gallo.

CARBOHYDRATE

- tortillas;
- rice;
- beans.

COMPLEMENT

- cheese;
- guacamole.

POSSIBLE BUILDS

- burrito;
- fajita;
- taco;
- bowl.

---

26. CERDO — BEANS / LEGUMES

For:

- pork + beans;
- pork + chickpeas;
- pork + legumes.

These meals already contain significant fiber and carbohydrate.

ADD

- green salad;
- tomato;

- cucumber;
- cabbage.

OPTIONAL CARB

- rice;
- bread;

only if desired.

COMPLEMENT

- avocado.

---

27. CERDO — CHULETAS

Because chops can be prepared with several marinades, choose sides according to flavor.

DEFAULT TICO-STYLE

- white rice;
- salad;
- vegetables.

Important house preference:

DO NOT DEFAULT TO GALLO PINTO WITH PORK CHOPS

White rice is preferred.

---

28. RES — BISTEC ENCEBOLLADO

VEGETABLE / FIBER

- onion;
- green salad;
- tomato;
- cucumber.

CARBOHYDRATE

- rice;
- beans;
- rice + beans.

COMPLEMENT

- avocado.

DEFAULT

Bistec Encebollado + rice + beans + salad

---

29. RES — BEEF & BROCCOLI

VEGETABLE / FIBER

- broccoli.

Optional:

- carrot;
- bell pepper.

CARBOHYDRATE

- rice.

COMPLEMENT

- sesame;
- sesame oil.

DEFAULT

Beef & Broccoli + rice + sesame

---

30. RES — CARNE EN SALSA

VEGETABLE / FIBER

Can include:

- carrots;
- mushrooms;
- peas;
- vegetables in sauce.

CARBOHYDRATE

Choose:

- potato;
- rice.

COMPLEMENT

- salad;
- avocado.

---

31. RES — CARNE EN SALSA WITH MUSHROOMS

VEGETABLE

- mushrooms;
- onion.

CARBOHYDRATE

- mashed potato;
- rice;
- pasta depending on recipe.

COMPLEMENT

- green vegetables.

---

32. RES — BEEF STEW

The stew itself may contain:

- beef;
- potato;
- carrot;
- vegetables.

Therefore it may already be a complete one-pot meal.

Optional:

- bread;
- salad.

Do not automatically add another large carbohydrate if the stew already contains potato.

---

33. RES — HAMBURGERS

VEGETABLE / FIBER

- lettuce;
- tomato;
- onion;
- pickles;
- side salad.

CARBOHYDRATE

- burger bun;
- fries;
- potato wedges.

COMPLEMENT

- cheese;
- avocado;
- sauces.

DEFAULT SUNDAY SPECIAL

Burger + freezer fries + salad/pickles

---

34. RES — PAPAS RELLENAS

The potato already functions as the main carbohydrate.

FILLING

- ground beef;
- cheese.

VEGETABLE / FIBER

Serve with:

- salad;
- tomato;
- cucumber;
- cabbage.

No additional rice is necessary by default.

---

35. RES — PASTA BOWL

PROTEIN

Ground beef.

VEGETABLES

- corn;
- mushrooms;
- tomato;
- onion;
- garlic.

CARBOHYDRATE

- pasta.

COMPLEMENT

- parmesan;
- olives.

This is designed as a full bowl.

---

36. RES — FAJITAS

VEGETABLE / FIBER

- peppers;
- onions;
- lettuce;
- tomato.

CARBOHYDRATE

- tortillas;
- rice.

COMPLEMENT

- avocado;
- cheese;
- pico.

---

37. RES — TACOS

VEGETABLE / FIBER

- cabbage;
- lettuce;
- pico;
- onion.

CARBOHYDRATE

- tortillas.

COMPLEMENT

- avocado;
- cheese;
- salsa.

---

38. RES — NEW YORK STEAK

Primarily:

SUNDAY SPECIAL

VEGETABLE / FIBER

Choose:

- asparagus;
- green beans;
- salad;
- mushrooms.

CARBOHYDRATE

Choose:

- potato;
- fries;
- mashed potato;
- rice.

COMPLEMENT

- garlic/herb finish;
- avocado;
- chimichurri if desired.

DEFAULT

New York Steak + asparagus + potato

---

39. SEAFOOD — SALMON TERIYAKI

VEGETABLE / FIBER

- broccoli;
- asparagus;
- carrot.

CARBOHYDRATE

- quinoa;
- rice.

COMPLEMENT

- avocado;
- sesame.

DEFAULT

Salmon Teriyaki + quinoa + broccoli + avocado

---

40. SEAFOOD — TUNA STEAK

VEGETABLE / FIBER

- cucumber;
- carrot;
- cabbage;
- edamame;
- greens.

CARBOHYDRATE

- rice.

COMPLEMENT

- soy-mayo sauce;
- sesame;
- avocado.

DEFAULT

Tuna Steak Bowl + rice + cucumber + carrot + cabbage + soy-mayo

41. SEAFOOD — TILAPIA EMPANIZADA

VEGETABLE / FIBER

- salad;
- cabbage;
- cucumber;
- green beans.

CARBOHYDRATE

Choose:

- rice;
- potato;
- fries.

COMPLEMENT

- lemon;
- sauce if desired.

DEFAULT

Crispy Tilapia + potato + salad

---

42. SEAFOOD — TILAPIA FRITA

VEGETABLE / FIBER

- cabbage salad;
- tomato;
- cucumber.

CARBOHYDRATE

- rice;
- fries;
- potato.

COMPLEMENT

- lemon.

---

43. SEAFOOD — TILAPIA AL AJILLO

VEGETABLE / FIBER

- green salad;
- vegetables.

CARBOHYDRATE

- rice + beans.

COMPLEMENT

- lemon;
- avocado optional.

DEFAULT

Tilapia al Ajillo + rice + beans + salad

---

44. SEAFOOD — SHRIMP TACOS

VEGETABLE / FIBER

- cabbage slaw;
- pico de gallo;
- lettuce.

CARBOHYDRATE

- tortillas.

COMPLEMENT

- avocado;
- sauce.

DEFAULT

Shrimp Tacos + slaw + pico + avocado

---

45. SEAFOOD — SHRIMP BOWL

VEGETABLE / FIBER

- cucumber;
- cabbage;
- carrot;
- broccoli;
- corn.

CARBOHYDRATE

- rice;
- quinoa.

COMPLEMENT

- avocado;
- sauce.

---

46. FLEX — CANNED TUNA + RICE

This is different from Tuna Steak.

PROTEIN

Canned tuna.

CARBOHYDRATE

Rice.

ADD

When available:

- cucumber;
- avocado;
- vegetables;
- soy;
- mayo-style sauce.

Use primarily for:

FLEX DINNER

---

47. LEGUME-BASED MEALS

Legumes can act as both:

- fiber;
- carbohydrate;
- partial protein.

Examples:

- lentils;
- chickpeas;
- beans.

When a meal already contains a large serving of legumes:

do not automatically add:

large portion of rice + bread + potato

unless appetite or recipe calls for it.

---

48. SOUP COMBINATION RULE

Some soups are complete meals.

Examples:

- olla de carne;
- chicken gnocchi;
- pozole;
- lasagna soup;
- lentils with chicken.

Ask:

DOES THE SOUP ALREADY CONTAIN?

- protein;
- carbohydrate;
- vegetables?

If yes:

simple side only.

Examples:

- salad;
- bread;
- avocado;
- fruit.

---

49. PASTA RULE

When pasta is the principal carbohydrate:

avoid automatically adding another large starch.

Build around:

PASTA + PROTEIN + VEGETABLE

Examples:

Chicken pasta + mushrooms + spinach

not necessarily:

pasta + bread + potato + rice

---

50. BOWL FORMULA

Bowls are the easiest flexible format.

Use:

BASE

- rice;
- quinoa;
- beans.

PROTEIN

Any prepared protein.

VEGETABLES

2–3 available options.

COMPLEMENT

- avocado;
- sauce;
- cheese;
- sesame;
- nuts.

---

51. TACO FORMULA

TORTILLA

PROTEIN

Chicken / pork / beef / shrimp

CRUNCH / FIBER

- cabbage;
- lettuce;
- onion;
- pico.

FAT / COMPLEMENT

- avocado;
- cheese;
- sauce.

---

52. BURRITO FORMULA

TORTILLA

PROTEIN

BEANS / RICE

VEGETABLE

COMPLEMENT

- cheese;
- avocado;
- salsa.

Do not overfill with rice while leaving little protein.

---

53. “USE WHAT IS OPEN” RULE

If Meal Combination Library says:

broccoli

but refrigerator contains:

asparagus that needs to be used today

use asparagus.

The combinations are templates.

Food preservation takes priority over following a combination literally.

---

54. “NO EXTRA SHOPPING” RULE

If the recommended side is unavailable but an equivalent exists:

substitute.

Examples:

No quinoa

Use rice.

No broccoli

Use green beans.

No avocado

Use olives or another complement.

No asparagus

Use salad.

The library should reduce shopping.

Not create more of it.

---

55. COLOR / VARIETY CHECK

When practical, try to include at least:

- one protein;
- one plant component;
- one energy source.

If the meal visually contains only:

brown meat + white rice

check whether a vegetable or fruit can be added easily.

---

56. FASTEST SIDE OPTIONS

For difficult days:

VEGETABLE

- frozen broccoli;
- frozen green beans;
- peas + carrots;
- simple salad.

CARB

- rice cooker rice;
- freezer potatoes;
- tortillas.

COMPLEMENT

- avocado;
- olives;
- cheese.

A complete meal does not need elaborate sides.

---

57. SUNDAY SPECIAL RULE

Sunday lunch may intentionally be slightly more elaborate.

Good candidates:

- steak;
- salmon;
- tuna steak;
- shrimp;
- burgers;
- specialty Recipe Library meal.

Still cook:

1 UNIT / 4 PLATES

Serve:

2 Sunday lunch.

Pack:

2 Monday lunch.

---

58. FLEX DINNER RULE

Flex dinners do not need to match the protein rotation.

Options:

- ramen;
- dumplings;
- rice + canned tuna;
- quesadillas;
- sandwiches;
- eggdrop soup;
- tomato soup + bread;
- leftovers;
- bowls.

The goal is:

EASY + ENOUGH

not:

CREATE ANOTHER FULL COOKING PROJECT

---

59. QUICK DECISION TABLE

Protein available	Fast direction
Teriyaki chicken	Rice + frozen broccoli
Mexican chicken	Tortillas + peppers + avocado
Lizano chicken	Rice + beans + chayote
BBQ chicken	Potatoes + slaw
Italian chicken	Pasta + mushrooms
Pork chunks	Beans/legumes + rice
Pork chops	White rice + vegetable
Ground beef	Burrito / bowl / pasta
Beef strips	Beef & broccoli / fajitas
Beef cubes	Carne en salsa / stew
Salmon	Quinoa/rice + green vegetable
Tuna steak	Rice bowl
Tilapia	Potato/rice + salad
Shrimp	Tacos / bowl

60. MEAL PLANNING RULE

Google Sheets should record:

DISH + SIDES

Example:

Beef & Broccoli + Rice

or:

BBQ Pork + Potato Wedges + Slaw

Do not put the full recipe in the weekly menu.

The recipe belongs in:

08. RECIPE LIBRARY

PRINCIPIO CENTRAL

The Meal Combination Library is not a list of mandatory meals.

It is a decision shortcut.

PROTEIN TELLS YOU WHERE TO START.

INVENTORY TELLS YOU WHAT SIDES MAKE SENSE.

RECIPE LIBRARY TELLS YOU HOW TO COOK IT.

The best combination is usually the one that:

- uses what is already available;
- uses fresh food before it spoils;
- fits the flavor of the protein;
- and does not create unnecessary extra work.

08. RECIPE LIBRARY

OBJETIVO

El Recipe Library contiene las preparaciones que forman parte real del repertorio de la casa.

Una receta entra aquí cuando:

- encaja con el sistema de alimentación;
- puede repetirse;
- no genera trabajo innecesario;
- utiliza ingredientes que normalmente existen en casa;
- o vale la pena comprar ingredientes específicos para prepararla.

La prioridad del plan alimenticio es reducir carga mental mediante alimentos base, combinaciones predefinidas y comidas repetibles, no buscar una receta nueva todos los días.

---

1. YIELD SYSTEM

La receta estándar utiliza:

1 UNIT = 4 PLATES

Es decir:

- 2 platos → comida actual.
- 2 platos → comida siguiente.

Cuando una preparación naturalmente funciona mejor en mayor cantidad:

- soups;
- stews;
- olla de carne;
- pozole;
- legumes;

se conserva su rendimiento lógico.

---

2. RECIPE PRIORITY

Antes de cocinar:

1. Revisar Recipe Library.
2. Revisar Marinade Library.
3. Revisar Meal Combination Library.
4. Utilizar ingredientes disponibles.
5. Buscar una receta nueva únicamente cuando realmente se quiera introducir algo diferente.

CHICKEN

3. MASTER SKILLET CHICKEN

Esta técnica aplica a:

- Teriyaki Chicken
- Mustard-Honey Chicken
- Mexican Chicken
- Lizano Chicken
- Cilantro-Lemon Chicken
- BBQ Chicken
- Italian Chicken
- Cheese + Nutmeg Chicken

YIELD

1 unit / 4 plates.

INGREDIENTS

- 1 unit marinated chicken filets
- 1 tbsp oil as needed
- 2–4 tbsp water or chicken broth if sauce needs loosening

METHOD

1. Thaw chicken completely in refrigerator.
2. Heat large skillet over medium-high heat.
3. Add a small amount of oil if needed.
4. Remove chicken from bag, allowing excess marinade to drip off.
5. Sear without constantly moving.
6. Turn once the first side develops good color.
7. Reduce heat to medium if marinade begins browning too rapidly.
8. Cook until chicken reaches **165°F** internally.
9. Add a splash of broth or water if the fond/marinade needs to become a light pan sauce.
10. Rest several minutes.
11. Slice when appropriate.
12. Serve according to Meal Combination Library.

BBQ EXCEPTION

Add additional clean BBQ sauce near the end.

Do not pour raw marinade over cooked chicken.

---

4. MASTER CHICKEN CHUNKS

For:

- chicken bowls;
- fajitas;
- curry prep;

- taco chicken;
- pasta chicken;
- stir-fries.

YIELD

1 unit.

METHOD

1. Pat thawed chicken chunks lightly dry when not using a wet marinade.
2. Heat skillet over medium-high heat.
3. Add approximately 1 tbsp oil.
4. Spread chicken in a single layer.
5. Allow it to brown before stirring.
6. Cook until no raw center remains and internal temperature reaches 165°F.
7. Remove before adding sauces when the recipe requires a separate sauce.

Do not overcrowd the pan.

Cook in two batches when necessary.

---

5. CHICKEN CURRY — CREAMY, NO COCONUT MILK

YIELD

1 unit / 4 plates.

This version keeps the creamy curry style already used in the house, using broth and a modest amount of cream rather than coconut milk. A Food Network curry uses the same basic technique of browning chicken, blooming curry spices, thickening with flour and stock, and finishing with cream. (foodnetwork.com)

INGREDIENTS

- 1½ lb chicken breast, cubed
- 1 tbsp oil
- 1 tbsp butter
- 1 small onion, diced
- 2 garlic cloves, minced
- 2 carrots, sliced
- 1 cup peas
- 1½ tbsp curry powder
- ½ tsp cumin
- ¼ tsp cinnamon
- ½ tsp turmeric, optional
- 2 tbsp flour
- 1½ cups chicken broth
- ½ cup heavy cream
- salt
- black pepper
- cilantro for finishing, optional

METHOD

1. Season chicken lightly with salt and pepper.

2. Heat oil and butter in a large skillet.
3. Brown chicken and remove before completely cooked.
4. Add onion and carrots.
5. Cook until onion begins softening.
6. Add garlic.
7. Add curry powder, cumin, cinnamon and turmeric.
8. Stir approximately 30 seconds.
9. Sprinkle flour over vegetables and mix.
10. Slowly add chicken broth while stirring.
11. Return chicken.
12. Simmer gently until chicken and carrots are cooked.
13. Add peas.
14. Reduce heat.
15. Add heavy cream.
16. Simmer only until sauce thickens.
17. Adjust salt.
18. Finish with cilantro if desired.

SERVE WITH

Rice + vegetable.

---

6. CHICKEN TORTELLINI + BROCCOLI IN WHITE SAUCE

YIELD

1 unit / 4 generous plates.

A practical creamy tortellini base combines cheese tortellini, chicken, broccoli, broth and cream; similar tested versions use broccoli directly in the same pot and finish with cream cheese or Parmesan. (bettycrocker.com)

INGREDIENTS

- 12–14 oz cheese tortellini
- 1 lb chicken breast, small chunks
- 2 cups broccoli florets
- 1 tbsp butter
- 2 garlic cloves
- 1 cup chicken broth
- ¾ cup heavy cream
- ½ cup Parmesan
- 2 oz cream cheese, optional
- ½ tsp Italian seasoning
- salt
- pepper

METHOD

1. Cook tortellini according to its package until just al dente.
2. Reserve a little pasta water.
3. Season chicken with salt and pepper.
4. Brown chicken in butter.
5. Add garlic and Italian seasoning.

6. Add broccoli.
7. Add chicken broth.
8. Cover briefly until broccoli becomes crisp-tender.
9. Reduce heat.
10. Add heavy cream.
11. Add Parmesan.
12. Add cream cheese if a thicker sauce is desired.
13. Return tortellini.
14. Toss gently.
15. Add pasta water if sauce becomes too thick.
16. Adjust salt and pepper.

Do not boil aggressively after adding cream.

---

7. POLLO SUDADO

YIELD

1 unit.

INGREDIENTS

- 1 unit bone-in chicken
- 1 small onion
- ½ bell pepper
- 2 garlic cloves
- 1 tomato
- 1 carrot
- 1–2 potatoes, optional
- 1 tsp oregano
- ½ tsp paprika
- small pinch thyme
- salt
- pepper
- 1–1½ cups chicken broth or water
- cilantro

METHOD

1. Season chicken.
2. Brown lightly in a pot.
3. Remove temporarily.
4. Sauté onion and bell pepper.
5. Add garlic.
6. Add tomato and seasonings.
7. Return chicken.
8. Add broth.
9. Add carrots and potato if using.
10. Cover.
11. Simmer gently until chicken is completely cooked and vegetables are tender.
12. Uncover near the end if the sauce needs reduction.
13. Finish with cilantro.

---

8. BONE-IN HERB CHICKEN — OVEN

YIELD

1 unit.

Use the Herb seasoning from Section 06.

METHOD

1. Thaw completely.
2. Heat oven to **400°F**.
3. Arrange chicken with space between pieces.
4. Roast until browned and fully cooked.
5. Begin checking around 35 minutes for smaller pieces.
6. Larger bone-in pieces may require approximately 40–50 minutes.
7. Confirm doneness rather than relying only on time.
8. Rest before serving.

---

9. BBQ WINGS

Use the BBQ Wings preparation in Section 06.

METHOD

1. Bake or air-fry until nearly crisp.
2. Toss/brush with clean BBQ sauce near the end.
3. Return briefly to heat to set glaze.
4. Serve immediately.

---

10. CHICKEN FAJITAS

INGREDIENTS

- 1 unit Mexican chicken chunks
- 2 bell peppers, sliced
- 1 onion, sliced
- tortillas
- avocado / guacamole
- salsa

METHOD

1. Cook chicken over high heat until browned.
2. Remove.
3. Sauté peppers and onions until tender but not mushy.
4. Return chicken.
5. Toss together.
6. Serve with warm tortillas.

---

11. CHICKEN BOWL

FORMULA

- 1 unit cooked chicken
- rice or quinoa
- 2 vegetables
- avocado or sauce

No additional recipe required.

Use Meal Combination Library to select the build.

PORK

12. MASTER MARINATED PORK

Use for:

- Hawaiian
- Mustard-Honey
- Cilantro-Lemon
- Italian
- BBQ
- Teriyaki
- Lizano
- Mexican

METHOD

For chunks:

1. Heat skillet over medium-high heat.
2. Brown pork in a single layer.
3. Reduce heat.
4. Cook until properly done.
5. Add extra clean sauce only when recipe calls for it.

For chops:

1. Sear first side without moving.
2. Turn.
3. Reduce heat if necessary.
4. Cook to at least **145°F** internal temperature.
5. Rest at least 3 minutes.

---

13. CHULETAS

YIELD

1 unit.

SIMPLE HOUSE VERSION

- 1 unit pork chops
- salt
- pepper
- garlic
- paprika
- 1 tbsp oil

METHOD

1. Season chops.
2. Heat skillet well.
3. Sear approximately 3–5 minutes per side depending on thickness.
4. Reduce heat if needed.
5. Cook through without drying.
6. Rest before serving.

HOUSE SIDE RULE

Prefer:

white rice + vegetable/salad

rather than gallo pinto.

---

14. CERDO CON FRIJOLES / LEGUMBRES

YIELD

Approximately 4–6 plates.

INGREDIENTS

- 1–1½ lb pork chunks
- 3 cups cooked beans or legumes
- 1 small onion
- ½ bell pepper
- 2 garlic cloves
- 1 celery stalk
- 1 tomato
- 1 carrot
- ½ tsp oregano
- paprika
- salt
- pepper
- broth as needed
- cilantro

METHOD

1. Brown pork.
2. Remove temporarily.
3. Sauté onion, bell pepper and celery.
4. Add garlic.
5. Add tomato and seasonings.
6. Return pork.
7. Add legumes and enough broth for desired consistency.
8. Simmer until pork is tender and flavors combine.
9. Finish with cilantro.

---

15. GARBANZOS CON CERDO

YIELD

Approximately 6 plates.

Garbanzos and pork are commonly built as a stew with onion, pepper, tomato, carrot, celery and herbs; versions also pair the dish with rice. (youtube.com)

INGREDIENTS

- 1½ cups dry chickpeas, soaked overnight
- 1½ lb pork chunks
- 1 onion
- ½ bell pepper
- 2 garlic cloves
- 1 carrot
- 1 celery stalk
- 1 small tomato

- ½ tsp oregano
- 1 tsp paprika
- salt
- pepper
- cilantro
- water/broth

PRESSURE COOKER METHOD

1. Soak chickpeas overnight.
2. Drain.
3. Brown pork lightly if desired.
4. Add chickpeas, pork, onion, pepper, garlic, carrot, celery and tomato.
5. Cover sufficiently with water/broth.
6. Season lightly.
7. Pressure cook until chickpeas are tender while monitoring the cut of pork used.
8. Allow natural pressure release.
9. If chickpeas need more time but pork is already tender, remove pork and continue cooking chickpeas.
10. Return pork.
11. Simmer uncovered if broth needs thickening.
12. Adjust salt.
13. Finish with cilantro.

---

16. GROUND PORK MEATBALLS

YIELD

1 unit.

INGREDIENTS

- 1½ lb ground pork
- 1 egg
- ½ cup breadcrumbs
- 2 garlic cloves
- ¼ cup finely diced onion
- ½ tsp oregano
- ¾ tsp salt
- pepper

METHOD

1. Mix only until combined.
2. Form meatballs.
3. Bake at **400°F** or brown in skillet.
4. Finish in sauce or soup depending on recipe.

BEEF

17. BISTEC ENCEBOLLADO

YIELD

1 unit.

Use the house Lizano-based seasoning from Section 06.

ADDITIONAL INGREDIENTS

- 1½–2 lb thin steak
- 2 onions, julienned
- 1 tbsp oil
- splash beef broth if needed

METHOD

1. Marinate beef 30 minutes–2 hours.
2. Heat skillet very well.
3. Cook steaks quickly in batches.
4. Remove.
5. Add onions to same skillet.
6. Cook until softened and lightly browned.
7. Deglaze with a small amount of broth if needed.
8. Return beef briefly.
9. Coat with onions and pan juices.

A classic bistec encebollado similarly centers thin steak and a generous onion preparation, traditionally served with rice and beans. (mycolombianrecipes.com)

---

18. BEEF & BROCCOLI

YIELD

1 unit.

The restaurant-style technique works best when beef is treated separately, broccoli is briefly blanched, beef is seared quickly and everything is combined only at the end. (thewoksoflife.com)

INGREDIENTS

Beef

- 1½ lb thinly sliced beef
- Section 06 Beef & Broccoli velvet mixture

Sauce

- ⅔ cup chicken or beef broth
- 2 tbsp soy sauce
- 1½ tbsp oyster sauce
- ½ tsp sesame oil
- 1 tsp sugar/Lakanto

- 1 tbsp cornstarch + 2 tbsp water

Rest

- 4–5 cups broccoli
- 2 garlic cloves
- ½ tsp ginger
- oil

METHOD

1. Velvet beef briefly.
2. Blanch broccoli approximately 45–60 seconds.
3. Drain thoroughly.
4. Heat wok/skillet until very hot.
5. Sear beef quickly in batches.
6. Remove.
7. Add garlic and ginger.
8. Add sauce ingredients except slurry.
9. Simmer.
10. Add slurry gradually.
11. Return beef and broccoli.
12. Toss just until coated.
13. Serve immediately with rice.

---

19. CARNE EN SALSA

YIELD

1 unit.

INGREDIENTS

- 1½ lb beef cubes
- 1 tbsp oil
- 1 onion
- ½ bell pepper
- 2 garlic cloves
- 1 tomato
- 1 carrot
- 2 potatoes, optional
- 1½ cups beef broth
- oregano
- thyme, small amount
- salt
- pepper

METHOD

1. Brown beef in batches.
2. Remove.
3. Sauté onion and bell pepper.
4. Add garlic and tomato.
5. Return beef.
6. Add broth and seasonings.

7. Cover and simmer until beef begins becoming tender.
8. Add carrot and potato at the appropriate point so they do not disintegrate.
9. Finish uncovered if sauce needs reduction.

---

20. CARNE EN SALSA + MUSHROOMS

Use Carne en Salsa recipe.

Add:

- 8 oz mushrooms, sliced.

Sauté mushrooms separately until browned.

Add during the final 10–15 minutes.

This prevents them from turning watery and disappearing into the sauce.

---

21. BEEF STEW

YIELD

6 plates.

A classic stew structure uses approximately 1½ lb or more of cubed beef, onion, carrots, celery, garlic and stock, simmered slowly until tender. (foodnetwork.com)

INGREDIENTS

- 2 lb beef cubes
- 1 onion
- 2 carrots
- 2 celery stalks
- 3 garlic cloves
- 2 potatoes
- 1 tbsp tomato paste
- 4 cups beef broth
- 1 tsp thyme
- salt
- pepper
- 1 tbsp cornstarch + water if needed

METHOD

1. Brown beef.
2. Remove.
3. Sauté onion, carrot and celery.
4. Add garlic and tomato paste.
5. Return beef.
6. Add broth and thyme.
7. Simmer covered until beef begins tenderizing.
8. Add potatoes.
9. Continue until everything is tender.

10. Thicken lightly only if needed.

---

22. HAMBURGERS

YIELD

1 unit.

Using the higher-fat ground beef prepared specifically for burgers:

- 1½–2 lb burger blend
- salt
- pepper

METHOD

1. Divide into 4 patties.
2. Shape gently without compacting excessively.
3. Create slight indentation in center.
4. Season exterior shortly before cooking.
5. Grill or sear.
6. Add cheese near end if desired.
7. Serve with buns + vegetables + freezer fries.

---

23. MEXICAN GROUND BEEF

For:

- burritos;
- bowls;
- tacos.

INGREDIENTS

- 1 unit lean ground beef
- ½ onion
- 2 garlic cloves
- 1 tsp chili powder
- 1 tsp paprika
- ½ tsp cumin
- ½ tsp oregano
- salt
- pepper
- lime at end

METHOD

1. Brown ground beef.
2. Add onion.
3. Drain excess fat if necessary.
4. Add garlic and seasonings.
5. Cook until aromatic.
6. Add splash of water if seasoning needs distributing.

7. Finish with lime.

---

24. PAPAS RELLENAS

YIELD

4 large servings.

FILLING

Use Mexican Ground Beef.

POTATO

- 4 large baked potatoes
- ground beef
- cheese
- optional Greek yogurt/sour cream
- green onion

METHOD

1. Bake potatoes until completely tender.
2. Split.
3. Fluff interior.
4. Add beef.
5. Add cheese.
6. Return briefly to oven if desired.
7. Serve with salad.

---

25. PASTA BOWL

YIELD

1 unit.

INGREDIENTS

- 1 lb lean ground beef
- 10–12 oz pasta
- 1 cup mushrooms
- 1 cup corn
- 1 tomato or tomato sauce
- ½ onion
- 2 garlic cloves
- Parmesan
- olives optional

METHOD

1. Cook pasta al dente.
2. Brown beef.
3. Add onion and garlic.
4. Add mushrooms.

5. Add tomato and corn.
6. Season Italian-style.
7. Toss with pasta.
8. Add pasta water if needed.
9. Finish with Parmesan.

---

26. BEEF FAJITAS / TACOS

Use thin-cut beef.

FAJITA

Cook with:

- peppers;
- onions;
- Mexican seasoning.

TACOS

Cook beef quickly, slice/chop and serve with:

- tortillas;
- cabbage/onion;
- pico;
- avocado.

---

27. NEW YORK STEAK

YIELD

1 unit = 4 steaks.

METHOD

1. Remove surface moisture.
2. Season with salt and pepper.
3. Heat grill or heavy skillet very well.
4. Cook according to steak thickness and preferred doneness.
5. Flip as needed for even cooking.
6. Rest before cutting.

Do not marinate by default.

SEAFOOD

28. CRISPY CORNFLAKE TILAPIA

YIELD

1 unit.

INGREDIENTS

- 4–6 tilapia fillets depending on size
- ½ cup sour cream
- ¼ cup milk or water
- 1 tsp paprika
- ½ tsp garlic powder
- ½ tsp onion powder
- salt
- pepper
- 3 cups crushed cornflakes
- ½ cup flour

A cereal crumb coating is a proven way to make tilapia crunchy; cornflakes work as a direct substitute for other crisp cereals. (kosher.com)

METHOD

1. Pat fish very dry.
2. Mix sour cream + liquid until buttermilk-like.
3. Season fish.
4. Dredge lightly in flour.
5. Dip in sour cream mixture.
6. Press into crushed cornflakes.
7. Spray/drizzle lightly with oil.
8. Bake at **425°F** or air-fry until crisp and fish reaches doneness.
9. Serve immediately.

---

29. FRIED TILAPIA

YIELD

1 unit.

COATING

- 4–6 tilapia fillets
- 1 cup flour
- ½ cup cornmeal
- paprika
- garlic powder
- onion powder
- salt
- pepper
- 1 cup buttermilk

METHOD

1. Pat fish dry.
2. Season.
3. Dip in buttermilk.
4. Coat thoroughly in seasoned flour/cornmeal.
5. Rest coating 5–10 minutes.
6. Heat oil to approximately **350°F**.
7. Fry in batches.
8. Do not overcrowd.
9. Drain on rack rather than stacking.

---

30. TILAPIA AL AJILLO

YIELD

1 unit.

A simple garlic tilapia uses fish, garlic, olive oil, salt, pepper and lemon, cooking the garlic gently so it becomes golden rather than burnt. (food.com)

INGREDIENTS

- 4–6 tilapia fillets
- 4 garlic cloves, thinly sliced
- 2 tbsp olive oil
- salt
- pepper
- 1 lemon
- parsley or cilantro

METHOD

1. Season fish.
2. Heat olive oil over medium heat.
3. Add fish.
4. After approximately 1–2 minutes add sliced garlic.
5. Turn fish carefully once.
6. Move garlic on top of fish if it browns too quickly.
7. Cook until fish flakes easily.
8. Finish with fresh lemon and herbs.

---

31. SALMON TERIYAKI

YIELD

1 unit.

Use Section 06 Salmon Teriyaki sauce.

A traditional pan-grilled approach cooks salmon first and finishes it by reducing teriyaki sauce around the fish rather than soaking it for hours. (justonecookbook.com)

METHOD

1. Marinate briefly according to Section 06.
2. Remove excess marinade.
3. Pan-sear salmon.
4. Turn carefully.
5. Add clean teriyaki sauce near end.
6. Allow sauce to reduce into glaze.
7. Serve immediately.

---

32. TUNA STEAK BOWL

YIELD

1 unit.

INGREDIENTS

- 4 tuna steaks
- Section 06 soy marinade
- rice
- cucumber
- carrot
- cabbage
- avocado
- sesame

MAYO SAUCE

Use Section 06 Tuna Mayo Sauce.

METHOD

1. Marinate tuna only 10–20 minutes.
2. Heat skillet very hot.
3. Sear according to preferred doneness and quality of tuna.
4. Rest briefly.
5. Slice.
6. Assemble over rice and vegetables.
7. Drizzle with sauce.

---

33. SHRIMP TACOS

YIELD

1 unit.

A practical taco method uses a short spice marinade, quick high-heat cooking and cabbage/slaw as the main vegetable component. (foodnetwork.com)

INGREDIENTS

- 1½ lb shrimp
- 1 tsp chili powder

- ½ tsp cumin
- 1 tsp smoked paprika
- garlic powder
- lime zest
- 1 tbsp oil
- salt
- tortillas
- cabbage
- pico de gallo
- avocado
- lime

METHOD

1. Toss shrimp with spices and oil.
2. Marinate approximately 15 minutes.
3. Cook over high heat approximately 2–3 minutes per side depending on size.
4. Remove as soon as opaque.
5. Warm tortillas.
6. Assemble with cabbage, pico and avocado.
7. Squeeze lime at serving.

---

34. SHRIMP BOWL

Use same shrimp preparation.

Replace tortillas with:

- rice or quinoa.

Add:

- cucumber;
- cabbage;
- carrot;
- corn;
- avocado;
- desired sauce.

SOUPS & ONE-POT MEALS

35. SIMPLE CHICKEN SOUP

YIELD

6 plates.

INGREDIENTS

- 1½ lb chicken
- 6 cups chicken broth
- 2 carrots

- 2 celery stalks
- 1 onion
- 2 garlic cloves
- salt
- pepper
- cilantro
- optional rice/noodles/potato

METHOD

1. Cook onion, carrot and celery until beginning to soften.
2. Add garlic.
3. Add broth and chicken.
4. Simmer gently until chicken is cooked.
5. Shred or cube chicken.
6. Add starch if using.
7. Return chicken.
8. Adjust seasoning.
9. Finish with cilantro.

A basic chicken soup can easily accept rice, gnocchi, tortellini or additional vegetables without changing its core structure. (foodnetwork.com)

---

36. CHICKEN GNOCCHI SOUP

YIELD

4–6 plates.

A straightforward version uses chicken broth, carrots, celery, garlic, gnocchi, peas and cooked chicken. (foodnetwork.com)

INGREDIENTS

- 6 cups chicken broth
- 2 cups cooked chicken
- 11–12 oz potato gnocchi
- 2 carrots
- 1 celery stalk
- 3 garlic cloves
- 1 cup peas
- 2 cups spinach
- ½ cup heavy cream, optional for creamy version
- Parmesan
- salt
- pepper

METHOD

1. Sauté carrots and celery.
2. Add garlic.
3. Add broth.
4. Bring to simmer.
5. Add gnocchi.
6. Cook until tender.

7. Add chicken, peas and spinach.
8. Add cream if making creamy version.
9. Season.
10. Finish with Parmesan.

---

37. POZOLE ROJO

YIELD

8 plates.

Traditional red pozole commonly combines pork shoulder/ribs, hominy and a guajillo-ancho chile sauce. (mexicoinmykitchen.com)

INGREDIENTS

- 2 lb pork shoulder
- 1 lb pork ribs
- 3 × 15 oz cans hominy, drained
- 1 onion
- 6 garlic cloves
- 4 guajillo chiles
- 4 ancho chiles
- salt
- water

TOPPINGS

- cabbage
- radish
- onion
- lime
- avocado
- cilantro

METHOD

1. Simmer pork with onion, garlic and salt until tender.
2. Toast/soften cleaned chiles.
3. Blend chiles with some broth and garlic.
4. Strain sauce if desired.
5. Add red sauce to pork broth.
6. Add hominy.
7. Simmer until flavors combine.
8. Adjust salt.
9. Serve with fresh toppings.

---

38. OLLA DE CARNE — HOUSE VERSION

YIELD

Approximately 6 generous servings.

MEAT

- 4–4½ lb bone-in beef

SEASONING

- garlic
- oregano
- small amount thyme
- black pepper
- salt

LIQUID

- approximately 8–10 cups water, adjusting as needed

VEGETABLES

- onion
- garlic
- celery
- culantro coyote/cilantro
- potato
- carrot
- corn
- sweet potato
- ayote/squash
- chayote
- yuca
- green plantain
- ripe plantain

METHOD

1. Season meat with garlic, oregano, thyme, pepper and salt.
2. Cook meat with water until tender; pressure cooking may be used.
3. Preserve the broth.
4. Add aromatics to broth before vegetables.
5. Add vegetables in groups according to cooking time.
6. Begin with firmer vegetables.
7. Add delicate/fast-cooking vegetables later.
8. Return meat.
9. Keep broth clear; do not blend vegetables.
10. Adjust salt before serving.

---

39. SOPA DE ALBÓNDIGAS

YIELD

6 plates.

MEATBALLS

- 1 lb ground meat
- 1 egg
- ⅓ cup breadcrumbs or cooked rice

- garlic
- onion
- salt
- pepper

SOUP

- 6 cups broth
- tomato
- onion
- carrot
- potato
- zucchini/chayote
- cilantro

METHOD

1. Form small meatballs.
2. Build broth with tomato, onion and garlic.
3. Add firmer vegetables.
4. Bring to gentle simmer.
5. Add meatballs.
6. Avoid vigorous stirring until meatballs set.
7. Finish cooking vegetables.
8. Add cilantro.

---

40. LASAGNA SOUP

YIELD

4–6 plates.

A reliable one-pot structure uses onion, ground meat, garlic, oregano, tomato paste, broth, tomatoes and broken lasagna noodles, with Parmesan and a little cream at the end. (foodnetwork.com)

INGREDIENTS

- 1 lb ground beef
- 8 oz lasagna noodles, broken
- 1 onion
- 3 garlic cloves
- 2 tbsp tomato paste
- 1 can crushed tomatoes
- 4 cups broth
- 1 tsp oregano
- ¼ cup heavy cream
- Parmesan
- ricotta optional

METHOD

1. Brown beef.
2. Add onion and garlic.
3. Add oregano and tomato paste.
4. Cook tomato paste briefly.

5. Add tomatoes and broth.
6. Simmer.
7. Cook noodles separately or directly depending on desired leftover texture.
8. Combine.
9. Add cream and Parmesan.
10. Top with ricotta if desired.

For leftovers, storing noodles separately gives better texture.

---

41. LENTILS WITH CHICKEN

YIELD

6 plates.

INGREDIENTS

- 1½ cups dry lentils
- 1 lb chicken
- 1 onion
- 1 carrot
- 1 celery stalk
- 2 garlic cloves
- 1 tomato
- 6 cups broth/water
- oregano
- salt
- pepper
- spinach optional

METHOD

1. Sauté aromatics.
2. Add garlic and tomato.
3. Add lentils and broth.
4. Simmer until partially tender.
5. Add chicken at the appropriate stage depending on cut.
6. Cook until lentils and chicken are done.
7. Add spinach near end if desired.
8. Adjust seasoning.

---

42. EGG DROP SOUP

YIELD

4–6 bowls.

The classic technique thickens seasoned chicken stock lightly with cornstarch, then drizzles beaten egg into moving hot broth to form egg ribbons. (thewoksoflife.com)

INGREDIENTS

- 4 cups chicken stock

- 3 eggs, lightly beaten
- 2 tbsp cornstarch
- ¼ cup water
- ½ tsp sesame oil
- white or black pepper
- salt
- green onion

METHOD

1. Bring stock to simmer.
2. Add sesame oil and seasoning.
3. Mix cornstarch with cold water.
4. Stir slurry into simmering broth.
5. Simmer until lightly thickened.
6. Stir soup in a circular motion.
7. Slowly drizzle beaten egg.
8. Stop stirring briefly so ribbons can set.
9. Finish with green onion.

---

43. BROCCOLI CHEESE SOUP

YIELD

6 bowls.

A tested cream-of-broccoli approach uses onion, garlic, broccoli, broth, cream, nutmeg and Cheddar. (onceuponachef.com)

INGREDIENTS

- 1½ lb broccoli
- 1 onion
- 2 garlic cloves
- 3 tbsp butter
- 4 cups broth
- ¾ cup cream or half-and-half
- 1½–2 cups Cheddar
- pinch nutmeg
- salt
- pepper

METHOD

1. Cook onion in butter.
2. Add garlic.
3. Add broccoli and broth.
4. Simmer until tender.
5. Blend part or all depending on preferred texture.
6. Return to low heat.
7. Add cream.
8. Add cheese gradually.
9. Do not boil aggressively after cheese.
10. Season with nutmeg, salt and pepper.

---

44. WHITE BEAN SOUP

YIELD

4–6 bowls.

White beans pair well with a simple aromatic base of onion, celery, carrot and garlic plus broth and greens. (foodnetwork.com)

INGREDIENTS

- 3 cups cooked white beans
- 1 onion
- 1 carrot
- 1 celery stalk
- 2 garlic cloves
- 4 cups chicken broth
- spinach
- oregano or rosemary
- olive oil
- salt
- pepper

METHOD

1. Sauté onion, carrot and celery.
2. Add garlic.
3. Add beans and broth.
4. Simmer 10–15 minutes.
5. Mash a small portion of beans to thicken naturally.
6. Add spinach.
7. Adjust seasoning.

---

45. TOMATO SOUP + BREAD

YIELD

4 bowls.

INGREDIENTS

- 1 tbsp olive oil or butter
- 1 onion
- 2 garlic cloves
- 28 oz canned tomatoes
- 2 cups broth
- ½ cup cream optional
- salt
- pepper
- basil/oregano

METHOD

1. Cook onion until soft.
2. Add garlic.

3. Add tomatoes and broth.
4. Simmer approximately 20 minutes.
5. Blend smooth.
6. Add cream if desired.
7. Adjust seasoning.
8. Serve with bread or grilled cheese-style toast.

---

46. RAMEN — FLEX VERSION

Ramen belongs to Flex Dinner.

BUILD

- ramen noodles
- broth/seasoning
- egg
- green onion
- frozen vegetables
- leftover protein if available

The goal is to turn ramen into a meal without turning it into a major cooking project.

---

47. KIMCHI STEW — QUICK HOUSE FORMAT

INGREDIENTS

- kimchi
- kimchi juice
- broth/water
- tofu
- pork or tuna optional
- green onion
- garlic
- gochugaru/gochujang if available

METHOD

1. Cook kimchi briefly.
2. Add garlic and optional meat.
3. Add broth and kimchi juice.
4. Simmer.
5. Add tofu near end.
6. Finish with green onion.

---

48. SOPA DE LEGUMBRES

FORMULA

Use:

- 2–3 legumes/vegetables available;
- onion;
- celery;
- garlic;
- tomato;
- broth;
- herbs.

The exact combination can change.

This is an inventory-use recipe rather than a fixed formula.

---

49. SOPA DE FIDEOS DE YAYI

HOUSE RECIPE — PRESERVE

The existing Kitchen Manual identifies this specifically as:

Sopa de fideos de Yayi.

Because that name refers to a specific family preparation and its exact formula has not been documented in the material available here, do **not** silently replace it with a generic internet sopa de fideos.

Until the house version is documented, keep the entry by name rather than creating a fake “Yayi recipe.”

---

50. FRENCH GARLIC CHICKEN

HOUSE RECIPE NAME — PRESERVE

The existing library names this preparation but does not define whether it refers to:

- a 40-clove-style French garlic chicken;
- creamy garlic chicken;
- or another house recipe.

Do not replace it automatically.

Keep the name in the Recipe Library until its exact house version is identified.

QUICK / FLEX RECIPES

51. ARROZ CON ATÚN

FOR TWO

- cooked rice

- 1–2 cans tuna
- mayo or desired sauce
- optional cucumber
- avocado
- soy sauce optional

Mix or assemble as a bowl.

This uses:

CANNED TUNA

not Tuna Steak.

---

52. QUESADILLAS

BASE

- tortillas
- cheese

Optional:

- chicken;
- turkey;
- beans;
- vegetables.

Cook in dry/lightly greased skillet until tortilla is crisp and cheese melts.

---

53. DUMPLINGS

Keep frozen.

Cook according to package method:

- steam;
- pan-fry;
- boil;

depending on type.

Add:

- cucumber;
- edamame;
- vegetables;
- simple soy dipping sauce;

when a more complete dinner is desired.

---

54. LEFTOVER BOWL

Use:

- leftover protein
- rice/quinoa
- vegetable
- sauce/complement

This recipe exists specifically to prevent small amounts of food from being wasted.

---

55. BREAKFAST RECIPES

Breakfast recipes live in:

05. BREAKFAST SYSTEM

They remain part of the overall Recipe Library but are not duplicated here.

Includes:

- Protein Smoothie
- Gallo Pinto Breakfast
- Eggs + Toast
- Omelette
- Breakfast Burrito
- Breakfast Quesadilla
- Pancakes
- Potato Waffles
- Potato Breakfast Bowl
- Oatmeal
- Cereal Build
- Greek Yogurt Bowl

---

56. MARINADE-BASED RECIPES

The following are complete recipes through the combination of Sections 06 + 07 + the Master Cooking Methods in this section:

CHICKEN

- Chicken Teriyaki
- Chicken Mustard-Honey
- Chicken Mexican
- Chicken Lizano
- Chicken Cilantro-Lemon
- Chicken BBQ
- Chicken Italian
- Chicken Cheese + Nutmeg

PORK

- Pork Hawaiian
- Pork Mustard-Honey
- Pork Cilantro-Lemon
- Pork Italian
- Pork BBQ
- Pork Teriyaki
- Pork Lizano
- Pork Mexican

They do not need eight duplicate recipe cards each.

---

57. RECIPE CARD RULE GOING FORWARD

Every new recipe added to the manual should contain:

NAME

YIELD

Preferably in units / plates.

INGREDIENTS

Exact quantities.

METHOD

Clear numbered instructions.

FREEZER / STORAGE

When relevant.

SERVE WITH

Cross-reference Meal Combination Library.

NOTES

Only information that actually helps reproduce the dish.

---

58. NEW RECIPE ENTRY RULE

A new recipe enters this library only after answering:

- Did we like it?
- Would we make it again?
- Was the effort reasonable?
- Does it use ingredients that make sense for our kitchen?
- Does it fit the meal system?

If yes:

KEEP

If no:

DO NOT CATALOG IT

The Recipe Library is a collection of repeatable house food.

Not an archive of every recipe ever tried.

PRINCIPIO CENTRAL

The Recipe Library exists so that:

“WHAT DO I COOK?”

does not become:

“SEARCH THE INTERNET.”

The freezer provides the ingredient.

The Meal Combination Library provides the structure.

The Recipe Library provides the method.

And once a recipe has earned a place here, it should become easier to repeat every time.

09. FOOD STORAGE, FREEZER & REFRIGERATOR SYSTEM

OBJETIVO

Mantener los alimentos:

- seguros;
- visibles;
- fáciles de encontrar;
- correctamente rotados;
- protegidos contra derrames;
- y organizados según cómo realmente se utilizan.

El almacenamiento debe apoyar el sistema de cocina.

No basta con “guardar comida”.

La meta es que abrir el refrigerator o freezer permita responder rápidamente:

WHAT DO WE HAVE?

WHAT NEEDS TO BE USED FIRST?

WHAT IS READY FOR THE NEXT MEAL?

---

1. TEMPERATURE STANDARDS

REFRIGERATOR

Mantener a:

40°F / 4°C OR BELOW

FREEZER

Mantener a:

0°F / -18°C OR BELOW

No llenar excesivamente los espacios de manera que se bloquee la circulación de aire.

---

2. STORAGE PRINCIPLE

Cada alimento debe tener una categoría clara.

FREEZER

Principalmente:

- protein units;
- seafood;
- frozen vegetables;
- cooking bases;
- flavor cubes;
- breakfast prep;
- potato/root prep;
- smoothie fruit;
- some leftovers.

REFRIGERATOR

Principalmente:

- fresh produce;
- thawing protein;
- cooked meals;
- dairy;
- eggs;
- condiments;
- fresh herbs;
- quick proteins;
- leftovers.

PANTRY

Principalmente:

- dry legumes;
- rice;
- pasta;
- oats;
- canned tuna;
- seasonings;
- shelf-stable ingredients.

---

3. FREEZER ZONES

El freezer se divide por función.

ZONE 1 — CHICKEN

Mantener juntas todas las unidades de pollo.

Subcategorías:

- filets;
- chunks;
- bone-in.

Marinadas visibles hacia afuera.

ZONE 2 — PORK

Mantener juntas:

- chops;
- chunks;
- ground pork.

ZONE 3 — BEEF

Mantener juntas:

- thin-cut beef;
- beef cubes;
- burger ground;
- lean ground;
- steaks.

ZONE 4 — SEAFOOD

Mantener:

- salmon;
- tuna steak;
- tilapia;
- shrimp.

Seafood debe contarse por:

UNIT EQUIVALENT

no por cantidad de paquetes.

---

4. PRODUCE FREEZER ZONES

ZONE 5 — COOKING BASES

- onion;
- bell pepper;
- green onion.

ZONE 6 — FLAVOR CUBES

- garlic;
- cilantro;
- celery;
- pesto;
- sofrito.

ZONE 7 — VEGETABLES

- broccoli;
- cauliflower;
- peas;
- carrots;
- corn;
- green beans;
- other blanched vegetables.

ZONE 8 — BREAKFAST PREP

- breakfast potatoes;
- sautéed mushrooms;
- smoothie packs.

ZONE 9 — ROOTS / POTATO

- freezer fries;
- mashed potatoes;
- yuca.

ZONE 10 — FRUIT

- berries;
- banana;
- pineapple.

---

5. FREEZER ORGANIZATION RULE

Within each category:

OLDEST IN FRONT

NEWEST IN BACK

This is the default:

FIFO — FIRST IN, FIRST OUT

The goal is not perfect chronological precision.

The goal is simply to avoid repeatedly using the newest food while older food remains forgotten.

---

6. FREEZER INVENTORY

After Monthly Protein Prep:

Record:

Category	Target	Available
Chicken	10	___
Pork	6	___
Beef	5	___
Seafood	4	___
TOTAL	**25**	___

The number represents:

UNITS OF FOOD

not bags.

Example:

A large shrimp bag may equal:

2 units

and should be recorded accordingly.

---

7. FREEZER INVENTORY UPDATE RULE

The inventory does not need to be updated after every individual ingredient.

Protein stock is the priority.

Update:

MONTHLY

After Protein Prep.

WEEKLY

During Sunday Meal Planning if necessary.

IMMEDIATELY

When there is a major change such as:

- family meal using several units;
- buying a large meat package;
- freezing several leftovers;
- unexpected freezer cleanout.

---

8. PROTEIN PACKAGING

Whenever possible:

1 BAG = 1 UNIT

Each bag contains:

4 plates worth of protein.

This allows one freezer bag to equal one planned cooking event.

Use:

QUART FREEZER BAG

For compact units.

GALLON FREEZER BAG

For:

- bone-in chicken;
- large cuts;
- awkward shapes.

---

9. PROTEIN LABEL FORMAT

Every raw protein bag must include:

PROTEIN

CUT

MARINADE / UNSEASONED

UNIT QUANTITY

DATE

RAW

Example:

CHICKEN — FILETS
CULANTRO + LEMON
1 UNIT / 4 PLATES
04 NOV 2026
RAW

---

10. PRODUCE LABEL FORMAT

Use:

INGREDIENT

PREPARATION

DATE

Examples:

ONION
JULIENNE
04 NOV 2026

or:

BREAKFAST POTATOES
PAR-COOKED
04 NOV 2026

---

11. FLAVOR CUBE LABEL FORMAT

Examples:

GARLIC + OIL

CILANTRO BASE

CELERY BASE

PESTO

MIXED SOFRITO

Include date.

If a mixed base contains unusual ingredients:

write them on the label.

---

12. FLAT-FREEZE RULE

When appropriate:

1. Fill Freezer Bag.
2. Remove excess air.
3. Flatten contents.
4. Freeze flat.
5. Stand or stack once firm.

Best for:

- meat chunks;
- ground meat;
- marinades;
- mashed potato;
- chopped vegetables;
- some fruit.

Benefits:

- faster freezing;
- faster thawing;
- less freezer space;
- easier organization.

---

13. PRE-FREEZE RULE

Foods that stick together should be pre-frozen individually.

Examples:

- berries;
- banana;
- broccoli;
- cauliflower;
- breakfast potatoes;
- fries.

Procedure:

1. Spread in one layer.
2. Freeze until firm.
3. Transfer to bag.
4. Label.

This makes it possible to remove only what is needed.

---

14. REFRIGERATOR ZONES

The exact shelf arrangement depends on refrigerator design, but foods should still follow a functional system.

READY-TO-EAT ZONE

- leftovers;
- packed lunches;
- yogurt;
- cottage cheese;
- deli meat;
- cheese;
- prepared food.

FRESH PRODUCE ZONE

- vegetables;
- herbs;

- fruits.

BREAKFAST ZONE

When useful:

- eggs;
- cottage cheese;
- yogurt;
- kéfir;
- breakfast ingredients.

CONDIMENT ZONE

Primarily door storage for compatible products.

RAW PROTEIN / THAWING ZONE

Dedicated protected area.

---

15. RAW MEAT STORAGE

Raw meat should always be stored:

BELOW READY-TO-EAT FOOD

and inside:

- tray;
- bin;
- leak-resistant container.

This applies especially to:

- thawing chicken;
- pork;
- beef;
- seafood.

Never allow a thawing bag to sit unprotected above:

- produce;
- leftovers;
- dairy.

---

16. THAWING STATION

Maintain a designated:

THAWING TRAY

or washable bin.

Night before:

1. Select protein unit.
2. Put bag in tray.
3. Place in refrigerator.
4. Keep separated from ready-to-eat foods.

If the bag leaks:

the tray contains the liquid.

---

17. THAWING RULE

Default:

FREEZER → REFRIGERATOR

Do not routinely thaw meat:

- on countertop;
- in sink at room temperature;
- on KARLBY.

If a faster food-safe thaw method is necessary, use an appropriate cold-water or microwave method and cook immediately.

---

18. NIGHT-BEFORE RESET

Every night:

1. Check next day’s menu.
2. Identify protein.
3. Move it to thawing tray.
4. Confirm carb.
5. Confirm vegetables.
6. Check if anything needs to be added to Reminders.

This keeps thawing from becoming a morning problem.

---

19. COOKED MEAL SYSTEM

The normal protein unit produces:

4 PLATES

Immediately after cooking:

2 PLATES

Current meal.

2 PLATES

Next meal.

Do not treat the second half as accidental leftovers.

It is:

PLANNED LUNCH

---

20. PACK-LUNCH-FIRST RULE

After cooking:

1. Portion tomorrow's lunch.
2. Put into food-storage containers.
3. Allow appropriate cooling.
4. Refrigerate.
5. Serve current meal.

This prevents:

- oversized dinner portions;
- lunch disappearing;
- uncertainty about leftovers.

---

21. SUNDAY SPECIAL STORAGE

Sunday lunch:

1 UNIT / 4 PLATES

Serve:

- 2 plates Sunday lunch.

Pack:

- 2 plates Monday lunch.

Sunday dinner is a separate Flex Meal and does not need to produce Monday lunch.

---

22. LEFTOVER LABELING

For cooked food that will not obviously be eaten the following day:

label with:

FOOD

DATE COOKED

Example:

CHICKEN CURRY
04 NOV

This is especially useful for:

- soups;
- stews;
- legumes;
- pasta;
- family-size dishes.

---

23. LEFTOVER PRIORITY

During Sunday planning and daily refrigerator checks:

eat in this order:

1.

Cooked leftovers.

2.

Fresh produce approaching the end of good quality.

3.

Opened dairy / ingredients.

4.

Freezer stock.

The freezer can wait.

Fresh food cannot.

---

24. LEFTOVER TRANSFORMATION

Small leftovers can be converted instead of discarded.

Examples:

LEFTOVER CHICKEN

→ bowl
→ quesadilla
→ sandwich
→ soup

LEFTOVER RICE

→ rice bowl
→ fried rice
→ gallo pinto

LEFTOVER VEGETABLES

→ omelette
→ soup
→ bowl

LEFTOVER MEAT

→ tacos
→ burrito
→ stuffed potato

---

25. FREEZING COOKED LEFTOVERS

Freeze leftovers when:

- they will not be eaten soon;
- they freeze well;
- quantity is useful.

Good candidates:

- soups;
- stews;
- cooked legumes;
- curry;
- cooked shredded meat;
- some sauces.

Less ideal:

- delicate salads;
- crispy fried food;
- fresh cucumber/tomato mixtures.

---

26. SOUP STORAGE

For large soups:

divide into smaller containers.

Benefits:

- faster cooling;
- easier portioning;
- less repeated reheating.

Leave appropriate headspace when freezing liquid.

---

27. PASTA STORAGE

Creamy pasta and tortellini are best prioritized as:

EAT SOON

rather than routinely frozen.

If a soup contains pasta and is intended for several days:

consider storing noodles separately when practical to prevent excessive softening.

---

28. RICE STORAGE

Cooked rice should be:

1. cooled promptly;
2. refrigerated;
3. stored covered.

Do not leave cooked rice sitting at room temperature for extended periods.

Use clean utensils when serving.

---

29. FRESH PRODUCE ORGANIZATION

Do not hide fresh produce behind containers.

The most perishable produce should be:

VISIBLE

Examples:

- berries;
- lettuce;
- spinach;
- herbs;
- cut vegetables.

Visibility reduces waste.

---

30. PRODUCE DRAWER SYSTEM

When refrigerator design permits:

DRAWER 1

Leafy / delicate:

- lettuce;
- spinach;
- herbs.

DRAWER 2

Harder produce:

- carrots;
- cabbage;
- peppers;
- other vegetables.

Fruit can be organized separately where practical.

The exact arrangement can be adapted to refrigerator size.

---

31. AVOCADO SYSTEM

Use ripeness rather than a fixed location.

HARD / UNRIPE

Room temperature until approaching ripeness.

RIPE

Move to refrigerator to slow further ripening.

Check frequently.

---

32. BANANA SYSTEM

Keep fresh bananas available for:

- cereal;
- breakfast;
- snacks.

When they become too ripe for fresh use:

PEEL → CUT → FREEZE

for:

- smoothies;
- baking.

---

33. HERB STORAGE

CILANTRO / PARSLEY

Use flower method when fresh.

Check water and leaves regularly.

Remove damaged portions.

FROZEN HERBS

Keep separate for cooked applications.

Fresh and frozen cilantro serve different purposes.

---

34. DAIRY ZONE

Keep:

- milk;
- Greek yogurt;
- cottage cheese;
- kéfir;
- cheese.

Check opened products during:

WEEKLY FRIDGE RESET

Do not buy duplicate dairy solely because it is difficult to see behind other items.

---

35. EGGS

Eggs are a high-use staple.

Store consistently in refrigerator.

Add to Reminders when remaining quantity will not support the upcoming breakfast plan.

---

36. CONDIMENT RULE

Condiments should not occupy unlimited refrigerator space.

During monthly refrigerator cleaning:

check:

- expiration;
- duplicates;
- nearly empty containers;
- sauces no one uses.

Finish or remove unnecessary duplicates before buying more.

---

37. RAW SEAFOOD RULE

Seafood thawing:

- salmon;
- tuna;
- tilapia;
- shrimp;

uses the same protected thawing system as other raw protein.

Because seafood often has shorter prep times:

marinate mainly near cooking time.

---

38. FREEZER BURN PREVENTION

To reduce freezer burn:

- use freezer-grade bags;
- remove excess air;
- seal completely;
- avoid damaged bags;
- keep freezer consistently cold;
- label clearly so food is not forgotten indefinitely.

---

39. FREEZER OVERLOAD RULE

The goal is not:

A COMPLETELY FULL FREEZER

A freezer packed so tightly that nothing can be found undermines the system.

Maintain enough organization to:

- see categories;
- rotate older food;
- retrieve one unit without emptying the freezer.

40. “MYSTERY BAG” RULE

No unlabeled freezer bags.

If an unlabeled bag is discovered:

identify it immediately if possible and label it.

Do not create a freezer full of:

UNKNOWN FOOD

41. RAW PACKAGING RULE

Original meat packaging that leaks or occupies excessive space may be removed during Monthly Protein Prep.

After processing:

- discard raw packaging;
- clean contaminated areas;
- wash hands;
- sanitize as appropriate.

42. REFRIGERATOR SPILL RULE

NORMAL FOOD SPILL

Use refrigerator-safe cleaning method from Section 10.

RAW MEAT LEAK

1. Remove food around area.
2. Clean visible contamination.
3. Wash affected compatible surface.
4. Sanitize according to Section 10.
5. Allow proper contact time.
6. Dry/reorganize as appropriate.

Do not simply wipe raw meat liquid with a dry towel.

43. WEEKLY FRIDGE RESET

Approximately once per week:

1. Check leftovers.
2. Check fresh produce.
3. Remove spoiled food.

4. Identify items to use first.
5. Check dairy.
6. Check thawing area.
7. Wipe visible spills.
8. Reorganize.
9. Update Reminders.

This is an inventory check as much as a cleaning task.

---

44. MONTHLY STORAGE RESET

During the monthly cycle:

FREEZER

- count protein units;
- reorganize oldest to front;
- check produce prep;
- identify nearly empty bags;
- remove obvious expired/unusable items.

REFRIGERATOR

- clean one or more zones;
- check condiments;
- clean organizers;
- check produce drawers.

PANTRY

- check staples;
- inspect dry legumes;
- combine duplicate opened packages when appropriate;
- add low staples to Reminders.

---

45. PANTRY ORGANIZATION

Group into categories.

GRAINS / CARBS

- rice;
- pasta;
- oats;
- quinoa.

LEGUMES

- beans;
- lentils;
- chickpeas.

CANNED / QUICK FOOD

- canned tuna;

- tomato products;
- other canned staples.

BAKING

- flour;
- cornstarch;
- sweeteners;
- baking ingredients.

SAUCES / CONDIMENTS

Shelf-stable bottles.

SPECIALTY

Asian ingredients and less frequently used products.

---

46. DRY LEGUME STORAGE

Store:

- beans;
- lentils;
- chickpeas;

in:

- clean;
- dry;
- airtight containers.

Keep away from:

- moisture;
- heat;
- direct sunlight.

Label when transferring out of original packaging if identification could become unclear.

---

47. REMINDERS CONNECTION

Storage and shopping are connected.

Add to Reminders when:

FREEZER

A staple category becomes low.

FRIDGE

A regularly used item will not last until next shopping cycle.

PANTRY

There is not enough for another usual recipe.

Do not wait until the item is completely gone if it is a high-use staple.

---

48. CONTAINER RULE

Storage containers should be:

- food-safe;
- easy to clean;
- appropriately sized;
- stackable when possible.

Avoid putting a very small amount of food into a giant container because it wastes refrigerator space and hides inventory.

---

49. LUNCH CONTAINERS

Maintain enough containers for at least:

2 PACKED LUNCHES

because every normal unit produces two lunch plates.

Ideally use containers that can go:

- refrigerator;
- microwave if appropriate;
- dishwasher.

---

50. REHEATING RULE

Reheat only the portion intended to be eaten.

Avoid repeatedly heating and cooling the same large container.

For soups/stews:

remove needed amount first.

---

51. SUNDAY INVENTORY CHECK

Before writing the weekly menu:

REFRIGERATOR

What must be eaten first?

FREEZER

What protein units are available?

PANTRY

What staples are low?

BREAKFAST

Do we have ingredients for seven breakfasts?

FLEX FOOD

Do we have at least a few quick options?

Only then create the menu.

---

52. STORAGE PRIORITY HIERARCHY

When deciding what to use:

1. COOKED FOOD

2. DELICATE FRESH FOOD

3. OPENED PRODUCTS

4. HARDY FRESH FOOD

5. FREEZER STOCK

6. PANTRY STOCK

This hierarchy minimizes waste.

---

53. FOOD SAFETY — GENERAL

- Keep refrigerator ≤ 40°F / 4°C.
- Keep freezer ≤ 0°F / -18°C.
- Refrigerate perishable cooked foods promptly.
- Do not thaw meat routinely at room temperature.
- Keep raw food separate from ready-to-eat food.
- Use clean utensils.

- Do not rely on smell alone to determine food safety.
- Discard food when safety is genuinely questionable rather than trying to rescue it.

---

54. SYSTEM CHECKLIST

EVERY NIGHT

- ☐ Pack next lunch
- ☐ Store leftovers
- ☐ Check next menu
- ☐ Thaw next protein
- ☐ Update Reminders

EVERY SUNDAY

- ☐ Review leftovers
- ☐ Review produce
- ☐ Review protein units
- ☐ Review breakfast ingredients
- ☐ Review pantry staples
- ☐ Write weekly menu

MONTHLY

- ☐ Count freezer units
- ☐ Complete stock back to 25
- ☐ Rotate freezer
- ☐ Review produce freezer prep
- ☐ Check pantry
- ☐ Clean storage zones

PRINCIPIO CENTRAL

A well-organized freezer is not simply food storage.

It is:

THE BACKBONE OF THE MEAL SYSTEM

The refrigerator tells you what must be used first.

The freezer tells you what meals are available.

The pantry supplies the structure.

The labels remove uncertainty.

The weekly reset prevents food from disappearing until it is unusable.

10. CLEANING, MAINTENANCE & KITCHEN CARE

OBJETIVO

Mantener la cocina limpia, segura y en buen estado sin utilizar productos innecesariamente agresivos ni aplicar el mismo químico sobre todas las superficies.

Esta cocina se considera de:

HIGH-USE HOME KITCHEN

debido a:

- cocina diaria;
- desayuno, almuerzo y cena;
- Monthly Protein Prep;
- Produce & Ingredient Prep;
- procesamiento de pollo, cerdo y res crudos;
- uso de molino de carne;
- blanching;
- air fryer;
- Ninja;
- pressure cooker;
- frituras;
- seafood;
- carnes;
- preparaciones que producen grasa.

Por lo tanto:

NOT EVERY CLEANER BELONGS EVERYWHERE

Cada superficie tiene un procedimiento específico.

---

1. CLEANING SYSTEM

La limpieza se divide en cuatro funciones.

CLEAN

Retirar:

- grasa;
- residuos;
- comida;
- suciedad visible.

RINSE

Retirar residuos de limpiador cuando corresponda.

SANITIZE

Reducir microorganismos sobre superficies compatibles después de limpiarlas.

DRY / POLISH

Secar y proteger el acabado cuando corresponda.

La regla general es:

CLEAN → SANITIZE

cuando existe contaminación de alimentos crudos.

Sanitizer no reemplaza cleaning.

---

2. PRODUCT MASTER LIST

YA DISPONIBLE

- ECOS Hypoallergenic Plant Powered Dish Soap — Free & Clear
- Dawn Dish Soap
- Weiman Daily Cooktop Cleaner
- Cascade Dishwasher Detergent
- Baking soda
- White vinegar
- Alcohol
- Bleach
- Multi-purpose disinfecting wipes
- Swiffer / Sweeper
- Swiffer Wet Floor Wipes
- Cotton cleaning cloths

---

3. CLEANING PRODUCTS — BUY / MAINTAIN

- Krud Kutter Kitchen Degreaser
- Weiman Stainless Steel Cleaner & Polish
- Dr. Beckmann Fridge & Microwave Hygiene Cleaner
- CleanSmart Daily Surface Cleaner / Hypochlorous Acid Sanitizer
- Rejuvenate Cabinet & Furniture Cleaner
- Affresh Dishwasher Cleaner Tablets
- Weiman Heavy Duty Glass Cooktop Cleaner & Polish Kit
- Easy-Off Fume Free Oven Cleaner
- Bar Keepers Friend Soft Cleanser
- Zep Neutral pH Floor Cleaner
- Activated Charcoal Refrigerator Deodorizer

---

4. CLEANING TOOLS — BUY / MAINTAIN

- microfiber cloth package;
- Scotch-Brite Zero Scratch Sponges;
- OXO Good Grips Dish Brush;
- small nylon detail brush;
- nylon hood-filter brush;
- reusable microfiber mop;
- reusable cleaning gloves;
- paper towels;
- empty spray bottles;
- kitchen cleaning caddy;
- extra-large food-grade silicone counter mat;
- large plastic cutting board exclusively for meat;
- large washable meat-prep tray.

---

5. MICROFIBER SYSTEM

Do not use the same microfiber for every job.

Ideally separate by function.

MICROFIBER — KARLBY

For:

- daily countertop cleaning;
- drying.

MICROFIBER — STAINLESS

For:

- refrigerator;
- dishwasher;
- hood;
- stainless trim.

MICROFIBER — GLASS COOKTOP

For:

- cooktop cleaning;
- polishing.

MICROFIBER — CABINETS

For cabinet cleaner only.

MICROFIBER — FRIDGE

For refrigerator interior.

MICROFIBER — FAUCET

For gold faucet and final drying.

Wash reusable cloths regularly.

---

6. COTTON CLOTH RULE

Do not discard existing cotton cloths.

They are useful for:

- dirty jobs;
- floor spills;
- trash can;
- greasy utility areas;
- places where lint is irrelevant.

Use microfiber for surfaces where finish matters.

---

7. KARLBY COUNTERTOPS

DAILY PRODUCT

ECOS FREE & CLEAR

Use:

- warm water;
- 1–2 drops ECOS;
- clean microfiber;
- separate dry microfiber.

FREQUENCY

After cooking.

Immediately after spills.

TIME

Approximately:

2–4 minutes

---

8. KARLBY PROCEDURE

1. Remove crumbs.
2. Dampen microfiber with warm water.
3. Add minimal ECOS.
4. Wipe surface.
5. Remove soap residue if necessary with clean damp cloth.
6. Dry completely.

Pay special attention to:

- sink perimeter;
- seams;
- edges;
- faucet area.

Water should not be allowed to sit unnecessarily.

---

9. KARLBY — DO NOT USE

Do not routinely use:

- bleach;
- alcohol;
- kitchen degreaser;
- disinfecting wipes;
- vinegar;
- Magic Eraser;
- baking soda;
- abrasive scrubbers.

Do not sanitize KARLBY with aggressive chemicals merely because raw meat was prepared nearby.

Instead:

RAW MEAT SHOULD NOT DIRECTLY CONTACT KARLBY

Use the dedicated meat-prep workstation.

---

10. KARLBY SINK AREA

The countertop installation around the sink was professionally treated/sealed during installation.

Still inspect regularly for:

- persistent moisture;
- swelling;
- darkening;
- separation;
- damaged seal;
- standing water.

MONTHLY

Inspect:

- sink cutout;
- faucet base;
- seams;
- edges.

Always dry this area after high-water activities such as Produce Prep.

---

11. MEAT PREP WORKSTATION

Before raw meat processing:

STEP 1

Place:

EXTRA-LARGE FOOD-GRADE SILICONE MAT

approximately 36 × 24 inches.

STEP 2

Place on top:

PLASTIC MEAT CUTTING BOARD

STEP 3

Use washable tray/bowl as necessary.

The silicone mat works as a:

CONTAINMENT LAYER

for:

- raw juices;
- bags;
- bowls;
- grinder;
- marinades;
- packaging;
- drips.

Do not cut directly on silicone mat.

---

12. MEAT PREP CLEANUP

Expected active time:

30–45 MINUTES

After processing:

1. Freeze/refrigerate all meat.
2. Discard raw packaging.
3. Wash hands.
4. Disassemble grinder.
5. Wash grinder parts.
6. Wash meat board.
7. Wash knives.
8. Wash bowls.
9. Wash meat tray.
10. Wash silicone mat.
11. Clean sink.
12. Clean refrigerator/freezer handles touched during prep.
13. Clean drawer pulls/handles touched with contaminated hands.
14. Sanitize compatible food-contact surfaces.
15. Allow appropriate sanitizer contact time.
16. Air-dry as instructed.
17. Clean floor if contaminated.
18. Remove silicone mat.
19. Inspect KARLBY beneath.
20. Clean KARLBY with ECOS if needed.
21. Dry KARLBY completely.

---

13. FOOD-CONTACT SANITIZER

PRODUCT

CleanSmart Daily Surface Cleaner

Hypochlorous acid sanitizer.

Use after washing compatible surfaces that contacted raw meat.

Examples:

- silicone meat mat;
- plastic cutting board;
- compatible sink surface;
- compatible knives;
- nonporous containers;
- hard nonporous surfaces;
- refrigerator interior after raw-meat leakage;
- contaminated handles.

Follow product label for:

- contact time;
- surface compatibility;
- use on food-contact surfaces.

When used according to its label, no-rinse food-contact use may be appropriate.

---

14. IMPORTANT SANITIZER RULE

Never spray sanitizer onto visible grease or raw residue and consider the surface clean.

Correct sequence:

REMOVE DEBRIS

↓

WASH

↓

RINSE IF NEEDED

↓

SANITIZE

↓

CONTACT TIME

↓

DRY / AIR-DRY AS DIRECTED

---

15. DISHES & COOKWARE

PRODUCT

DAWN DISH SOAP

Use for:

- plates;
- bowls;
- cookware;
- removable appliance parts;
- utensils;
- heavy food soils.

ECOS remains primarily the gentle cleaning product for surfaces such as KARLBY and faucet.

---

16. STAINLESS STEEL

PRODUCT

WEIMAN STAINLESS STEEL CLEANER & POLISH

Use for compatible stainless exterior surfaces such as:

- refrigerator;
- dishwasher;
- range hood;
- oven trim;
- microwave exterior;
- trash can.

---

17. STAINLESS PROCEDURE

WEEKLY

Approximately:

5–10 minutes total

1. Remove heavy grease first if necessary.
2. Apply small amount of Weiman.
3. Wipe in direction of grain.
4. Buff with clean dry microfiber.

The polish helps reduce appearance of:

- fingerprints;
- smudges;
- watermarks;
- dust.

---

18. HEAVY STAINLESS GREASE

When stainless has accumulated kitchen grease:

STEP 1 — CLEAN

Krud Kutter Kitchen Degreaser.

STEP 2 — REMOVE RESIDUE

Clean damp cloth.

STEP 3 — DRY

Microfiber.

STEP 4 — POLISH

Weiman Stainless Steel Cleaner & Polish.

Do not try to make stainless polish perform the job of a heavy degreaser.

---

19. KITCHEN DEGREASER

PRODUCT

KRUD KUTTER KITCHEN DEGREASER

Use for compatible surfaces with:

HEAVY KITCHEN GREASE

Examples:

- range hood;
- backsplash;
- stove surroundings;
- greasy stainless before polishing;
- washable walls;
- compatible metal;
- trash can.

Always follow product label for surface compatibility.

---

20. RANGE HOOD — EXTERIOR

WEEKLY

Product:

Krud Kutter Kitchen Degreaser

Time:

5–8 minutes

Procedure:

1. Ensure hood is cool.
2. Apply cleaner according to label.
3. Wipe grease.
4. Remove cleaner residue.
5. Dry.

If hood is compatible stainless:

6. Finish with Weiman Stainless Steel Cleaner & Polish.

---

21. RANGE HOOD FILTERS

INSPECT

Every:

2 WEEKS

WASH

Approximately every:

2–4 WEEKS

depending on cooking volume and visible grease.

---

22. FILTER CLEANING PROCEDURE

1. Remove filter.
2. Place in sink/basin.
3. Apply Krud Kutter if label confirms compatibility with filter material.
4. Allow brief dwell time.
5. Scrub with nylon filter brush.
6. Rinse extremely well.
7. Allow to dry completely.
8. Reinstall only when dry.

Never reinstall wet filters.

---

23. REFRIGERATOR INTERIOR

PRODUCT

DR. BECKMANN FRIDGE & MICROWAVE HYGIENE CLEANER

Use for routine refrigerator interior cleaning.

Suitable uses include:

- shelves;
- refrigerator interior;
- freezer interior;
- microwave interior;
- food-storage areas according to product instructions.

---

24. WEEKLY FRIDGE RESET

Time:

5–10 MINUTES

This is not a complete refrigerator deep clean.

Procedure:

1. Review vegetables.
2. Discard spoiled food.
3. Review leftovers.
4. Check dairy.

5. Remove dirty organizer if necessary.
6. Spot-clean spills with Dr. Beckmann.
7. Dry.
8. Reorganize.
9. Update Reminders.

---

25. MONTHLY FRIDGE CLEAN

Time:

15–25 MINUTES

Clean by zones rather than emptying entire refrigerator every month.

Possible rotating zones:

ZONE A

Produce drawers.

ZONE B

Dairy / breakfast shelf.

ZONE C

Door.

ZONE D

Raw protein/thawing area.

ZONE E

Organizers.

Procedure:

1. Remove food from zone.
2. Remove organizer/bin.
3. Wash bin if necessary.
4. Clean refrigerator surface.
5. Dry.
6. Replace.
7. Reorganize.

---

26. REFRIGERATOR DEEP CLEAN

Every:

3–4 MONTHS

Expected time:

35–60 minutes

Remove:

- drawers;
- bins;
- removable shelves;
- organizers.

Use:

INTERIOR

Dr. Beckmann.

WASHABLE PARTS

ECOS/Dawn as appropriate.

RAW-MEAT CONTAMINATION

Clean first, then CleanSmart on compatible surface.

Dry all parts before reinstalling.

---

27. RAW MEAT LEAK IN REFRIGERATOR

If raw meat leaks:

1. Remove nearby food.
2. Discard contaminated disposable material.
3. Clean visible liquid.
4. Wash compatible surface.
5. Apply CleanSmart.
6. Respect label contact time.
7. Air-dry/dry according to instructions.
8. Wash contaminated organizer or tray.
9. Return food only after area is clean.

---

28. FRIDGE ODOR CONTROL

PRODUCT

ACTIVATED CHARCOAL REFRIGERATOR DEODORIZER

Use:

- refrigerator;

- freezer if needed.

Purpose:

absorb odors from:

- onion;
- garlic;
- fish;
- leftovers;
- mixed foods.

The goal is:

NEUTRAL + CLEAN

not:

PERFUMED FRIDGE

---

29. FREEZER CLEANING

SPOT CLEAN

Immediately after:

- spills;
- leaking seafood;
- damaged packages.

DEEP CLEAN

Approximately every:

3–6 MONTHS

or as needed.

During deep clean:

1. Work quickly to keep frozen food cold.
2. Remove manageable sections.
3. Clean interior.
4. Dry.
5. Replace food.
6. Reorganize FIFO.
7. Review mystery/old packages.

---

30. VITROCERAMIC COOKTOP — DAILY

PRODUCT

WEIMAN DAILY COOKTOP CLEANER

Only clean when cooktop is cool.

FREQUENCY

After cooking or when visibly dirty.

TIME

3–5 minutes

Procedure:

1. Remove loose debris.
2. Apply cleaner.
3. Wipe using non-scratch pad/microfiber.
4. Buff dry.

---

31. VITROCERAMIC — HEAVY CLEAN

PRODUCT

WEIMAN HEAVY DUTY GLASS COOKTOP CLEANER & POLISH KIT

Use for:

- baked-on food;
- burned residue;
- difficult grease;
- stubborn watermarks.

Kit includes:

- Heavy Duty cleaner;
- scratch-free pad;
- cooktop scraper.

Time:

5–15 minutes

Do not substitute generic kitchen degreaser when the cooktop-specific system is available.

---

32. COOKTOP SCRAPER RULE

Use scraper only:

- at correct angle;
- on compatible cool surface;
- according to manufacturer instructions.

Never dig a blade corner into glass.

---

33. CABINETS

PRODUCT

REJUVENATE CABINET & FURNITURE CLEANER

Use on the compatible finished cabinets in the kitchen.

---

34. CABINET CLEANING

WEEKLY / AS NEEDED

Priority areas:

- cabinets around stove;
- handles;
- under-sink doors;
- trash area.

Procedure:

1. Apply lightly to microfiber rather than soaking cabinet.
2. Wipe.
3. Dry if necessary.

Do not saturate:

- seams;
- edges;
- joints.

---

35. CABINET DEEP CLEAN

Every:

3–6 MONTHS

Work section by section.

Do not empty every cabinet simultaneously.

Clean:

- shelves;
- crumbs;
- spills;
- containers.

Allow interior to dry before returning items.

---

36. DISHWASHER — DAILY LOADS

PRODUCT

CASCADE

Use only for dishwasher loads according to package directions.

Do not substitute ordinary dish soap inside dishwasher.

---

37. DISHWASHER FILTER

Inspect every:

2 WEEKS

If dirty:

1. Remove.
2. Rinse.
3. Brush with soft brush.
4. Remove food residue.
5. Reinstall correctly.

Time:

5–10 minutes

---

38. DISHWASHER MAINTENANCE

PRODUCT

AFFRESH DISHWASHER CLEANER

Use:

MONTHLY

Active work:

approximately 5 minutes plus machine cycle.

Purpose:

- mineral buildup;
- odor-producing residue;
- internal areas not easily hand-cleaned.

---

39. OVEN

PRODUCT

EASY-OFF FUME FREE OVEN CLEANER

Use for:

- baked-on oven grease;
- spot cleaning;
- periodic deep cleaning.

---

40. OVEN SPOT CLEAN

After a significant spill:

1. Allow oven to cool.
2. Remove loose debris.
3. Apply product according to label.
4. Respect dwell time.
5. Remove completely.

Active time:

approximately **5–10 minutes**.

---

41. OVEN DEEP CLEAN

Approximately every:

2–3 MONTHS

depending on use.

Active time:

20–40 minutes + dwell time

Do not apply cleaner to prohibited areas such as:

- heating elements;
- electrical connections;
- door gasket;
- incompatible aluminum;
- painted areas.

Follow oven manual and cleaner label.

---

42. MICROWAVE

PRODUCT

DR. BECKMANN FRIDGE & MICROWAVE HYGIENE CLEANER

Frequency:

- weekly;
- after splatters.

Time:

3–5 minutes

---

43. MICROWAVE STEAM METHOD

For dried food:

1. Place microwave-safe bowl with water inside.
2. Heat until steam develops.
3. Allow steam to loosen residue.
4. Carefully remove bowl.
5. Wipe softened food.
6. Finish with Dr. Beckmann.
7. Dry.

---

44. AIR FRYER — EVERY USE

PRODUCT

DAWN

Wash removable:

- basket;
- tray;
- compatible accessories.

Time:

5–10 minutes

Allow parts to cool first.

Dry fully before reassembly.

---

45. AIR FRYER HEAVY GREASE

Use Krud Kutter only:

- on compatible exterior/removable surfaces;
- according to appliance instructions.

Never apply directly to:

- electrical areas;
- heating element;
- fan;
- electronics.

---

46. SINK — DAILY

PRODUCT

ECOS FREE & CLEAR

Use with:

- non-scratch sponge;
- dish brush as needed.

Time:

2–3 minutes

Procedure:

1. Remove food debris.

2. Wash basin.
3. Rinse.
4. Dry perimeter.

---

47. SINK — DEEP CLEAN

PRODUCT

BAR KEEPERS FRIEND SOFT CLEANSER

Use according to the material compatibility already selected for the sink.

Procedure:

1. Wet surface.
2. Apply small amount.
3. Clean with non-scratch sponge.
4. Do not allow unnecessary prolonged dwell time.
5. Rinse extremely well.
6. Dry.

Use for:

- deeper staining;
- buildup;
- periodic restoration.

Not required for ordinary daily cleaning.

---

48. GOLD FAUCET

The safest approach is:

LESS PRODUCT

DAILY

Dry with microfiber.

Time:

30 seconds

This is one of the most important habits for preserving the finish.

---

49. GOLD FAUCET — WEEKLY

Use:

DILUTED ECOS

Procedure:

1. Apply gently with microfiber.
2. Wipe.
3. Remove soap residue.
4. Dry immediately.

Time:

1–2 minutes

---

50. GOLD FAUCET — DO NOT USE

Avoid:

- Krud Kutter;
- Weiman Stainless;
- bleach;
- CLR;
- Magic Eraser;
- baking soda;
- aggressive abrasives.

---

51. GARBAGE DISPOSAL — BADGER 5

During use:

COLD WATER

Run water while disposal operates.

Continue cold water briefly after grinding finishes.

Do not treat disposal as a trash can.

Avoid routinely putting down:

- oil;
- grease;
- excessive fibrous waste;
- harsh drain cleaners;
- strong bleach solutions.

---

52. DISPOSAL ODOR

If odor develops:

1. Ensure splash guard and visible areas are clean.

2. Flush appropriately.
3. Follow manufacturer-approved cleaning procedure.
4. Do not attempt to cover odor with fragrance alone.

Persistent odor usually means:

SOMETHING NEEDS CLEANING

53. TRASH CAN

WEEKLY

Product:

KRUD KUTTER

for:

- food residue;
- grease;
- sticky buildup.

Procedure:

1. Empty.
2. Remove loose debris.
3. Apply degreaser.
4. Scrub/wipe.
5. Rinse.
6. Dry completely.
7. Insert new bag.

Time:

5–10 minutes

---

54. TRASH CAN — RAW MEAT CONTAMINATION

If raw meat liquid enters trash can:

1. Wash first.
2. Rinse.
3. Sanitize compatible surface with CleanSmart.
4. Allow proper contact time.
5. Dry.

55. BACKSPLASH

DAILY

Spot-clean splashes after cooking.

WEEKLY

Product:

KRUD KUTTER KITCHEN DEGREASER

Time:

5–8 minutes

Procedure:

1. Apply appropriately.
2. Remove grease.
3. Wipe with clean damp cloth.
4. Remove cleaner residue.
5. Dry.

If grout is present:

do not continuously saturate it.

---

56. FLOOR — DAILY

Use:

- broom;
- Swiffer / Sweeper;
- spot-clean spills immediately.

Do not flood floor.

Do not pour water onto floor and then mop it around.

---

57. FLOOR CLEANING

PRODUCT

ZEP NEUTRAL pH FLOOR CLEANER

Use according to dilution and flooring compatibility established for the installed floor.

Procedure:

1. Sweep/vacuum debris.

2. Prepare cleaner according to label.
3. Use microfiber mop.
4. Work in manageable sections.
5. Avoid excessive water.
6. Allow floor to dry.

---

58. FLOOR — RAW MEAT SPILL

If raw liquid reaches floor:

1. Remove visible contamination immediately.
2. Clean area.
3. Sanitize with a product compatible with flooring when required.
4. Dry.

Do not spread contaminated liquid around with mop.

---

59. PRODUCE PREP CLEANUP

Expected active time:

20–30 MINUTES

Wash:

- Ninja;
- knives;
- cutting board;
- blanching pot;
- strainer;
- ice bath bowl;
- trays;
- silicone freezer molds.

Use:

DAWN

For washable equipment.

ECOS

For KARLBY.

DR. BECKMANN

When refrigerator bins require cleaning.

---

60. PRODUCE PREP WATER RESET

Blanching creates substantial moisture.

Always finish by drying:

- sink perimeter;
- faucet base;
- backsplash;
- KARLBY seams;
- area behind faucet;
- counter edges.

Water management is part of countertop maintenance.

---

61. DAILY KITCHEN RESET

After the final cooking session of the day:

1. Pack tomorrow’s lunch.
2. Put away leftovers.
3. Load dishwasher.
4. Hand-wash remaining cookware.
5. Clean cooktop.
6. Clean KARLBY.
7. Clean sink.
8. Dry faucet.
9. Sweep/spot-clean floor if needed.
10. Empty trash if necessary.
11. Check next meal.
12. Move next protein to thaw.

This is the standard:

CLOSE THE KITCHEN

routine.

---

62. EVERY-TIME-WE-COOK TASKS

Task	Approx. Time
KARLBY	2–4 min
Cooktop	3–5 min
Sink	2–3 min
Dishes/tools	5–15 min
Floor spot clean	As needed

These can overlap rather than being treated as separate cleaning sessions.

---

63. WEEKLY CLEANING

Complete as needed across the week:

- stainless appliances;
- range hood exterior;
- cabinet fronts/handles;
- backsplash;
- refrigerator reset;
- microwave;
- trash can.

Approximate tasks:

Area	Time
Stainless	5–10 min
Hood exterior	5–8 min
Cabinets	5–10 min
Backsplash	5–8 min
Fridge reset	5–10 min
Microwave	3–5 min
Trash can	5–10 min

These do not need to happen on the same day.

---

64. EVERY 2 WEEKS

Inspect:

- hood filters;
- dishwasher filter.

Also coordinate with:

TWICE-MONTHLY PRODUCE PREP

when convenient.

---

65. EVERY 2–4 WEEKS

Deep-degrease:

RANGE HOOD FILTERS

Time:

approximately **10–15 active minutes**.

---

66. MONTHLY MAINTENANCE

- Affresh dishwasher cycle.
- Refrigerator zone cleaning.
- Clean refrigerator drawer/organizer as needed.
- Inspect sink seal.
- Inspect KARLBY around sink.
- Review cleaning supplies.
- Wash cleaning caddy if dirty.
- Replace/clean sponges and brushes as needed.

---

67. EVERY 2–3 MONTHS

OVEN

Deep clean depending on actual use.

If oven remains clean:

do not deep-clean simply because calendar says so.

---

68. EVERY 3–4 MONTHS

REFRIGERATOR

Deep clean:

- shelves;
- drawers;
- organizers;
- interior walls.

---

69. EVERY 3–6 MONTHS

- freezer deep clean;
- cabinet interiors by sections;
- inspect KARLBY finish;
- inspect silicone around sink;
- inspect difficult grease areas;
- clean behind/under movable small appliances.

---

70. CLEANING CADDY SYSTEM

Keep frequently used kitchen cleaning products together.

Suggested caddy:

- ECOS;

- Krud Kutter;
- CleanSmart;
- Rejuvenate;
- microfiber cloths;
- detail brush;
- gloves.

Keep specialty products stored nearby but they do not necessarily need to occupy the daily caddy.

Examples:

- Easy-Off;
- Affresh;
- Heavy Duty Cooktop Kit.

---

71. CHEMICAL SAFETY RULE

Never mix cleaners unless the manufacturer explicitly directs it.

Particularly:

NEVER MIX BLEACH WITH OTHER CLEANING CHEMICALS

Keep:

- bleach;
- vinegar;
- alcohol;
- commercial cleaners;

as separate products.

More chemicals do not equal more clean.

---

72. SPRAY-BOTTLE RULE

If a product is transferred or diluted into a secondary bottle:

label it clearly.

Include:

- product name;
- dilution if applicable.

Never keep an unidentified chemical bottle.

---

73. GLOVE RULE

Reusable cleaning gloves are for:

- trash;
- degreasing;
- bathroom-style dirty jobs;
- strong cleaners.

Food-prep nitrile gloves are:

DIFFERENT

Do not use the same glove system for cleaning chemicals and raw-food handling.

---

74. SPONGE RULE

Separate:

DISH SPONGE

for cookware/dishes.

CLEANING SPONGE

for sink/heavy cleaning.

COOKTOP PAD

only for cooktop.

Do not use a greasy sink sponge to clean KARLBY or appliances.

---

75. BRUSH SYSTEM

DISH BRUSH

Daily dishes/cookware.

DETAIL BRUSH

- seams;
- corners;
- faucet base;
- small grooves.

HOOD FILTER BRUSH

Greasy hood filters only.

Keeping tools separated prevents moving heavy grease around the kitchen.

---

76. “USE THE LEAST AGGRESSIVE PRODUCT” RULE

Start with:

MILD CLEANING

Escalate only when necessary.

Example:

Normal KARLBY dirt

ECOS.

Not degreaser.

Normal faucet marks

Microfiber + ECOS.

Not abrasive cleaner.

Normal cooktop

Daily Cooktop Cleaner.

Heavy Duty only when necessary.

Normal sink

ECOS.

BKF when deeper cleaning is needed.

This protects new finishes.

---

77. SPILL PRIORITY

Clean immediately:

PRIORITY 1

Raw meat / blood / seafood liquid.

PRIORITY 2

Water around KARLBY seams.

PRIORITY 3

Oil/grease on floor.

PRIORITY 4

Acidic or strongly colored food.

Examples:

- achiote;
- tomato;
- curry;
- berry juice.

Waiting usually makes cleaning harder.

---

78. APPLIANCE EXTERIOR RULE

Before applying any cleaner to a new appliance:

confirm:

- surface finish;
- manufacturer restrictions.

Especially for:

- fingerprint-resistant coatings;
- special stainless finishes;
- coated control panels.

Do not assume every silver appliance is bare stainless steel.

---

79. SMALL APPLIANCES

AFTER USE

Clean food-contact pieces of:

- Ninja;
- rice cooker;
- pressure cooker;
- air fryer;
- mixer attachments.

Do not allow food residue to dry unnecessarily.

---

80. PRESSURE COOKER

After use:

1. Cool safely.
2. Wash pot.
3. Wash lid according to manufacturer instructions.
4. Check valve.
5. Remove trapped food.
6. Dry completely.

Periodically inspect:

- gasket;
- valve;
- safety components.

Pressure cooker safety components must never be clogged.

---

81. NINJA BLENDER

Immediately after use:

1. Rinse.
2. Add warm water + small drop Dawn if useful.
3. Clean pitcher/blade carefully.
4. Rinse.
5. Dry.

Be especially careful around blade assembly.

---

82. GRINDER MAINTENANCE

After every use:

1. Disassemble completely.
2. Wash food-contact parts.
3. Remove all meat/fat residue.
4. Sanitize compatible parts.
5. Dry completely.
6. Store only when fully dry.

No meat residue should remain inside grinder components.

---

83. CUTTING BOARD — RAW MEAT ONLY

Plastic meat board is reserved for:

RAW PROTEINS

After every session:

1. Wash.
2. Rinse.
3. Sanitize.
4. Dry completely.

Replace when:

- deep knife grooves become difficult to clean;
- board warps;
- surface becomes excessively damaged.

84. SILICONE MAT STORAGE

After Meat Prep:

1. Wash.
2. Sanitize.
3. Dry completely.

Store:

- rolled loosely;
- or flat.

Do not fold tightly if this creates permanent creases.

Never store damp.

---

85. CLEANING SUPPLY INVENTORY CHECK

During Monthly Reset check:

- dish soap;
- dishwasher detergent;
- sanitizer;
- degreaser;
- stainless cleaner;
- fridge cleaner;
- cabinet cleaner;
- cooktop cleaner;
- floor cleaner;
- oven cleaner;
- sponges;
- microfiber;
- gloves;
- paper towels.

Add low supplies to Reminders.

---

86. MASTER CLEANING SCHEDULE

EVERY COOKING SESSION

- ☐ Dishes
- ☐ KARLBY
- ☐ Cooktop
- ☐ Sink
- ☐ Faucet dry
- ☐ Floor spills
- ☐ Food stored

DAILY / END OF DAY

- ☐ Dishwasher
- ☐ Leftovers packed
- ☐ Sink reset
- ☐ Counters clear
- ☐ Next protein thawing

WEEKLY

- ☐ Stainless
- ☐ Hood exterior
- ☐ Cabinet high-touch areas
- ☐ Backsplash
- ☐ Fridge reset
- ☐ Microwave
- ☐ Trash can
- ☐ Floor mop

EVERY 2 WEEKS

- ☐ Dishwasher filter
- ☐ Hood filter inspection

EVERY 2–4 WEEKS

- ☐ Hood filter deep clean

MONTHLY

- ☐ Affresh
- ☐ Fridge zone clean
- ☐ Inspect KARLBY sink area
- ☐ Inspect sink/faucet
- ☐ Restock cleaning supplies

EVERY 2–3 MONTHS

- ☐ Oven deep clean

EVERY 3–4 MONTHS

- ☐ Refrigerator deep clean

EVERY 3–6 MONTHS

- ☐ Freezer deep clean
- ☐ Cabinet interiors
- ☐ KARLBY inspection
- ☐ Difficult appliance areas

---

87. PRODUCT QUICK REFERENCE

Job	Product
KARLBY	ECOS Free & Clear
Dishes / cookware	Dawn
Raw-food sanitation	CleanSmart
Silicone meat mat	Wash + CleanSmart
Daily cooktop	Weiman Daily Cooktop Cleaner
Burned cooktop	Weiman Heavy Duty Cooktop Kit

Job	Product
Stainless appliances	Weiman Stainless Steel Cleaner & Polish
Heavy kitchen grease	Krud Kutter
Range hood	Krud Kutter + Weiman if stainless
Hood filters	Krud Kutter when compatible
Refrigerator interior	Dr. Beckmann
Raw-meat fridge contamination	Clean + CleanSmart
Fridge odor	Activated charcoal
Cabinets	Rejuvenate
Dishwasher loads	Cascade
Dishwasher maintenance	Affresh
Oven	Easy-Off Fume Free
Microwave	Dr. Beckmann
Sink daily	ECOS
Sink deep clean	Bar Keepers Friend Soft Cleanser
Gold faucet	ECOS + microfiber
Trash can	Krud Kutter + sanitizer when needed
Backsplash	Krud Kutter
Floor	Zep Neutral pH Floor Cleaner

PRINCIPIO CENTRAL

A clean kitchen does not require using the strongest chemical available.

It requires using:

THE RIGHT PRODUCT

ON THE RIGHT SURFACE

AT THE RIGHT FREQUENCY

Daily maintenance prevents heavy buildup.

Ingredient Prep requires a higher sanitation standard because raw food is being processed.

Water management protects KARLBY.

Grease management protects appliances.

Consistent small resets prevent the kitchen from becoming a large cleaning project.

The goal is not:

CONSTANT DEEP CLEANING

The goal is:

A KITCHEN THAT STAYS UNDER CONTROL.
